

The Broad Top Railroad. In 1853 he was elected County Surveyor of Huntingdon county on the Democratic ticket over the nominee of the Whig party, and served until 1857. He served as one of the clerks of the Senate during the sessions of 1858 and 1859. In October, 1859, he was elected to the House of Representatives from Huntingdon over the Republican nominee. He was several times elected Burgess of his native borough and is identified with the leading business enterprises there. In May, 1875, he was appointed by General McCandless Deputy Secretary of Internal Affairs, and upon him fell the labor of organizing the new Department of Internal Affairs created by the Constitution of 1873. Since his appointment he has given the office his undivided attention.

LEHIGHTON, PA.
SATURDAY, JUNE 1, 1878.

Lieut. R. L. Hoize, United States Army, and Miss Vinnie Ream, the sculptor, were married in the Church of the Ascension, in Washington, Tuesday evening, Bishop Pinkney officiating. General Sherman gave away the bride. A marriage hymn, composed for the occasion by General Albert Pike, was sung by the choir.

We have received the June number of Ramsdell's "Delineator and Fashion Paper," one of the very best books for ladies published in this country. "Butterick's Metropolitan Fashions," will be sent to any of our lady readers who will send their address on a postal card to the publisher, J. G. Ramsdell, 1113 Chestnut street, Philadelphia, Pa.

A new industry is about to be started at Newark, N. J. Two Chinamen there have leased for two years a large factory, which, on June 1st, will be converted into an establishment devoted to the manufacture of Chinese medicines. The Mongolians have been conversed with in regard to the enterprise and state that they are determined to begin the manufacture of medicines for their people, who, they say, use the remedies for physical ailments which are used at home, almost entirely rejecting those which the medical science of the Caucasian has discovered. They propose to sell in the San Francisco market, and have already started a drug store there, but as the drugs must be bought in New York, they saw it would be cheaper for them to manufacture at Newark than to ship the drugs in gross bulk to California.

A French paper, earnestly deprecating birdnesting, says: "A bird's nest contains on an average five eggs, which would, in the natural course, become five little birds. Each little one eats daily fifty flies or other insects, and the consumption extends over four or five weeks. Taking it at an average of thirty days, we shall find the number of flies destroyed by each nest of birds to be 7,500. Now, every fly eats daily a quantity of flowers, leaves, &c., equivalent to its weight, until it attains its maximum of growth; in thirty days it will have eaten a flower a day, a flower which would have become fruit. Each fly [the term is used, we presume, for insects generally] then having, we will say, eaten thirty fruits in thirty days, the 7,500 flies which a nest of birds would have consumed cause a loss to us of 225,000 apples, pears, apricots, and peaches. We commend this view of the matter to the parents of marauding children."

ANTHRACITE COAL IN FRANCE.—The introduction of this great staple of commerce is an accident of the Exhibition, and, if successful, will soon compensate the United States for all expenses incurred in sending goods to Paris. Edward A. Quintard, who represents the Reading Railroad Company, in bringing over a 40-ton railway engine for the Exhibition, freighted a vessel with anthracite coal, which is being purchased in Havre at good prices by the French iron manufacturers for experiment in their furnaces. Of the result of the experiment there can be no doubt; the superiority of anthracite in blast furnaces is well known in America, and it has only to be known in Europe to create an unlimited demand for an inexhaustible American product. This opens a new commercial prospect of inestimable importance, which will make Reading stock "buoyant" and also the spirits of the American coal men. France will want millions of tons per annum.—American Advertiser, Paris.

JEWELS OF THE CROWN OF SCOTLAND.—At Edinburgh, Scotland, some years since, the Jewels of the Crown were locked in a box, that box in another, and so on, until they were supposed to be burglar-proof. They were then locked up in the vault of the castle, there to remain for one hundred years, the keys being placed in a mortar and fired into the sea. Scarce fifty years passed by, and the modern lock-picker opens the vault and boxes without trouble. So the science of medicine, when studied with the aid of chemistry and the microscope, becomes plain and simple, and diseases that were regarded incurable a generation ago, now readily yield to remedies employed by the modern and progressive physician. A decade of years since, and women were taught to believe that their peculiar diseases and weaknesses were incurable; but now hundreds and thousands of once bedridden women in the United States will testify to the fact that Dr. Pierce's Favorite Prescription has effected their perfect and permanent cure.

TOLEDO, Ohio, Dec. 6th, 1876.
Dr. R. V. PIERCE, Buffalo, N. Y.:
Dear Sir—About five years since my wife was taken sick, and though we employed the best physicians in our city, yet she gradually grew worse, so that she was confined to the bed. Every remedy I had tried, or could find, failed to cure or even give relief. At last I procured a bottle of your Favorite Prescription and to my surprise it gave almost instant relief, and with a little perseverance, an entire cure was effected.

Ever gratefully yours,
Geo. Bodey Miller.
