Sesson, and, indeed, is much better than was been done week. The "mystery" now is what has become of the proprietor who suddenly disappeared from Penn Yan. He fitted up a fine printing office and sent out three liunded thousand copies of the first number of pesed to advance his own interests as directly and as largely as possible, without any special effort to injure his neighbor. any special effort to injure his neighbor. This is a good deal gained, as nothing so much furthers legitimate business as close and undivided attention, and each in the coal trade giving all his time to his own affairs will be more sure to prosper than if he abstracts a portion of it to the overdides affairs will be more sure to prosper than if he abstracts a portion of it to the prejudice for coal and tended very materially to re-duce the stock of coal on hand, for which there is a continued good demand at satisfactory prices. The retail dealers are pretty well employed in the delivery of old stocks, the snow obstruction to transportation on the reliroads siding them in this regard. Two indictments against Granville Hentz and George Freeby for larceny of coal were called, to which they plend guilty, and were called, to which they plend guilty, and were cannot to pay fines of \$10 and to 60 days in juil. And for the same offense Edward Foela pleaded guilty in one count, and was sentenced to fine of \$5 and costs and \$30 days in juil.

The Grand Jury found true bills against the following persons who were implicated in the recent Lehigh Valley Railcoad rob beries: J. H. Houser, John and Joseph Fritchman, Frank Wood, Reuben Serfass, Fritchma tornage. The new business which this com-pany new has, of sending Sabaylkill coal by the Beand Brook route to Part Johnson and the Eastern market, opens auspiciously, and will add materally to the usual aggre-cate Schurlkill tomage in winter. Some gate Schnylkill tomage in winter. Some was or three of the more northern transpo-tation companies being interfered with to snow and ice makes it better for the schny kill and Lebigh Navigation Companie Nearly all the producers of coal report full orders and firm prices, thus lessening apprehension of a dull market at yory low prices at the opening of the spring trade. At present there is no disposition on the part of operators to averproduce, and thus to break the market. The estimate is that at least 21 millions of tone of one may be marketed at remunerative prices this current year, which

reason for the strike, we near stated, is not the true one, but the proprieturs of the mines which are stopped do not care to expose the truth of the matter as it really stands. The whole amount of back pay involved was but \$20,000, and was at the time of the strike in actual cuoree of payment. About one-half of this amount has already been paid, and the balance will be as soon as the "pay car" can reach the several points where the pay is due, arriving, probably, at the striking collieries last, at which work may not be im-

of the coal regions, but where attempted will prove healthful revulsions injuring only the strikers.—Ledger Monday. The following table snows the quantity of salphed over the Lebigh Valley Redread to week energing . S. 873, and for the yea compared the same time in tyear. Regions From:

The attention of the people of this town and county is specially called to the number of deaths reported in the papers from that dreadful disease consumption. In fact, this disease is reported to be constantly inmortality list, and all caused by not breaking up a slight cough or cold as soon as it appears, which can be easily done by using Hale's Honey of Herchound and Tar, an article which was discovered by the late Dr article which was discovered by the late Dr. Hale, a celebrated physician of Europe, and used in his private practice for many years with great success. The present proprietor, believing this market required just such an article, has purchased the same at a large outlay, and is preparing it according to the original recipe. And those who have used the action who have used the action who have used the action who are thousands consider it.
