A very destructive anash up occurred on the from Alientowe, on Monday noon, between a passenger train and a coal train. The following particulars we clip from the Morning Herald of Tuesday: "At the point where the accident occurred it is the practice for the coal train due there at 12 o'clock to ran on to the viding and then wait until the passenger train has passed. Yesterday it happened that the coal train was Yestorday it happened that the coal train was a little late, and just as the enguse was crossing the switch, the passengers train came screeching along at full speed and collided square with the engine of the coal train. The flagman statio-ed there is obliged to flag the passenger train if the coal train has not yet passed, but on this unfortunate occasion he neglected to do it, and the result was as above stated. The wrock is a very disastrong one the passenger and coal cars and the engine of the coal train being completely demoistled. It is wonderful to relate that the passenger, of which it is estimated there were over one hundred, caped serious accident the only person injured (slight) being the Rev. Rutenhouse, paster of the Stone Church. He was wedged in between two seats and severely pressed, the filpries sustained teste they had right shoulder. When the two boomotives were within a few sect of each other, the engineers, firomen and turkeassen, jumped off and ought, stoly by flight formats in was for ought. 

The Coal Trade.

The authracite coal trace is quite active, and steaduly, wook by week, is the decrease ou last year's production lessened. It is now within 1, years production leasoned. It is now within 1, 109,160 tons of what it was at this time last year, and if the demand for consumption holds we shall expect the present year's tournage to equal that of 1874. The following are the announced prices of the Lobigh and Wilkesbarre Coal Company's cost, free on board, at Port Johnstows, for the month of September, the company in its announcement residenting the right pany, in its announcement, reserving the right to change the same at any time, except on con-tracts made prior to such variations: Lump, to 25; steambout, \$5 15; broken, \$5 20; org. \$6 60; stove, \$6; chestrat, \$6 10; and chestant No. 2, 94. The coal tirms drawn on August 3d by the Schuylkili Coal Exchange to furnish the average prices of egol sold in July, by which to determine wases, were the St. Nicholas Coal Company, the Minchill Gap Colliery, the Tunnel Ridge Colliery, the Gilrard Colliery, and the Big Minc Run Colliery. The average was found to be \$2.5%. The rate of wassa, based on this average, for August, will be two percent above basis of 1874. The proposition of the Philadelphia Coal and Iron Company, noticed last week, to furnish to all furnaces in the Schuyikill region now out of blass all the raw material and take the product of their bands, paying for the coal of manufacture, we understand meets with ravor, and if carried into effect will make a near market for a large quanity of coal annually by supplying it to those furnaces along the line which accept the company's proposition, and as it is in the power of Company, the Minchill Gap Colliery, the Tun pany's proposition, and as it is in the power of the company to keep them running the year round, by purchastus all their product, it tams naturating no small amount of trade during dull as well as busy seasons. The proposition is to supply the furnaces with coal, are and lime-stone, to be converted into pig from for the company at prices which leave a mergin of profit for the furnace man without reference to the state of the market. Negotiations, we under-stand, are now on foot to operate a number of furnaces on this plan.-Palla, Ledger, Aug. 30 The following table shows the quantity of cost shipped over the Lebigh Valley itailroad for the

-On Monday last, as the passenge train arrived here at 11:45 A.M., bound north, it was discovered by the car and wheel inspectors that passenger car No. 34 had a loose wheel, and deemed it wise to have said car detached and shifted on to the siding. The passen-gers in the car were notified of the bad condition of the wheel, and requested to take another car, which requested to take another car, which request was promptly compiled with. Engine J. G. Fell, which was attached to the train, was in the act of shifting No. 34 car, when it jumped the rail at the first frog below the switch above the depot; th ear kept the bed of the road until it ap-proached the switch, when it took a sheer to the left carrying with it the switch shanty and completely demolishing the switch, tearing up a great por tion of the road bed, and precipitating itself over a stone wall some 25 to 30 feet in altitude, it turned completely over in its descent, and remained inverted on the tow path below. No. 34 car in its descent drew baggage car No. 129 half-way over the wall, when the stress must have been so great as to aever completely the gearing from each car, saving said 129 baggage car and probably the lives of the several baggage-masters who were it. When the car was seen to go over the wall by the guests stopping at the Mansion House, the cry was raised and stread from cor-ner to corner throughout town like wildfire; our citizens were all excited and on the run to see who were the unfor-tunate ones, and if they could render any succor and aid, but eventually to hear "that all was well—nobody hurt," to which you could hear them add, "thanks be to God for it!" Your reporter was likewise excited, and dashed off on the "fly" for the scene of the disaster, to glean whatever news be could of the accident, but could learn

The Industrial Exhibition Company is the first to adopt the plan so long in use by the Eunest to adopt the Dian so long in use by the Eu-ropean Governments, of Issuing bonds when the principal is made socure and not risked, but where there is a chance for a large premium, an investment of \$20 is sure to return to the inves-tor \$21—one dollar more than cost—and the hold-er of a \$20 Bond, may obtain a premium, either of \$60, \$100, \$2.0, \$500, \$1,000, \$2,000, \$6,00, \$10,000, \$22,000, \$200,000. The pulsers, which is con-\$25,000, or \$100,000. The interest, which is ordi-narily distributed to all the bend-helders pro-rata, is in this lean distributed by chance. The rata, is in this loss distributed by chance. The purchaser of a bood knows he will recieve back his investment, with a small rate of interest added, and in consideration of taking this small rate of interest, he has a chance in the above named premiums which are simply the distri-bution of interest on the whole loan.

Each bend participates in four drawings each year, notil it has drawn a premium, when it is surrendered, the premium paid and the boad cancelled.

The Industrial Exhibition Company, under a special charter, granted by the State of New York is given authority to issue those bonds. The Legislature of the State, receptizing the great benefits which will arise from the success of this enterprise, have exempted all the real es-tate and property of the Company from taxation and assessments for five years, and has also som-ferred other great privileges.

Every American who understands the pur-poses of this Company will, of a necessity, feel

a price in aiding it to a successful termination. Each individual who buys a bond becomes an can say, "I aided to erect in our country, the seen, a palace, which, in truth represents the industy, energy and mechanical genus of the

American people." The manufacturers and inventors of America are peculiarly interested in the success of this enterprise, for the reason that it is to be their bome, where all these inventions and manufactures can be exhibited and sold.

The building will contain 5,320,000 square feet Purchasers desiring Bonds before an agency

is established where they reside, will communicate direct with this office, from where they can be supplied. Parties de-iring to set as agents, or to pur-
