Runaway Accident.

On Wednesday noon, Aquilla E. Reed, a butcher, residing in Weissport, was on his return from the Mauch Chunk market accompanied by his brother, in a two horse wagon. When about 100 yards above George Hagen's hotel, at Delanogne, Lewas overtaken and run into by F. P Semmel's team, the horses of which had taken fright at a stump on the roadside, throwing the driver from his seat on the wagon, and ran off over and down the mountain, colliding with Mr. Reed's team as above stated, both occupants being thrown out. Mr. A. E. Reed struck upon his head, causing concussion of the brain, and being otherwise injured. His brother was only slightly hurt. Drs. Gerhart and Reber were promptly on hand to render the unfortunate sufferer medical aid, and a large number of his friends hurried to the scene of the accident. He was then removed to his home in Weissport. Dr. H. DeYoung was then sent for and immediately responded to the summons.

We regret to state that Mr. Reed lingered until 3 o'clock, Friday morning, in an unconscious state, when he died. He was a son of the late Frank. The Lehighton Races.

The steam Carriage did not arrive on the 5th as was advertised, on account of the rain and bad roads. The race was postponed to the 6th, when it was on hand.

The stallion Andrew Jackson, owned by Al. Miller, trotted against the steam carriage, and beat it easily. The same day a very interesting race took place between Weatherly Pet and Bessie Turner of Allentown; mile heats, best 3 in 5. Bessie Turner won 1, 2 and 5; Weatherly Pet 3 and 4. On Saturday, 7th, there was some fine trotting and good time, although the track was in bad condition—heavy and muddy. Gipsy Bill and Honest Mac were the horses entered for the first race; mile heats, best 3 in 5. Honest Mac won 1st heat, time, 2.40½; 2d heat, same time; and 4th heat, 2.45. Gipsy Bill won 3d heat; time, 2.42. The attendance at the races was satisfactory, and altogether the effort may be termed a success.

I was so mad that I just took that old stump of his and threw it right in the gutter; yes, I did.

What a Live Man Can Do.

The Bethlehem Times, of Tuesday of last week, has a chapter "on men" of the Lehigh Valley. Judge Asa Packer was in town this morning. He lives here in Mauch Chunk and resides at Philadelphia. He built the Lehigh Valley, the Pennsylvania and New York, and Boston and Albany Railroads and founded the Lehigh University. And he runs them all. What a man he is! Let us have a few more devotes to the care of hell cats at least a few scores, thousands of acres of them! and add two or three iron works. And he has some time left occasionally, and then he sees people who haven't so much to do as he has. He bears his years with ease, too.

A Horrible Railroad Accident.

A sad and fatal accident occurred on the Lehigh Valley Railroad, near Hoffman's Saw Mills, about ten minutes after eight o'clock yesterday morning. Tobias Rudolph, whose parents reside on Union street, near Lehigh, accompanied a number of his comrades to the Lehigh Valley Depot, for the purpose of seeing the excursion of the Zion's Reformed Sunday School off to Laurel Hill, and when the train arrived at the depot, Rudolph and his companions got on board. Near the Franklin crossing he jumped off, and his foot catching at the oil box, he lost his hold and fell forward, striking with his face on the rails. A cry of horror went up from those persons who were standing on the platform and saw the sad fall and dragged along, and as soon as it was possible, the train was stopped, but the badly mutilated body was discharged before the stoppage of the train, and was lying on a heap in the ditch, near the track. From a gentleman who was directly opposite where the accident occurred, we learn that the unfortunate boy was doubled up between the oil box of the car and the rails, and in that position he was carried along several feet. His shoes were stripped off his feet and thrown to one side, the supposition being that the feet caught between the rails and were jerked out with great violence. The injuries sustained probably caused instant death, being a dislocation of the neck, a deep wound in the side, and his right leg and arm broken almost completely off. Immediately after the sad occurrence the mutilated remains were removed to the home of his high distracted parents, who were not aware of his presence at the depot. Coroner Moser was called, and appointed a jury, viewed the body and an inquest was held at the Island House, and a verdict of accidental death rendered.

Young Rudolph was a cigar maker by trade, his term of apprenticeship expiring only three weeks ago.—*Morning Herald*, Aug. 11.

Lost and Found.

Mr. Robert Mutschlits, of Millport, Carbon county, lost his pocket-book, containing $75, a note of hand and other valuable papers, on Saturday, at Lehigh Gap. Fortunately a son of Rev. L. K. Derr, of this place, happened to be up that way in the afternoon, and discovered the pocket-book lying along the track of the Lehigh Valley Railroad, as he was passing in a wagon. He jumped off and placed it up, and finding that it was so valuable, he immediately returned home with it to his father, who soon set thrown it in order to learn to whom it belonged. Finding that the above named gentleman was the owner, it was forwarded to him. Master Derr deserves credit for his honesty and promptness under such tempting circumstances.—*Slatington News*.

A TORNADO IN PENNSYLVANIA.

Trees Uprooted, Barns Unroofed and the Crops Destroyed — The Clouds Breaking in Great Torrents Near Dingman's Ferry.

MILFORD, Pa., Aug. 9.—A destructive storm of wind, hail and rain swept over the lower part of this county last Thursday afternoon. About half-past four o'clock two large clouds, one moving rapidly in a northwesterly direction and the other to the southeast, came together over the mountain range about two miles below Dingman's Ferry, in Delaware township. The collision was followed by a terrific report, and almost instantly great volumes of water began pouring down. In a very short space of time every ravine and hollow in the mountainside for ten miles became the bed of a raging torrent of water which swept into the Delaware valley, uprooting large trees in their course, and dislodging huge rocks, which were seen shooting into the flats below. Hundreds of acres of corn and buckwheat fields were covered by these streams, and the crops totally destroyed. Miles of fences were swept away, and many cattle feeding in the pastures were drowned.

Before the fury of the rain storm was over, a gale of wind, accompanied with terrific thunder and lightning and a shower of large hail stones, followed in its track. Trees were torn up and carried from a quarter to half a mile through the air, one large chestnut being borne clear across the Delaware river and turned upside down in a corn field in Sussex county, N. J. Barns were unroofed and hundreds of windows in farmhouses shattered. The roof of Squire Van Gaden's house was carried across a tobacco field and lodged in the tops of two large oak trees.

Three children returning home from an errand at Dingman's village passed under trees the storm in a small creek in the woods at the side of the main road. A big chestnut tree was blown down, and fell in front of the speeding horses, imprisoning the children beneath. After the storm had subsided they attracted the attention of a man passing along the road by their shouts. Being unable to remove the tree from the coming he summoned neighbors and after cut the obstruction away and released the children.

The storm lasted about half an hour. Hailstones nine inches in circumference were picked up in the fields and the hail had taken in such large quantities that bushels of it could be shoveled up twenty-four hours after it fell. No correct estimate of the amount of damage done by the storm has yet been made, but it will amount to several thousand dollars.

A similar storm passed over portions of the towns of Thompson and Ararsburgh, in Susquehanna county, N. Y., last week. Its course was in a curve and covered a area of country about half a mile wide. Its track is marked by acres of fallen trees, shattered buildings, ruined fields of corn and buckwheat, and roads so badly gullied and torn up as to be impassable.

Current Events.

—The trial at Beaver Utah, of the Mormons charged with participation in the Mountain Meadow massacre, ended on Saturday in the disagreement of the jury, who were discharged. It is said they stood nine for acquittal to three for conviction and two for murder—for conviction.

—A severe storm of wind and hail, followed by thunder and lightning, passed over the central portion of Pike county, in this state, on Saturday afternoon. In Delaware township the buckwheat and corn crops were damaged or destroyed, and in Potter township several sheep and three cows were killed by lightning.

—The cost of Pennsylvania is given at $125,76,000.00. A small affair.

—Advertises now calm that the world will close its wicked career on the morning of September 10th.

—LONDON, Aug 7.—The Secretary of the Universal Alliance, in a letter to the *Times*, says: According to accounts from Damascus to the 22d of July cholera was raging there. Four hundred cases were reported daily, but the real number was considered. The Christian quarter of the place is deserted. Sudden deaths occur in the streets of the city. There are appalling scenes, medicines or supplies for the treatment of the sufferers. The disease is described as the most fatal Rose Bengal, Bassora and Salonica, and among the Druses. The missionaries are dead, and the churches have dispersed.

—The trial of John Siney, President of the Miners' National Association, for conspiracy in connection with the late strikes and riot in the coal region of Clearfield county, will take place at the September term of the Clearfield county court. The case will be one of unusual interest and will doubtless develop and settle many important issues in reference to the rights of capital and labor. Able counsel has been engaged on both sides including senator W. A. Wallace for the prosecution, and Hon. F. Butler, F. W. Riggles and Lin Barrett, Esq., for the defence.

—The Miners' National Association are this year going to wield the influence of political power they hold in a practical manner. They propose to present before the conventions next week the leaders of each party will pledge to them in the restriction of the mountainous and "no work for those that pass from here," as belongings. We believe this course is more sensible than having a separate convention of their own, for then before organization is a power, which both parties must respect. Better wise to sell out to the highest bidder. A committee of the Miners' Association had a conference with the Democratic leaders at the Wyoming House in reference to Tuesday, but we believe no definite arrangements or pledges were made.

—When Mr. Beecher agreed with the projectors of the "Life of Christ," some years ago, that it would be more profitable to write the work from an orthodox rather than a liberal standpoint he received $50,000 on account, and promised to finish the book in two years. His failure to keep the contract, it is conceded, has led more than almost anything else, to the failure of J. B. Ford & Co., his publishers. "You would be surprised," said one of his church members, in an excusatory way, to a reporter, "to know how tiresome it is for Mr. Beecher to write. He rates the labor at ninety a day, and while he could talk and talk all day of his observations he will be pestered to death if he has to write. He has frequently put off writing for Mr. Ramer until the last minute, and then dashed off something which came into his head just was worth reading because he had to make it. He knows the printers' cr. for 'copy,' for he has written the 'Life of Christ' under the hair-trial prodding of Mr. Ford, and he has often had to write while the messenger had to wait for his manuscript." Mr. Beecher is said to have made another promise to begin to labor diligently on the last third of the second volume of the "Life of Christ" when he returns in the fall.

—The *Montgomery American* says it understands Jeff Davis will be invited to deliver an address before the Montgomery County Agricultural Society, at the Fall exhibition.

—An amusing trial took place in Quincy Illinois, last week. A man named Murphy found a nest containing six young mocking birds, which he took home with him. Five of them having died, he took the sixth back to the nest, in hopes the old bird would feed it. Soon after words it became of sufficient size to fly, and flew into a blacksmith shop to mourn to a man named Scrivener, who picked the bird up and retained it in his possession. Murphy, learning where the bird was, at once got out a writ of replevin, so the bird was brought to court, where it attracted considerable attention. A verdict for Scrivener was finally given. The bird is valued at about one dollar, and the costs have already reached twenty times that amount.

—The statistics of Sunday schools submitted at the International Sunday-school Convention, show that 11 mole is the third State in the number of its Sunday-school pupils. LOCAL AGENTS WANTED!

AN AGENT WANTED FOR EACH TOWN AND COUNTY IN THE UNITED STATES.

Parties desiring to act as agent's, must accompany their application by a letter of recommendation as to character and responsibility, from and signed by the Editor of a newspaper published in the town or county for which agent proposes to act. The agency is to sell the bonds of the *Industrial Exhibition Company*.

Whole Bonds $20 each.
Half " 10 "
Quarter " 5 "

The Industrial Exhibition Company will furnish agents with Circulars, etc., etc.

Each newspaper published in the town where agent is located, will, as soon as agency is established, be given an advertisement, advertising such agency and the Company, and fully explaining the plans, purposes and objects of the Company. Such advertisement will continue in such papers, as long as agency is successfully conducted.

The Industrial Exhibition Company is the first to adopt the plan so long in use by the European Governments, of issuing bonds when the principal is made secure and not risked, but where there is a chance for a large premium, an investment of $20 is sure to return to the investor $21—one dollar more than cost—and the holder of a $20 Bond, may obtain a premium, either of $50, $100, $250, $500, $1,000, $2,000, $5,000, $10,000, $25,000, or $100,000. The interest, which is ordinarily distributed to all the bond-holders pro rata, is in this loan distributed by chance. The purchaser of a bond knows he will receive back his investment, with a small rate of interest added, and in consideration of taking this small rate of interest, he has a chance in the above named premiums which are simply the distribution of interest on the whole loan.

Each bond participates in four drawings each year, until it has drawn a premium, when it is surrendered. The premium paid and the bond cancelled.

The Industrial Exhibition Company, under a special charter, granted by the State of New York, is given authority to issue these bonds. The Legislature of the State, recognizing the great benefits which will arise from the success of this enterprise, have exempted all the real estate and property of the Company from taxation and assessments for five years, and has also conferred other great privileges.

Every American who understands the purposes of this Company will, of a necessity, feel a pride in aiding it to a successful termination.

Each individual who buys a bond becomes an owner and an interested party, and when he views the structure erected with his money, can say, "I aided to erect in our country, the most magnificent building the world has ever seen, a palace, which, in truth represents the industry, energy and mechanical genius of the American people."

The manufacturers and inventors of America are peculiarly interested in the success of this enterprise, for the reason that it is to be their home, where all their inventions and manufactures can be exhibited and sold.

The building will contain 3,323,000 square feet of space.
