—The water has been turned into the Lehigh Canal, and on Wednesday the large number of boats in the vicinity of the Weisport boat-yard were fully aloft, and the canal having a full head of water, and the boats were actively engaged in putting the boats in order for the spring and summer work. In that vicinity everything was wearing an exceedingly lively and stirring appearance. A large freight business is expected to be done by the canal this season, and a number of new boats have been added to the different lines. W. C. Weiss, Esq., is actively getting ready the New York and Philadelphia lines, and expects to begin to start the boats on their missions about the first of April.

—Messrs. Wm. Behler and Dan. Krieger of Franklin, have leased the Fort Allen House, owned and now run by Mr. Joseph Feist, Mr. Behler formerly kept the Franklin House. The new proprietors will take possession of the Fort Allen House the first of April. The house has something of a history. It was erected 22 years ago by the late Edward Weiss, on the site of the fortification, early settlers of Weisport sought to defend the house. The house is four stories high, of brick, after the Elizabethan style of architecture, and contains 32 rooms. Mr. Feist expresses an intention not to go into business of any kind, involving capital, at present.

—William Miner, of the Fort Allen Foundry, was during the early part of the week, looking for additional help—molders—his foundry being driven at full capacity. The kinds of work which it is now doing require skillful workmen, who have had experience on fine iron castings. This fact and the opening of the canal gives Weisport a cheerful business outlook.

—The "sulphur shower" in the Lehigh Valley is explained by Dr. Erwin, of Mauch Chunk, and Mr. Rau, of Bethlehem, to be simply pollen, from a species of pine found in Southern or New Jersey forests. This pollen was caught up by the wind and deposited as it came in contact with a body of water in the valley. The nature of the deposit is proved by microscopic examination.

—Says the Allentown Democrat: A Weisport farmer lost a quantity of meat from his premises a few nights ago, and, suspecting a certain neighbor, he next morning went to him and demanded his property, at the same time making known the fact that if the farmer could not produce a grain of corn from each piece he would claim it.

—The guilty party produced the meat, and, after a little prodding, on being asked to produce the other, he produced the rest of the meat. Each piece in turn was thus manipulated, fully establishing the right of the farmer to his property. The cunning Gauger, it seems, had inserted the corn the more readily, in the event of such an emergency, to prove his claim. Not caring to waste time by coming to court the farmer declined to prosecute the thief.

—The Lehigh Presbytery will meet at Stroudsburg, on April 15, in Rev. R. W. M. Rice's Church. The Presbytery consists of 32 ministers, 42 churches, 14 candidates, and represents 4,847 communicants and 4,469 Sunday school scholars. On the 14th of April a Sunday-school Convention will be held prior to the meeting of Presbytery.

—After years of patient study of the art and practical experience, Mr. E. F. Lankenbach, fresco painter and interior decorator, of Mauch Chunk, has established a reputation second to none in this section. He has recently stocked his store with all the latest and most elegant designs of wall and ceiling papers; and it will pay the admirer of the beautiful to visit his store and examine the various rich designs in interior decorations he has on exhibition.

—Hon. Allen Craig will please accept our thanks for Legislative documents.

—Receiver Appointed.

A stipulated return to the New York State of Pottsville is as follows:

—The Pennsylvania Anthracite Coal Company, the most extensive private mining company in the Lackawanna region, has filed a report of its operations for the year ending 1878. This company was incorporated in 1864, as the Lackawanna Coal and Iron Company, the name being changed in 1871. It owns 400 acres of land near Pottsville, and holds a lease of 350 acres. This property is bonded for \$1,000,000. The company for two years has been greatly embarrassed by the state of the coal market, and being in default of the interest on its bonds, a receiver was appointed. Mr. T. M. Moore, treasurer of the company, is the receiver. The company's breakers have a capacity of 400,000 tons of coal a year, and the total output of the mine is 200,000 tons. The company's employees the company owns \$20,000. The present of its mines were furnished to the Lackawanna Railroad Company, but at prices below the rate at which it is sold. The receiver has authority to go on with the mines. Much comment has been made in the early part of the year, but the receiver has been frequently visiting one of our neighbors' chicken-coops. One evening last week, while the children were playing in the yard, a black spot in the orchard, which they imagined to be the owl, they immediately made it known to their father and the servant. The latter, being the gun, hurried to the spot, took aim and fired. But instead of an owl it was a crow.

—B. H. Kistler, was confined to the house the last part of the week with headache.

—The case of the party that was killed by a few weeks ago was back again. They say that the party was killed by a fall from a height of 200 feet, and was killed by a fall from a height of 200 feet.

—Our Parryville Budget.

—Last week all was joy and sunshine; the weather was bright and the spring was full of life.

—The general survey all declared the outlook bright, and the advent of living spring.

—This week, how changed! A maelstrom of snow, sleet and squalls, swept most forcibly the poetical expression, "Winter lingers in the lap of Spring."

—A week ago, your correspondent was so wrapped with the appearance of grey Spring as to admit to her something like the following:

—GENTLE SPRING.

We greet thy coming, gentle Spring, And trust that thou'lt come to stay; Thy sweet influence may bring, And gentle warmth of May.

Thy advent bids the bluebirds sing, Hide nature's all be gay, And my mate of earth will bring, While thou dost rate the day.

Old Winter stern, with hoary head, Has disappeared at last, His brother Boreas, too, has sped—'Tis glad thy reign has past.

Jack Frost no more shall bite our toes, Since thou dost reign supreme; 'Tis glad to see the lady's nose, But all eyes will seem.

With breath of May the flowers will bloom, Their fragrance fill the air, Anon the wings of bees will hum Beneath the solar glare.

And next the month of roses—June—Will dawn as bright as May, The last and loveliest—Ah, too soon, Spring's dainties pass us by!

Should Winter take a backward turn, To linger on thy lap, Pray, bid him quickly home return—'Tis glad to see the lady's nose, But all eyes will seem.

We're had enough of ice and snow—Enough of Frosty Jobs—To satisfy an Equinox—So, bid him quickly go home!

Amner snip the icy bands, And bid him home to go, And bid him home to go, And bid him home to go.

All hail! Fair Spring, with April showers! All hail! thy breath of May! Three welcomes! God bless the Flow's, And bid him quickly go home!

But now, what shall we do? Nothing! We are so disgusted with the "old man's" return that we will pass him by unheeded, and let him severely alone, in the firm belief that he will soon go into winter-quarters in a better climate. But by "you may ask" shows our Parryville correspondent, ought to know better, incline to much had poetry on us, who's knows that his fate is likely to be our worse basket? [We have sealed the "old man's" return to the readers of the ADVOCATE.—Ed.]

—Be it known unto you, Mr. Editor, that in these latter days, when items are scarce as hen's teeth, and the weather is so disagreeable, we have had a little problem on our minds, and we have decided to send you, as a make shift, even such matter as the foregoing. If you have any anagrams to pronounce upon in a similar style, we shall be glad to stand it.

—Our works are still in statu quo.

—The rain has been in the air for some time.

—We fear that Spring will come and go as usual.

—Rev. E. D. Bates preached his first sermon in the Evangelical church here, on Sabbath evening, to a large congregation. We are informed that he commenced his labors for the first time, in this circuit, some twenty years ago.

—John Detmeyer, one of our Parryville boys, departs for Colorado this week, to join his brother Tony who left here about a year ago.

—The latest thing out, rather, the latest thing in, is our new orchestra, composed of a quartette of ladies and gentlemen. The instrument is a new organ, very concordant and correct. We say they are the latest thing in music we have not heard them so far. We suggest a serenade in our honor, so that we may be afforded an opportunity to see the new instrument in action.

—We heard that Thos. Straup of Conditate, expects to remove his family here about the middle of the month. He will remain, after an absence of seven or eight years.

—Mr. H. B. Miller was on a visit to Lehighton on Saturday last.

—An owl has been frequently visiting one of our neighbors' chicken-coops. One evening last week, while the children were playing in the yard, a black spot in the orchard, which they imagined to be the owl, they immediately made it known to their father and the servant. The latter, being the gun, hurried to the spot, took aim and fired. But instead of an owl it was a crow.
