The Coal Trade. The anthracite coal trade continues move forward most successfully. From week to week the outlook is steadily all the time better. It is the result of one single cause, and one that this paper has continuously, and almost weekly for the pest two or three years, urged upon the several parties in the trude, namely, to act in concert and in harmony. At last they have now Passed Political Georgraph-Webster T. tal by throwing coal into the market in ad vance of any adequate demand for it, and at prices greatly below the cost of production The roal, bul it have left in the mines would have been worth greatly more to the Harrison . owners of the land and greatly more to conmers in the future. The waste of coal is hers, James ... Daniel and Eve. the past few years has amounted to millions of dollars, and this great amount has advan LOWER TOWAMENSING TOWNSHIP taged no one. The price of coal is approaching a remunerative point and we have to hear ous now than they were when coal was a its lowest, any time within the past two William years. There always are grumblers, though LEDICH TOWNSHIP the prices should be never so low, but we Blackwell, Robert . allude to fair-minded, reasonable men, who compare the prices of fuel with current business and the amount of profit returned from that business. To such the coal murket and coal prices are not to be complained of by either producers or consumers. Four tine David dollars per ton, which is now about the average price for the leading grades of coal, should and will satisfy all for this period of the year, and can searcely fail to make 1880 me of the largest in production that we have ever had, and one in which the trade will nave less reason to complain of fair remuneration since the years of the war. The half-weekly suspension of coal production ended with the past week, and to-day Savitz, work commences on full time in all the regions. The supply of some sizes of coal is reported a little short of the demand, but, Bradford, Thomas .. with full-time working, this disparity will soon be lost. Generally, and indeed at nearly all the coal centres, the orders for

coul are in good supply, and, as the dead work in the mines has been vigorously prose-cuted, all demands for ceal will be fully and toostey, Thomas toberts, George. are seemingly in narmony and free from undercutting and rivalry, business is likely to move forward successfully. The Reading Railroad company has withdrawn its circu-lats of March 30th regulating coal freights. and have issued a new schedule under ein culars Nos. 16 and 17, dated April 1 and 2 a maximum of 23 cents a top on coal ship ped to Hayre de Grace or Baltimore or points beyond the Delaware and Kariton Camil. The other, circular No. 17, makes a charge of 50 cents per four-wheeled car, and double that amount for an eight wheeled car for every day's delay in unleading cars at Port Richmond, and, besides, deducting the num-ber of cars from the quota to be shipped to Andreas, Jacob Bieckley, David Bader, Samuel each colliery. The retail trade is still pretty active. The stock at Port Richmond has

been reduced 5000 tons during the past week, and, freights having dropped to Boston, the honing will soon lose he altogether. Wait and see.

—At the close of the entertginment on Friday evening, a number of Isdies and gentlemen began singing a song, the effect of which will not soon be forgotten. It marred all the good opinions held of the evening's performance. A beautiful "good night" song had just been sung and the audience was filing out when from behind the cartain rose the jarring strains of the well known song of the "farmer's dog." We do not blame all who helped as much as we do one of the managers who was among the past week, Meinanchton Freehileh. Pupila remaining in this discuss—Laura Dentinger, Ida Moutthrop, Ella Marquet, Mary Sm.th, Emma Rehring, Eleshor Held, Minnie Reichard, Eddle Heim, Orville Wert, Oscar Strohm, Henry Freehileh, Wm. Walck.

Promotions to B class—Mary Albright, Mamic Gable, Alice Gegges, Emma Held, Amanda Koons, Besste Leibenguth, Ida Mante, 1876. In March, 1876, the rate had declined to 2 per cent below the basis, and reached its greatest declension in July, 1877, when the rate of wages, by this method of ascertainment, was 37 per cent below the Lydia O'Brian, Ela Reichard, Lilian Semble, Laura Trexier, Katle Xanders, Willie Word, Gowen and paid that month. Since that period the fluctuations have been many, but have always been but they would have been by the rate work.
