Lehighton Institute.

The Institute was called to order by the President, J. L. Allem, and the opening exercises conducted by S. J. Barnett. Roll called and minutes read and approved.

An election of officers was held with the following result: Pres S. J. Barnett; Sec., E C. Nead; Trens., H. M. Heilman. Mrs. Atlem was elected an honorary member.

The Institute then proceeded to business; on motion of Miss Yarnali, it was agreed that Written Arithmetic be made a regular exercise of the Institute-Brooks' being the text book. The teach ers then engaged in considering the Constitution of the United States, and of the government, after which the Institute sung, 'Clore the Door Lightly,' and "Fulness of Christ."

Mr. Barnett favored the Institute with an account of several school visitations made during vacation, making special mention of Northumberland, the schools of which place he represented to be doing well. He also added, that considering the organization, and work ing condition of schools, those of Lehighton compare very favorably with, if they do not excel, any of those visited. He also spoke very complimentary of the teachers of Wilkesbarre and their Institute, a ses ion of which he had the pleasure of attending.

Mr. Hofford, coming in, took part in several discussions that followed, on of which, the propriety of assembling the schools in the Hall on Friday after noons was decided as profitable to al concerned. Mr. Barnett closed the morning exercises, by reading a charming little poem, (written by Geo. H. Curtis) entitled "What my teacher is to me."

The afternoon session was opened by select readings by Mr. Barnett and Mis Hellman, An exercise in Grammar wa conducted by Mr. Barnett, in which al the teachers participated. The commit tee presented a programme for nex meeting. Adjourned to meet Jan. 30 Miss E. C. NEAD, Sec. 1875.

Lehighton, Jan. 23, 1875.

The Coal Trade. The anthracite coal trade the pas

week has been very light. The entire shipments for the week are put down a 75,896 tons, and for the year at 902, 680 tons, against 946,480 tons to correponding time last year, showing a decrease of 43,728 tons. The bituminous coal tonnage for the week was 38,757 tons, and for the year 58,456 tons, making a total of all kinds for the week of 114,554 tons, and for the year 961,166 tons, against 1,015,403 tons, a decrease for the coal year of 54,237 tons. As our tabulated returns of the tonnage of each of the great carrying companies show, the business in all the coal reglous is exceedingly slack, for the double reason that the supply of coal at the great depots is pretty full and that there is a general suspension of work at the mines, in consequence of differences between operators and working men as to wages. Should there spring up a demand for coal this lock in the trade would probably soon be overcome. Indeed, it is now reported, we know not with what truth, that one of the Reading Coal and Iron Company's mines is being worked at reduced wages. There are reports of like import from the Shamokin region, from whence all the coal mined goes West. The Wyoming region, it is intimated, means to wine coal, and if it should to any considerable extent, Lehigh and Schuylkill regions will not long remain idle. The retail coal trade in this city continues unusually active under the recently reduced prices. At Port Richmond for the week ending the 23d instant the receipts of coal were none and the shipments 2500 tons, leaving 126,500 tons on hand. Shipments of coal are so much reduced that we present no freight rates, the ice in the Dela ware having pretty effectually stopped off navigation. We are without our name weekly report of tonuage by the New Jersey Central of coal from the Wilkesbarre and Lehigh regions. - Phila Ledger Jan. 25th.
