Our Letter from Washington,
Washington, D. C., Feb. 14, 1850.
The past week has been somewhat notable for the number of hills that have been presented in Cougress. About 175 were offered in de day, prominent among which was a fill of Representative Young (Ohio) creating a Deportment of Manufactures, Mechanics and Mines. This Department will if created be of great value to the country at large, but especially to the West, as one of the principal ideas is to secure information and staticties as to the location of the mineral lands of the United States, their development, and the quantities produced annually. Financial matters continue to be against and Secretary Sherman appeared betwee the Committee of Ways and Resease of the limited of

She gave the value of the dress, and wanted the baiance sent tack to her if the duties did not amount to \$15. The customs division of the Trearury made a computation based upon the duties charged in 1804, and f. and that the disly owed exactly \$7.50. The taliance was returned. The largest amount ever received as one e. atribution was \$15.000 in U. S. 7.30 notes. This contribution was announced in the howspapers, and many ingenious attempts were made to get the money out of the treasury. One man claimed that his father made the contribution, and that he was crazy. A search of the Treasury books showed a block of \$15,000, which it was thought corresponded to the contribution made. The money was hurriedly then covered into the Treasury. The contributor of it had carefully cut out the numbers of the notes so as to make it in-

The leading topies in Congress at present are the Inter-secencic Canal project, the proposition to make the Commissioner of Agriculture a Callinat officer, and the scheme to triganize a new Territory out of what is now the Indian Territory. Both these latter schemes will fail and they ought to fail. A lively and probably hiter political debate is shortly threatened over the Fits John Porter case. Gent Logan in the Senate and Gen. Garfield in the House are prepared to defend the action of the criminal Court Martial and resists to the end the effort of the majority to resist to the end the effort of the majority to resist to the end the effort of the majority to resist to upon us and the galeties of the last law weeks will in a measure suspend. Impure Saleratus or Bi-Carb Soda, which is the same thing, is of a slightip dirty white color. It may appear white, examined by itself, but a COMPARISON WITH CHURCH & CO'S "ARM ANDHAMMER" BHAND will show the difference.

See that your Saleratus and Baking Soda is white and PURE, as should be ALL SIMILAR SUBSTANCES used for food.

A simple but severe test of the comparative value of different brands of Soda or Saleratus is to disselve a desert spoonful of each kind will about a plut of water (not prefarred) in clear glasses, stirring until all is theroughly disselved The delevirous insoluble matter in the inferior Soda will be shown after extiling some twenty minutes or sooner, by the milky appearance of the solution and the quantity of floating Socky matter secording to quality.

Be sure and ask for Church & Co.'s Soda and paleratus and see that their name is on the package and you will get the pures and whitest made. The two of this with sour milk, in preservance to Baking Frawker, saves twenty times in seven.
