There is no anticipation of very high prices, but the prospect is fair for a good, steady themand at living prices. In fact iron men who best understand their business, say they do not want a return of the old war prices, which would only serve to stimulate furnace building, increase competition, and prepare for another disastrois season of poor prices. *Slow but sure' is becoming a valued motto among the wise iron men."

mnage, against the wishes of the operator finding outlet and a market over his road If any want the use of his curw and his read, he thinks, under his charter, he is bound to furnish the one and yield the use of the other, but to the extent that the Lehigh Valley operators may agree to limit product-ion and to otherwise conform to the terms of the proposed combination as they may be agreed upon, he will personally lend the matter his cordial and. In other words, he will do what he can to further the wishes of his customers in any arrangement they may agree upon, and in confirmation of this he has given the other members of this proposed agree upor, and in confirmation of this he has given the other members of this proposed combination his promise in writing. The only remaining point likely to invite dis-cussion and lead to delay is the amount required to be put into the pool by each party to the combination. Some of the number think it inconveniently and unne-cessarily large. Two thirds of the sum suggested in the published online of the agreement it is thought would generally be more acceptable. As this, however, involves no principle, it may be readily adjusted, with an interest so large and distinction of the side of such an arrangement as will remove loss and ruin the constitution of the thing seems probable. In view of such probability the losing prices of anthracite cal have been advanced in all, since the discussion of combination, probably one dollar per ton. In this connection the *Engineer and Mining Journal* gives currency in the statement " that the backs, particu-larly the Philadelphia banks, are pressing the companies forward into the arrangement with the hope of being able to fillead the paper, more or less connected with the coal trade, with which they are loaded down." So long as the subject matter of an arrange-ment between the several companies has been nearly at a stand-still, and it is not likely to quicken much until the matter is

been nearly at a stand-still, and it is not likely to quicken much until the matter is definitely settled. Some few dealers, infer-preting the consumation of the project as reasonably certain, have made purchases at recent very low prices, and if right in their concetures on this point they will no doubt make on their operations. In any effort, in does not see possible for them to lose, as coal cannot be produced at prices lower than those which they have purchased at, and if there is no further market at present prices mining must stop, and that of itself must probability, however, is that some sort of an arrangement for the protection of all parties to the trade—producers, carriers and commens—will be advantaged, the two former in obtaining living prices and the latter by having a steady supply of stock to purchase from at prices within reasonable limits. The Reading Railroad Company and the Reading Coal and Iron Company by their respective boards of mangers, on Saturday advanced their freights and tolls 25 cents per ton and the price of coal for chimmon from Park Richards as a store of coal for chimmon from Park Richards as a store of coal for sturned and from Railes and the prices of coal for chimmon from Park Richards and the Saturday advanced their freights and tolls 25 cents per ton and the price of coal for shipment from Part Richmond 50 cents per ton. The other companies have made cor-responding advances. The only other it in of special interest during the week is a blow at the Brotherhood of Locomoti*e Engineers from the Delaware Lackawanna and Western and Lebigh Valley Railroads, which have issued a notice that no member of that organization or of the Trairmen's Union will be retained after the opering of the new year, thus proposing to make strikes as diffi-cult as possible.—Ledger, Monday. I have tried to preach the trath and denounce sin, and shall continue to do so as long as I am permitted to stay—no matter in what am permitted to stay—no matter in what form I see it. Truth must prevail, and shall trimingh over all error. The day is not far distant when Truth and Idberty will put forth her aceptre, and the inhubitants of Packerton will touch it and be free. May the friends of truth that spent the evening here, and all those that contributed towards the donation, he blessed of God in their basket, and the hands, that shock with a good hard shake, be alwaye pressed with the dimes of earth and their pockets burst out with the weight thereor, and hearts overflow with love for God and his cause. He had been a sufferer of teiter aid consumption for some time, but bore it with christian patience, until on Saturday aftermoon of hast week, when death releved him of his earthly suffering. Through his death the church has lost one of its best ntembers, and the sent he so regularly filled is now vacant. Let the family he has gone before, how in submission to Him "who doeth all things well." He leaves a kind wife and 12 children to mourn their loss. The family, in this their sad bereavement,

The Manly (1) Art.

For several weeks past great proparations have been making for the pagilistic en-counter between two price tighters of noto-rioty in the coal regions—Billy Maddea and Mart France. At an early hour Saturday Mart Franze. At an early hour Saturday morning sporting men in gangs were seen-moving toward the old Greenwood coal prokers, near Tamaqua. At 8 o'clock the ting was formed, the two men stripped, and he fight began. Ten rounds were fought, Frazer got in the first blow on Madden's aw, but the latter replied with a stunning low on Prazer's nose, drawing first blod. The next eight rounds were fought very tubbornly, both men being severely punish-d. In the eighth round some one crited. stubbernly, both men heing severely punish-ed. In the eighth round some one cried, "Foull" and trouble ensued. The distur-nues was checked by the referee, and the fight proceeded. When the tertil and last fight proceeded. When the tertil and last round began the spectators closed in and pressed against the ropes. Both men were exhausted. Frazer was first to the scratch, Madden feed him and struck bits a terrible blow between the cycs. Frazer returned the compliment with a blow on Madden's shoulders. The men then clinched, and the crowd yieled and pressed the ropes till they should era. The men then clinched, and the erowd yelled and pressed the ropes till they broke. The scenes that enneed was inde-scribable. The men faught in a small space, pressed on all sides by the spectators, who were veiling lustily. Suddenly the cry of "Police!" police!" came from the crowd. The bottle helders dropped their jugs and scampered. The referee gives the signal for a gueral stampede by leaving the ground on a dead run. The pugliets were forced apart and drogged off the field nearly ex-hausted.

The Coal Trade.

The coal trade and all coal movements have been a good deal unsettled the past week. The principal sobject matter attract-ing attention was that of the contemplated have ing attention was that of the contemplated combination of the several principal pro-ducing and coil carrying companies. At the meeting, nevering to appeintment, on Thursday last, of the representatives of these several companies, little was done beyond talk and a general conversation as to the feelings and opiniens of each. Sufficient, we unierstand, was developed in this free conversation to warrant the assertion that all the several nucleis fivor the source idea. universation to warrant the assertion that all the evenal parties favor the general idea that coal production 5% the future must be imited to the domand of the general market, or that the traite most animately affer a widespread hankruptsy. A committee was appointed, convexed of Messrs Goven, Disson and Sayre, to gather the sense and desire of the several companies in the matter, and to embody the same in a report to a general marcing to be held at New York to morrow. Meetings to this end, we under-tand, have been had with the operators in the several coal regions, and the facility is a source of the several companies to do comething that will be effectively protecting the great coal interest, on which so many other interest depend, so far se we are do to barn, the only point of treable, if there would be any trouble at all, is with the bally de any trouble at all, is with the bally de any trouble at all, is with the bally de any trouble at all, is with the bally de any trouble at all, is with the bally Marker is indiposed to take any efficial action towards group and its president.

A committee consisting of Meases, Dickson, A committee consisting of Measrs, Dickson, Linderman, Clark, Hoyt and Gowen was appointed for the purpose of determining to which companies the coal shipped over more than one road should be charged and of reporting to an adjourned meeting, to be held on the 27th inst., the several quotas of the respective interests.
