# A VALUABLE PREMIUM!

We will present every person calling at this office and paying \$1.00 for one year's subscription to the CARBON ADVOCATE, with a copy of Dr. J. B. KENDALL'S TREATISE ON THE HORSE, one of the most valuable books for Farmers and Horsemen ever published. The book is handsomely and profusely illustrated, and gives symptoms and treatment for the various diseases to which the horse is subject. Remember, for \$1 you get the ADVOCATE for one year and a copy of the BOOK FREE! Now hand in your names and the dollar.

We have just received a limited number of KENDALL'S TREATISE ON THE HORSE AND HIS DISEASES, printed in German, which we will give to those paying one year in advance for the CARBON ADVOCATE.

Prof. E. D. Schnabel, principal of the Lehigh High School, has been elected assistant teacher of Mathematics, at the Keystone State Normal School. The prospects are that the number of students during the spring term, which opens April 4th, will be so large that the trustees will be compelled to elect several new teachers.

The new building for the ladies department is almost completed. The entire cost will be \$10,000.

# The Coal Trade.

From the Lehigh, Monday.—The anthracite coal trade holds the same buoyancy that characterized it with the incoming of the present year. The milder weather that has succeeded the long spell of severely cold weather has tended to keep up the stocks of coal on hand. Some of the obstructions to full transportation are rapidly removed, navigation is opened, but considerable floating ice still remains. There is also a good deal of surplus water in the mines, drawing them out and serving to halt production. While this interferes with the necessary supply of coal to meet the current demand it brightens the outlook for the trade throughout the year. There is considerable inquiry for coal, and the supply so short as to assure operators that prices cannot decline as much as is expected. The coal trade is maintained, higher prices are likely to rule. There is now a scarcity of coal reported in the Eastern States, and at the West it is estimated that the demand will fully equal any probable supply that can be sent to it. In a word, the outlook for the anthracite coal trade was never better. The transportation facilities in some of the coal regions have been a little short, but preparations are actively in progress that promise early to cure this difficulty. Prices are kept steadily at figures that seem to be satisfactory to both sellers and buyers, with little, if any, reason to believe that there can be any difference between the two parties on this point here to the end of the year. The colliers are all being run on full winter time, which is three-quarters of a day each twenty-four hours. The coal trade is attracting much wider attention than usual at this season of the year, especially the subject of car supply and coal shipments. The Philadelphia Record says "it is the all-absorbing topic among coal operators and miners of the Schuylkill region—the hard coal section. Every shipper says his orders demand double the number of cars he is receiving daily. Now this is all true, and each one is puzzling his brain to know why the railroad company don't furnish more cars to meet this want. We will presently refer to last week's report of coal shipments from this division of the railroad from which we learn that 32,279 tons of coal passed over the Tyrone scales, over which, during the corresponding period of last year, 51,265 tons were shipped. This decrease of nearly 19,000 tons was not owing to a lack of orders, but an utter impossibility to forward over the mountains. It requires an average of three hundred and fifty cars daily of an average load of fifteen tons to each car, to do the work that was done last year. This number of cars, with their total freight of 250 tons, had to be taken up the mountain grade of nearly 150 miles to the summit, and from thence down a similar grade to its base, with three to four engines to the trip, and from twelve to fifteen trips per day. This work can be done in mild and moderate winters with some degree of certainty, but how uncertain is rail-roading on such grades and curves, with daily snow-falls and frequent fresh waves of zero and lower temperature. "Should any of our readers be somewhat skeptical upon the question, let them just get up the title practical information for shipping on any shipper's yard, and see the laborious operation of moving a single car with but two inches of snow on the rail, compared with moving the same on the clear rail free from snow. Ten minutes' glance will be sufficient. As it is, and to do the work that is now done, necessitates the working of the larger portion of the employees of the road from three to six hours extra on each day's duty. This severely imposed task could be easily borne in pleasant weather, but how terrible to brave the storm and piercing winds at twelve to eighteen hours consecutively. This must all be done to accomplish this work."
