-The price of potatoes is about as variable as the whims of dealers choose to make it. We have, during the past week, heard of them selling at 40 cents per peck, and all the way down from that price to 19 cents. Why can't our dealers make a uniform figure, as they do elsewhere. In Scratton and Easton they sell at 75 cents per bushel. Why not here?

—During a short visit to Weatherly, on Monday last, we dropped into the popular restaurant kept by our young friend Walter Kline. Walt. keeps a tip-top place and is chock full curiosities, comprising stuffed birds, preserved bugs and moths, a four legged chicken, and a variety of mineral specimens, altogether, forming, quite a measure. together forming quite, a museum. -On Saturday, Aug. 4th, a grand military review and parade is to come off in Catasauqua, in which the whole of in Catasauqua, in which the whole of the Fourth Regiment of the National Guard of Pennsylvania, compfising the military of Lehigh, Berks and Northampton counties, will, it is expected, take part. The display as a whole will be a fine one, and we have no doubt an immense crowd of people will be drawn together to witness it.

-The "dog days" commenced July 6th. This season which we believe lasts six weeks, is regarded by many persons as more unhealthy than that which immediately procedes or succeeds it, and as being a time when mankind are more liable to attacks from disease from exposure or imprudence in their general dabits. If there is no foundathabits. If there is no founda-fact for this belief, it is a supertion in fact for this belie station of long standing.

-A quartette of our young and feslive sports made a fishing excursion to Lizzard Creek, over the Manoning shountain, on Monday fast. Their departure created quite an excitement; as they were in such a hurry to get of that they could not remain if the stable long enough to hitch up, but accom-plished the feat while on the "go;" this bycause there was a dollar's worth of lager beer on the result of the face to the fishing grounds. But one party came to grief on the mountain on account of a baulky horse, and had to fork over for the beer. Result of the day's sport: 12 very poor, blind sun-nies, a good deal of fun, and a very littie more lager.

The object of conferring the degree at this time was on account of Mrs. Dolleymayer being about sailing on an extended trip to Germany, and was desirous of taking the degree before her departure.

Letter from Mauch Chunk.

MADCH CHUNE, July 12, 1877. trastores continues dell as ever, Indeed, no body appears to be doing anything; bence all have plenty of icisare to talk about Mard times with their neighbors. Our hotels are in a man ner deserted as most of the arrivals are cobfined to city drummers, who, just now, don't find this town a very profitable field as most of our merchants are operating cautiously, car-rying but light stocks. What few strangers find tonir way hither to see the sights, depart mostly as soon as they have made a trip over the Swiich Back or visited the Glen, or both, to do which never necessitates a long stay. They come and go like birds of passage and leave but

ittle money here.

The same thing pppitted to Summit Hill, only that it is worse there than here People being at wors, the town looks deserted during the day and presents but little life at night. The men. reduced to a mere pittance, look and and de jected; merchants carry small stocks, and, though the mojority of them are still doing business on the ruinous credit system, customers appear to be wanting even at that a fact which would seem to indicate a very general disposition to economize.

The Pertolette Bifles are having their regul lar weekly drills and, in the course of time, promise to make good soldiers. Mr. Narian Klotz, who presides over the destinies of the Eagle House, and "Big Simon," who keeps the crack restaurant of the place, are probably the only ones among the caterers of the town who still do a small paying bu-iness; and field proprictors are as full of practical jokes and deviltry as ever, "Uncle Nathan" telling as many side sputting varue, and "Big Simon" expansating as loudly on the virtues of "fine Milwaugee"

as heretofore.
The force at the Lansford shops is probably the smallest ever employed there, but two noulders being at work in the foundry, where in times past they could be counted by the scores. The potato crop promises to yield largely, and it really does one's eyes good to be-bold the many well-tuled gardens and truck atches in that vicinity.

In the rising borough (Lansford) things are

is duil (if not more so) as at the Summit. On last Saturday evening some cvil-disposed erson failed in an attempt to fire Erisim's carpenter shop, adjoining Friedman's store-house. Had the fire not been discovered in time, it would certainly have destroyed both Sundings. When the fire was extinguished it was found that the attempt to bure the proper

ty had been made with a number of large amp vibus scaled in kerosene. Attempted a few jours later it might have succeeded. The affair has created quite a gossip. In so far as building enterprise is concerned,

there is still some little doing in the neighbor hood of Lansford—in fact more than I've no ticed elsewhere; Mr. Bristin, who now seems to be in general favor, doing most of the Jobs. The affairs of the Fidelity Building and Loan Association are said to be in a prosperious conlition, and, norwithstanding toe stringerty of the times, the Association expects to be able to wind up at the time anticipated, which speaks well for Mr. Marcy, the faithful Secretary and Pressurer. Having lost a considerable amount of their deposits by withurawals, toe himers' Saving Rank is scarcely doing anything in the way of discounts, but the institution is repre-

sented as strong as any hereabouts.

And now for the latest sensation—fraud in the
East Mauch Chunk post-office, by which the
postmaster is said to have a vindred the department out of about \$800 annually; for be it known to you that the post-ofice of that place was a salacted ous, rated at \$1.00 per annum. To constitute it such the postmaster would draw stamps from the department and dispose of them elsawhere at a discount. which, while enabling firm to bring the business of the office up to the required standard to constitute it a salaried office, was not only to the injury of the Government, but also injured the offices in the city of cities in which these stamps were sold. However this may be, it enabled the "high cockslorum" to make the office pay him at a loss to the Government. As early as last November the writer had an inkling of this matter, but refrained from mentioning single in relation ibereto on the assurance of a genileman con-nected with the department that it should re-ceive proper attention. The consequence was that the postmaster was shadowed by a desective and the swinding operations plain ly es,ablished. Causht in the trap set for him, the pos.master resigned; and the business of the office is now conducted by a deputy, a though strong efforts are made to continue the office under the same management by having one of the family appointed to the succession It remains to be seen whether Rutherford R.'s Postmaster General will dure to appoint one of

Dangers of Country Spaiking.

On Sunday evening last a certain farmer residing about a mile from Trex-

lertown went out to shut a gate that had been left unfastened, and while passing near the barn, he noticed that one of the duors was open, and also the form of a man walking near it. These circumstances led him to suspect that something was wrong, and he accordingly called a couple of dogs and hissed them after the intruder. The chap left suddenly, running like a race-horse, his coat tails standing out straight behind. The dogs were close up, and their furi-ous yelping caused him to redouble his exertions, and to get up a speed almost equal to that of a lightning express train. The chase continued several hundred yards, when human fleetness and bottom proved too much for canine swiftness, and the fellow managed to get off safely, without a scratch or a "bite." The farmer on getting back to the house discovered that his visitor was no thief at all, but only a beau that his hired girl had brought home from "singing school" to "set up with." Of the farmer regretted his hasty action in the case, but he could not help laughing when he thought of the agility displayed on the occasion by that de-

parting young man .- Allentown Dem-Hanged, & now Declared Innocent.

The Coal Trade.

anthracite coal trade is not in the cheer, fal condution that we could wish, but the out-loos, we think, affords signs of evecuragement. Though the production has falles off a little within a week past, in consequence, probably, of the festivities attendant on the celebration of the "Fourth," we learn on all sides of an activ demand for coal for this season of the year. The quantity at Port Richmond is considerably less than is usual on the first of July. The shipments from that point exceed the daily receipts, and the Readins Cool and Iron Company is tax, ed to supply the demand for almost all the ed to supply the demand for almost all the several sizes of coal except chestrois and pea coals. Similar rejects come from most of the coal contres. An important inquiry is this compecting is, heather an interest of the coal contres. An important inquiry is this compecting is, heather an interest of that marketed into your to the same time some into consumption or has it ocen pulsed saw? If the former, and the coal thus far marketed has been used, then it marketed has been used. The print and similar trade will be carried into and livrough the closing months of the year, It the last for, that it, if the coal has been stowed away for future use, then the active trade of the year thus far may have lempted purchasers to buy early, but the opinion of the best informed in the trade is that the usual propertion of production thus far has gone into consumption. The coal consuming sizes of the country has been very consuming sizes of the country has been very consumerably increased, and new markets created if the establishment of coal depots, where authrances as the has hepefore been comparatively unknown. This movement has of it call withers we a true protein of the two and ion tons of excess. There is, there is the two and is the own of the year. --The American People.—No peo-ple in the world suffer as much with Dyspepsia as Americans. Although years of experience in medicine had failed to accomplish a certain and sure remedy for this disease and its effects, such as sour stomach, heart-burn, waterbrash, sick headache, costiveness, pal-pitation of the heart, liver complaint, coming up of the food, low spirits, general debility, etc., yet since the intro-duction of Green's August Flower we believe there is no case of Dyspepsia that cannot be immediately relieved. 30,000 dozen sold last year without one case of failure reported. Go to your Druggist A. J. Durling, and get a sam-nie bottle for 10 cents and try it. Two doses will relieve you. Regular size
