-The Allentown post-office organ "didn't expect a Republican victory in Maine this year" in one column of that paper, and yet to another claims the election of the entire Republican ticket. What kind of consolation do you call that, Bolr?

The cotton crop of the United States for estuft year which closed September 1 is estimated by the New York Financial and Commercial Chronicle at 5.757,397 bales,complaced with 5,073,531 bales for the previous year. Ot this crop 3,865,121 bales were exsed and 1.624.805 bales consumed at home mit the stock at the shipping ports September let was 137,419 bales.

Gen. Grant on the spirit pervading the Booth is decidedly the best witness in the Republican party. Going to and returning from Moxico last winter Gen, Grant made a tour of the Southern states. His arrival in which he said : "It may be appropriate on this occasion to refer to my trip through the Southern states and to what I have seen while traveling. I have been gratified at my recaption in all the recently rebellious states. I passed from Philadelphia to Florida on my way to Havana, and on my re turn came via Texas from Mexico, thus passing through all the rebellious states, and it will be agreeable to all to know that hospitality was fendered me at every city through which I passed and accepted in floated over un everywhere, and the eyes of the people in those states are as familiar guaranteeing to them all the rights and privileges of a free people without regard to race color or pravious condition of servitude. In most of the states, upon the reception committees, side by side, were men that ception addresses were made in part by those who were the blue and those who were the ose who were the gray will futbil all they have promised in loyalty to the flag and the

-According to the latest advices from Maine received at this office, there appears to be no substantial reason to doubt that Gen. Plaisted has a clear majority, and is elected Governor by the people. Latest trustworthy advices from Maine say r turns received Wednesday night do not vary the general result. The towns to hear from, principally in Aroestock County, gave a fusion majority of 2,400 last year, and the general belief is that Union gains have been ande there, and that Plaisted will have fully 1,000 majority when the resurce ali in. The Republicans are trying to figure out that he will only have a plurality, and in that case the Supreme Court will be call ed upon to declare the plurality amendment just adopted unconstitutional or inoperative in this election. Blaine received an immense number of dispatches at his home in Augusta Wednesday and some of the Repub-Scans there, while they do not assert that Davis is elected, doclare that he will be the next Governor of Maine. The leading Democrats, however, assert that there is no doubt whatever of the result, that Plausted is surely elected, and that his majority is such that no possible figuring or manipulating the returns can change the verdict of the people. Among the despatches received by the Hop. H. M. Plaisted, Governor elect of the State of Maine, was the following:

New York, Sept 15. To the Hon. Harris M. Plaisted. Bangor, Me. Accept my congratulations of the glorious Featls of your campaign. It will inspire our friends with confidence and atroughen them in the preliminary battles which re-main to be lought elsewhere, and which need all of our forces. W. S. Hancock.

- The Philadelphia Ledger of last Wedneeday, in its money article, publishes the just now a plucked height. following: The secretary of the Iron and Steel Association reports 697 blast furnaces in the United States, with an annual capa city of 6,500,000 tons of pig iron; 382 rolmills, with an annual capacity of 4,000,000 tons, the capacity of the rail mills being 2,500,000 tons. 11 Bessemer steel works. with an annual capacity of 1,750,000 tons, Londer 11,880 miscellaneous works. In manufactured iron there is a good general demand, and this demand is reported to be on the increase. Our manufacturing industries of all kinds which work up manufactured full time with a full complement of hands The consumption, therefore, of manufact tured iron is necessarily large, and the sales made by our jobbers are reported to be on a most satisfactory scale. We have to note an increasing firmness and a Pactional advance in sheet iron, which is, this week, on the basis of 3.7 for No. 10 to 12. Bar iron has been in better demand, but the rate remains | Union. the fame as previously reported. Steel is steady throughout and firm at former rates. Our rolling mills are all busy, and have which, at this juncture, they can illy afford large orders on hand for steel rails, which to bear, they are filling as fast as possible. They have orders to fill which will require them to work full time for months shead. At all and hope into the Democratic canvass, which points East and West the same condition of has heretofore been heavy and sluggish. things is reported. The mills in Philadelphis, at Pittaburg, and, indeed, throughout Pennsylvania, at St. Louis and elsewhere, are full of work. With such a condition of things in existence it ought not to be necessary to advance prices to a point which will lead us to make further importations from England. Her gold ought to be more valuable to us, in exchange for our products of the soil and of our workshops, than her steel rails. Let charity for our working men begin and stay at home.

POPULAR SCIENCE NOTES. -It is said that there exists a corious intermittant spring, on the slopes of the Vol-

Hookelsga, and the tunnel will be 40 feet below the bottom of the river which has a depth of 42 feet at this point. The South Shore Railway and Tunnel Company have

Illineis was emphasized by a speech in matts, established in 1822, by Sir Thomas

cuted with great activity and it is thought islied for the Cannon Advocate, from the that the success of the undertaking is fully Law and Patent office of J. McC. Persens. assured, and its completion, though quite a sore L Street, Washington, D. C. long time off, will be looked forward to C. Beidler, assignor of 14 interest to E. with much anxiety.

-Quite a sensation has been created in nearly alt of them by me. The Union flag the Paris scientific world by a recent decision of M. Tisard, the Minister of Agriculture and Commerce, causing the removal of with its colors as yours, and look upon it as M. Tresch, whose name has been familiarly connected with the Conservatoire des Arts et Metlers for the past twenty-five years.

-It is authoritatively stated that the are now 1,724,000,000 acres of Government lands in the United States, unoccupied and were blue and men that were gray, and re- open to settlement to those who may wish to occupy them. The unsurveyed portion f Montana alone is claimed to be larger gray. We have no reason to doubt that than the area of Great Britain and Ireland combined, and yet there are thousands of families in this country who are without Castle, car wheel. homes, who could easily possess one for the trying. Why is matters thus?

said to do its work wonderfully and well.

-Under the auspicies of the "German African Society," a wealthy organization of Germany, not less than six different expeditions have been equipped, and are now traveling and exploring Central and South and H. M. Lewis, trustees, Philadelphia Africa, and a report of their doings is anxiously awaited.

-Extensive Emery beds have recently been discovered near Peckskill, N. Y., to which considerable importance is being attached by manufacturers who use large quantities of the article.

-A new steel suspension bridge, 1,150 feet in length, and surpassed by but one other in the United States in height, is being erected at Minneapolis, Minn., across the Mississippi river, the cost of which will be about \$300,000.

-M. Selbert, of France has invented an apparatus for registering the law of motion of a projectile, either in the bore of a gun or

A WONDERFUL DISCOVERY

A Deodorized extract of Petroleum, The Only Article that Will Restore Hair on Bald Heads.

What the World has been Wanting for Centuries.

The greatest discovery of our day, so far as a large portion of humanity is concerned, is CAR-BOLINE, an article prepared from petroleum, and which effects a complete and radical cure in case of which effects a complete and radical curs in case of baldness, or where the hair, owing to diseases of the scalp, has become thin and tends to fall out. It is also a speedy restorative, and while its use se-cures a luxuriant growth of heir, it also brings back the natural color, and gives the most complete satisfaction in the using. The falling out of the hair, the accumulations of dandruff, and the premature change in color are all evidences of a diseased condition of the scalp and the glands which nourish the hair. To arrest these causes the article used must possess medical as well as chemical virtues, and the change must begin under the scalp to be of permanent and lasting benefit. Such an article is CAR-BOLINE, and, like many other wonderful discoveries, it is found to consist of elements almost in their natural state. Petroleum oil is the article which is made to work such extraordinary results; but it is after it has been chemically treated and completely deodorized that it is in proper condition for the toilet. It was in far-off Russia that the for the toilet. It was in far-our kussia the effect of petroleum upon the hair was first observed, a Government officer having noticed that a partially baid-headed servant of his, when trimming the lamps, had a habit of wiping his oil-heameared hands in his scanty locks, and the result was in a few months at much finer head of black, glossy hair than he over had before. The oil was tried on than he ever had before. The oil was tried on horses and cattle that had lost their hair from the cattle plague, and the results were as rapid as they were marvelous. The manes and even the talls of horses, which had fallen out, were completely restored in a few weeks." These experiments were heralded to the world, but the knowledge was prac-tically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. But the skill of one of our chemists has overcome the diffi culty, and by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in deodorizing refined petroleum, which renders it susceptible of being handled as daintily as the famous ear de cologue. The experiments with the decolorized liquid on the human hair were at-ended with the most astonishing results. A few applications, where the hair was thin and falling, gave remarkable tone and vigor to the scalp and hair. Every particle of dandruff disappears on the first or second dressing, and the liquid so search-ing in its nature, seems to penetrate to the roots at once, and set up a radical change from the start. It is well known that the most beautiful colors are made from petroleum, and, by some mysterious operation of nature, the use of this article gradually imparts a beautiful light-brown color to the hair which by continued use, deepens to a black.
The color remains permanent for an indefinite length
of time, and the change is so gradual that the most

tutimate friends can scarcely detect its progress.

In a word, it is the most wonderful discovery of
the age, and well calculated to make the prema-We advise our readers to give it a trial, feeling satisfied that one application will convince them of as wonderful effects.—Pittsburgh Commercial of estisted that its wonderfa Oct. 23, 1877. 7cf. 23, 1877.

W. H. Brill, & Co., Fifth Avenue Pharmacy, says.

"We have sold preparations for the hair for upward of twenty years, but have never had one to sell as well or give such universal satisfaction. We therefore recommend it with condense to our friends and the general public."

Mr. Gustayus F. Hall, of the Oates Opera. Troupe, writes: "After six weeks" use I am convinced, as are also my commedes, that your 'Carboline' has and is producing a wenderful growth of hair where I had none for years."

C. H. Sayru, of Fay Jennie Hight Combination.

C. H. Smyrit, of fac Jennie. Hight Combination, writes: "After assing your Carboline three weeks I am convinced that baid heads can be "re-haired." It's simply wenderful in my case."

B. F. Anymen, chemist, Holyonke, Mass., writes: "Your 'Carboline' has restored my hair after everything class had failed." thing chee had failed."

Josness R. Pover, atterney-at-law, No. Attlehore, Mass, writes ? For more than 30 years a portion of my head has been as smooth and free from hair as a billiard ball, but some eight weeks ago I was induced to try your Carboline, and the effect has been simply wonderful. Where no hair has been seen for years there now appears a thick growth, and I am convinced that by continuing its use I shall have as good a head of heir as I ever had. It is growing now nearly as rapidly as hair does after it is cut.
