

Obituary. Rear Admiral L. M. Goldsborough, who died at Washington early Tuesday morning, was born in that city, February 18th, 1805. He was appointed midshipman in 1812, and in 1825 was commissioned as Lieutenant. While serving in the Mediterranean squadron, in 1827, he commanded a successful night expedition to recover an English brig from Greek pirates. He was executive officer of the Ohio at the siege and capture of Vera Cruz, in 1847, and also commanded a small expedition which captured the town of Tuspan, 150 miles north of Vera Cruz. He was superintendent of the Naval Academy from 1854 to 1857, and afterwards commanded the frigate Congress in the Brazil squadron. He was rapidly promoted during the war and became Rear Admiral in 1862. He commanded the naval forces at the capture of Roanoke Island, in 1862, and in March of the same year he captured Newbern. Two months afterwards, having succeeded and passed the rebel works at Sewell's Point, he captured Norfolk, Va. At the close of the war he was the first to carry an American Admiral's flag to European waters. He has since served as commandant of the Mare Island and Washington Navy Yards, and of the Asiatic fleet. In 1873 he was placed on the retired list, at his own request.

Rev. Father Keenan, pastor of St. Mary's Catholic Church in Lancaster, Pa., who died on Monday last, was born in the County of Tyrone, Ireland, and was early designed by his parents for the clerical profession. He began the study of the classics in the seminaries of his neighborhood, and as soon as he was qualified entered the college of Dunganon, where he remained as a student for four years. He was then engaged as a teacher in the institution, and thus occupied for the next seven years, having been the first Catholic who had been known to be employed as a teacher in the Protestant College of Dunganon. Having resolved to leave his native home, he purposed going to France, but, as the Right Rev. Bishop Conwell was then on his way to London, to be consecrated Bishop of Philadelphia, he accompanied him to Liverpool, where he remained until the Bishop returned, and thence sailed with him to the United States. They landed at Baltimore, on the 21st of November, 1820, and from thence proceeded to Philadelphia, where Father Keenan was ordained Priest, having been the first priest ever ordained in the Diocese of Philadelphia. Shortly after his ordination he went to Mount St. Mary's College, near Emmetsburg, Maryland, where he remained until the death of Rev. J. J. Holland of St. Mary's Church, Lancaster, in the fall of 1828. During the period he spent at Emmetsburg he assisted in giving instructions to young men pursuing their studies, for which his superior attainments amply fitted him. He was appointed by the Bishop of the diocese to fill the vacancy existing in St. Mary's Church, at Lancaster, a position he held uninterruptedly up to the time of his death.

Lo 1 the Poor Mollies!
The Sunday Circular publishes the following resolutions adopted by the A. O. H. of the State of New Jersey, on Saturday, the 17th inst. The Jersey men evidently have little sympathy with the Mollies and their crimes:
First. That the Ancient Order of Hibernians as existing in the State of New Jersey, hereby solemnly denounce and repudiate all connection or affiliation with the abominable association of "Mollie Maguire."
Second. That we solemnly reprobate and condemn, author and abet the murderous actions of the so-called "Mollie Maguire," that we solemnly hope the members of this detestable society, who have become the violators of all law, human and divine, and the shedders of the blood of their fellow men, will be brought to speedy justice and condign punishment for their heinous deeds of violence and blood.
Third. That we call upon our brethren of the Ancient Order of Hibernians, both in their general and state organizations, to follow the example of the order in the State of New Jersey in utterly disowning all associations and sympathy with the abominable body of "Mollies," and to meet solemnly and emphatically condemning and reprobating, abhorring and anathematizing the murderous and diabolical propensities and deeds of this abominable association.
Fourth. That the national board, whose headquarters are in the city of New York, be and be instructed by all the Ancient Order of Hibernians in New Jersey organizations do hereby instruct them to be a rigid investigation into the alleged connection of the order in the State of New Jersey with the so-called "Mollie Maguire," or to have lent them any aid or countenance whatsoever in their detestable work, or to cut off, without any delay, any violators of the principles and laws of our Ancient and Honorable Order of Hibernians, and to press through the public journals our utter abhorrence and condemnation of such affiliation with or countenance of the bloody deeds of murderous "Mollies."
Fifth. That the Ancient Order of Hibernians in all sections of this State, and in every town and village, should be and be instructed to promote good will and Christian charity among its members; to ameliorate the moral and physical condition of the poor; to oppose every effort of civil society to observe or accept of a "Mollie Maguire" church; and to take no means for the accomplishment of any of the above objects, which are approved by our laws, or which are in violation of the laws of the State, and shall stand every test of divine and human law.

How They Make Newspapers.
Says the Boston Globe: A Texas boy, after visiting a Galveston newspaper office, wrote the following composition on "How They Make Newspapers":
"The head men sit down to their desks and write on square pieces of paper what to print in the paper. They put them in a box and send them up-stairs. When they get up stairs a man takes them and gives a lot of other men every one a piece of this paper that is written on. The man that the paper is given to takes the type and fixes them one after another so they read what the paper reads. A man then takes the words and puts them in a box, and places it in some machinery that makes it go back and forth; then there is a boy who stands over the machinery and puts the paper on the machinery, and then some books brings it down over the box with the types in and the types have ink on, and the types print on the paper, there is books that take the paper and lay it on another machine that folds it up and then they sell them. The end."

Allen's Liver Pills

DR. CHANDLER, F.R.S.A.,
Lecturer on St. George's, St. Bartholomew's Hospital, London, Curator to St. Elizabeth's, etc.

THE WONDERFUL EGYPTIAN BLOOD-PURIFIER.
This incomparably DEPURATIVE is a powerful ALTERNATIVE, TONIC, DIURETIC, LAXATIVE, and ANTICATHARTIC, combining virtues which render it invaluable and never-failing, and by its continued use will thoroughly eradicate all diseases of the blood, and in particular those of a purulent nature, and its patients are a purely harmless extraction, the products gathered from remote Egyptian Provinces, and where there is the slightest doubt of disease in the system, it never fails in effecting that disease through the medium of the skin, or expelling it through the many and various excretions of the body.

DYSPEPSIA, GASTRON.
GASTRON is a safe, speedy, and positive cure for that most depressing of all ailments, and a sure and certain means to restore the digestive organs to their primitive strength, and promote the healthy action of the stomach and intestines.

BRONCHITIS AND LUNG AFFECTIONS.
A slight so-called cold will often lead to serious cough, which, if not cured or badly treated, must have but one result—it must eventually in a settled case of BRONCHITIS, or in a more advanced stage of CONSUMPTION. To all suffering from harassing cough and expectoration, TRACHEON offers a sound, reliable, and permanent relief, which will not only remove the cause of the complaint, but will remove the largest tumors of the parts (Piles) by absorption, and many who have received not only relief, but have been cured, and in some cases, have been cured (prior to using this treatment) by eminent surgeons that the only relief they ever could expect in life, would be by an operation, and removing it or them from the body by a procedure which necessitated the knife. This remedy has been hailed with delight, and is now prescribed by many practicing physicians, who are cognizant of its merits, as the only known cure for BRONCHITIS.

PILE. Hemorrhoids. PILON.
Many causes tend to produce this painful and distressing state. The blood is retarded in its return; the too frequent use of drastic purgatives tends to produce congestion of the blood vessels of the liver, and numerous other causes are the source of this complaint, and without remedial effect, has been regarded as the most intractable of all ailments, but will remove the largest tumors of the parts (Piles) by absorption, and many who have received not only relief, but have been cured, and in some cases, have been cured (prior to using this treatment) by eminent surgeons that the only relief they ever could expect in life, would be by an operation, and removing it or them from the body by a procedure which necessitated the knife. This remedy has been hailed with delight, and is now prescribed by many practicing physicians, who are cognizant of its merits, as the only known cure for BRONCHITIS.

THE ABOVE REMEDIES ARE
thoroughly tested, and are of the highest quality, and are the result of patient, searching, laborious, and scientific investigation, embracing a period of many years, in Europe and America.
