This hotel is certainly the most comfortable and com-plete in the city. Situated in the midst of the wholesale and retail business houses, and convenient to all the places of amusement. Since the Exhibition the house has been thoroughly renovat-ed; the frescoing is beautiful, while the bew carpets and painting generally add a obserfulness scarcely to be imagined. Mr. G. W. Mullin has admitted his son. Geo. K. Mullin, and Edward L. Bean, of Fort Wayne, Ind., to assist him. In the future the firm will be G. W. Mullin & Co. The house is certainly deserv-ing of patronage, as it was the only one which did not raise the price on ac-count of the Centennial, and endeasored to extend the same comforts, as it has previously, to every one. -Wednesday, at Trenton, Chancellor Runyon appointed Judge Lathrop, of the New Jersey Court of Appeals, re-ceiver for the Central Raliway of that State. Thus ends this matter, after much contention and delay. The ap-plication for the appointment had to be made in New Jersey, and as no outside creditors were in condition to seek relief through the courts by the intervention of a receiver, it was necessary to have the co-operation of the company in the application. It is hoped that the step taken may result to the benefit of all parties having an interest in the management of the company's affairs.

## Letter from Manch Chunk.

February 16th, 1877. " To every thing there is a season, and a time to every purpose under the heaven." as Solo-mon, the wise, has it, and that there is " a time to get and a time to lose." none who are left with planty of L. & W. Coal or New Jersey Central R.B. stocks to mourn over, will for a moment dispute, however much they may cis-like the latter clause. And yet they may tank their stars that the situation is no worse, as it would be had President Knight's demand for an additional three millions been responded to. To say that anybody felt surprised or greatly grieved when it became generally known that then L. & W. Coal Company and its parent, the C. Alt. of N. Jersey, had passed into the k-mus of recovers, would be far from telling the truth, as nearly everybody considered it in tas light of good joke rathet than otherwise; besides, but hitle of the stock being seld here, and that hitle pretty well divided, the loss to individual Chut kers is comparatively small. That the Chui kers is comparatively small. That the sympathies of the public are with the L. & W. Coal Company to a greater extent than they are with the Central RR. Co., is but natural, since the latter is, at least, but a foreign corporation. while the former is a creature of this state and neighborhood, with a majority of its officers resident in the coal regions. Besides, the collayse of the i... & W. Coal Co.. to whom we are indepted for so many improvements, is really a very sad affar, and now that it is scent to vanish from the stage, regret at its untimely end is apparently universal-1, at least, have yet to most the first individual was didn't say "I am sorry it has come to this." And it is to strikes, more than aught else, that its unisfortnose are astributable. Let hun who soubts it look over the Central RB, rep. rt for 1573, and he'il be the Central B.B. rep. rt for 1575, and he'ii be antasned with the truth of my assertion, aitho' I do not chint that then affiles of the Coal Com-pany might not have been more economically adminutered. But then we must consider that when the L. & W. Coal Co. was first formed the coal t.affic sum still out of the best paving brancoes of industry, and this being so, econo-my was considered as of ittle account; and that inter, when thus grew worse, and economy the most ruled was enforced is was too late to re-nar the mischief airs of other. On the whole most rush was caloreed, it was too late to re-part the micebief size of done. On the whole it appears to be conceded that the gentiemen connected with its management intended to do the cest for all concerned, and that the failure of the Company is altogether due to a combina-tion of untoward circumstances entropy beyond their control. And with this we may dismiss the coal company. Now with regard to the Jersey Central, this

aymrathy, as sireedy instated, does not exist, but in its stead great anglest concerning the future of the L & S. B.M. in regard to which many, and among them some of the most indi-forms associations are indulted in ; the Balti-more & Ohio, Penna, Contrai, Lehigh Valley. and even the impocusions P. & R. R.R. Com-pany being montioned us the y to be its future owners or lessers, and all of whom would be about as likely to desire the control of a read m this locality as they would cover the monopol of an air line to the moon. Bosh 1 But the best joke of air is to listen to the idio threats of par ties in the Jersey interest who openly predict Lies in the Jerney interest who openly predict a most releasting warfare against the Lehigh Valley RM. Co., who according to them, is not only responsible for its sad reality of the pres-ent but will be re-ponsible for all that may you result from Jersey Central timerity or misman-agement, "Now," they say, "we've got them but in a longer compelled to care about divises, we shall be able to carry coal and freinith at a we shall be able to carry coal and freight at a much lower rate than the road across the river, and we shall do it. Revenge, you know, is sweet." But that this part of the road is only cased, that the greater part of the losses sus-tained by the Jersey Contral were incurred in operating the mines and this end of the ime, and the Central R.R. Co. is even now largely in arrears to the L. C. & Nav. Co., does never for a moment occur to them. but being facts, and the latter being " stubborn things " to get over, their threats must be accepted for what they are worth. Yours, etc., \* are worth.
