WASHINGTON.

OUR SPECIAL LETTER Washington, D. C. Jan. 22, 1881. Among matters political, and hence pure y worldly in character, it may be interesting to the country to know that there is rong sentiment existing having in view the evangelizing of Washington through the avenues of a certain amount of sectarian ism

which is found to exist in the society called the "Disciples of Christ." This is the re-ligious shield which General Garfield buckles on of a Sunday, and it is proposed that he shall sometime early in his administration Extraordinary inducements to Club-Getters shall sometime early in his administration have a handsome church edifice in which be, as a member of the Church militant, thall be able to do himself credit as a valiant warrior in the cause. Already about \$50,000 has been subscribed here and in other sec tions of the country for the erection of a new building which shall be known us the Presi dential church. The bill establishing the rate of refunding interest at three per cent, passed the House and has gone to the Senate, where it is expected that it will be amended so as to make the rate 31 per cent. The vote in the House pected that it will be amended so as to make the rate 33 per cent. The vote in the House on the 3 per cent. rate stood 149 to 104, the Greenbackers all voting for it. Several members have stated that they voted for the bill just for the sake of getting it out of the hands of the lower House so that the Senate could as the raying is "lick it into shape."

It is now reported Senator Blaine had not been offered the position of Secretary of State or any other position in the new Cabinet. This is based on an alleged statement made by a gentleman who has been acting as a private secretary to General Garfield, and who has recently arrived in Washington from Mentor, he asserts that not a single person has received any assurances from the President elect that he would appoint him to office no matter how trivial. He states that there has been a perfect stream of call-

New York, Jan. 22, 1881.

This is the intermediate season when fashion apparently is at a standatill; the winter nevelties are exhausted, and it is too soon to think of spring, especially with the thermometer below zero, and the "beautiful" black "anow" banking up every thorough fare in New York city.

Still this month is not without its uses no it "fashions" either, both for the house keeper and the fashionable dame of zweicity.

To the first this is the renovating sesson.
