INCREASE OF RATS.—The Farmers' Gazette (English) asserts and proves by figures that one pair of rats will have a progeny and descendants no less than 661, 050 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 65,000 human beings.

RATS versus BIRDS.—Whoever engages in shooting small birds is a cruel-man; whoever a ids in exterminating rats is a benefactor. We should like some of our correspondents to give us the benefit of their experience in driving out these pests. We need something besides dogs, cats, and traps for this business.—Scientife American, N. I.

"COSTAR'S" RAT Exterminator is simple, safe, and sure,—the most perfect Rar-fifcation meeting we have ever attended. Every rat that can get it, properly prepared according to directions, will eat it, and every one that eats it will die, generally at some place as far possible from where the medicine was taken—Lake Share.
