Powder Mill Explosion.
The country for many miles around Gunneystown, a small village about twelve miles northeast of Pottstown, was thrown into a state of intense excitement about 9 o'clock Tuesday morning by a very loud report, which emanated from the powder mill of Miller & Brother, about one mile from the above place. The explosion, which occurred among the chemists of the glazing room, was of unusual violence, and is supposed to have been the result of spontaneous combustion. The mill, which was a rude frame structure, was completely demolished. With one exception all the men employed in the building escaped without injury. William Swartzley, about twenty years of age, who was working in the glazing room, was thrown a distance of about fifty feet. Though terribly injured, strange to relate, the young man was still living at the latest accounts.

Central Railroad of New Jersey.
We are glad to learn that the reconstruction of the Central Railroad Company of New Jersey has progressed so far that the committee in charge of the scheme regard its success as assured, and are considering the remaining measures necessary to take the company out of the hands of its Receiver, and restore it to those of the stockholders. This is encouraging news and will be most welcome to many of our readers interested in the company. If it shall prove true, it will be one of the few companies ever ceasing from the hands of a Receiver to those of the shareholders. The trustees selected for the new funded mortgage bonds are John S. Kennedy, J. Edgar Johnson and J. D. Vermilye. John Taylor Johnson has many friends who desire to see him replaced in his old position as President of the company; but, on the other hand, a large number of the stock and bondholders, mindful of their unfortunate experience under the management of Mr. Johnson and his former fellow directors, are advocating a general change. They say that the present Receiver, F. S. Lathrop, has been so satisfactory to them in the administration of their property that they would be glad to have him accept the Presidency, with a new board of directors who would act in harmony with him. As the election of directors has heretofore taken place in May, the question will probably soon come up for decision.

Shenandoah.
The Shenandoah Herald says that the American flag which Jack Kehoe spat on at the public meeting held at Audenried, June 14, 1862, the same date that Frank Langdon was murdered, is now in Hazleton, the property of an organization who claim that no price can purchase it from them. It is a hunting flag about 4x6 feet, home-made, on a staff of oak twelve feet in length. The flag is in good condition and the colors bright, and although frequently insulted in those days of treason, was carefully preserved, and placed in hands who will not see it insulted again.
