NEW YORK, June 19, 1879. SUMMER AT LAST.

I would like to quote the "oldest inhabitant" able a season. We have worn overcoals during the past week, and three days before had perspired under Panamas at ninety-seven in E. D., Buffalo, N. Y. the shade. People get ready for the seashore one day, and the next put on their winter

" WATER FABRING." If the title sounds funny the subject is so interesting that I prefoundly regret my inshifity to do it justice. It is a "coming issue"—this matter of "Water Farming"—and your farmer readers and city subscribers are alike interested in it. A person not acquainted with this subject would laugh in your face if you should tell him that a three arce fees yound. should tell him that a three acre frog pond could be made to yield more profit to a farm er than a three sere putato patch; and that a stream of water could be "caltivated" to his great pecuniary advantage. Yet this is all pond or stream can be stocked with trout, bass, him we can easily march on to victory!

--Farmers are busy at work in their corn sufficient orders to keep them at work for hatched, and in some cases in a very low days. Once hatched the fish provide for themselves : prices. The only loss of time or labor is in | salver, (Trasles,).

much with their book and line as a full grown man would in the cornfield.

We have a fine h-tehing establishment and a Board of State Fish Commissions s, who are only too auxious that people should avail already long list of profitable farm products.
