

New York Experimental Farms. The Legislature of New York, at its last session, passed a bill providing that \$20, 000 a year should be appropriated for two O'er thy life, health's sun divine years for the purpose of experimental farming under the direction of the Board of Control. The members of the Board at present are Governor Cornell, General N. K. Curtis, President of the New York State Agriculture. Rid the Liver of its load, President of the New York State Agriculture. tural Association; W. A. Armstrong, of Eltural Association; W. A. Often farms side by side will not grow the same grain, and what the farmers want to know is what manure or fertilizer will make the land productive. When one crop is sown centinuously for a number of years on the same land the soil becomes sick and will not yield the crop again for perhaps ten or twelve years, no matter if it is sown every year. What we want is the remedy for these things."
