FARMERS' COLUMN.

How to Produce Strawberries.

Nine out of ten persons who cultivate strawberries allow the runners to grow for the purpose of getting plants the following year. This is wrong. If plants are desired they should be taken from a patch selected for that purpose. It is impossible to get first class fruit from vines that have produced runners, as the effort at double production (plants and berries) weakens the vine and prevents it from producing good fruit. To get nice, large, well flavored strawberries the vines should be kept free from runners, not even allowing them to get away from the parent at the start. This can be done by having a piece of stovepipe fixed to a stick for a handle, to use for a cutter. Place the pipe over the plant and press upon it. This cuts off the runners. When the runners have all been cut follow with the hoe and clear them away. When the plants blossom all the blossoms should be cut off except a few of the forward ones on each plant. This looks like destruction, but a trial will show that such treatment will give larger berries, of better flavor, and easier to pick. The crop, though lacking in numbers, will compensate in bulk as well as realizing the highest price in market. As soon as the crop is removed weed the plants again, and sprinkle around each one, under the leaves, some well-rotted manure and in the fall let them be mulched. On removing the mulch early in the spring again give each plant a sprinkling, but this time of a mixture of equal parts of superphosphate, sulphate of potash (double quantity of unleached hard wood ashes may be substituted), guano and plaster. By thus giving them good care and cultivation they will pay as well if not better than any of the small fruits, but if neglected they occasion a loss.

FARM NOTES.

—The army worm has been known in this country since 1743.

—Maine raises nearly 7,000,000 bushels of potatoes per annum.

—The hay crop of New York is worth over $50,000,000 per annum.

—One gallon of white paint should cover forty-four square yards of surface.

—All animals without exceptions ruminate which have horns and cloven feet.

—The gelatine pervails in young animals, and hence their bones are quite flexible.

—Connecticut tobacco lands give an average annual yield of 1460 pounds to the acre.

—Ordinary engines burn about ten pounds of coal per hour for each rated one-horse power acquired.

—No man can afford to have his milch cows driven by a dog unless the dogs knows as much as his owner should know.

—The dairy cow is a work of art, and so is the beef animal; both are the productions of man to suit his needs and convenience.

—Nine-tenths of the fixed capital of all the civilized people in the world is embarked in agriculture, which employs 200,000,000 of men.

—There are 6,600,000 square inches to an acre; in a bushel of timothy seed there are 40,000,000 seeds, or nearly seven seeds to a square inch.

—In 1879 Vermont planted 56,000 acres to Indian corn, raising 2,937,000 bushels, or at the rate of 52 bushels to the acre. Total value, $1,437,443, at the rate of 73 cents per bushel.

—The raising of sheep is of the greatest benefit to the land, because wherever they feed new and sweet grasses grow and flourish, and the weeds are destroyed. Farmers should raise turnips and feed them to sheep.

—Too close in breeding produces barrenness, and the very opposite has the same effect. The other extreme is known as violent crossing. The most violent cross is that between unlike species, as between the horse and the ass, the product of which is a barren mule.

—Milk cools more rapidly in metal pans than in porcelain; but iron pans rust. Zinc is acted upon by sugar of milk and lactic acid. Copper produces verdigris. Tin costs too much, and as tin plate is used as the safest, and at the same time the least expensive.

—It has usually been supposed that the rusting of iron depends principally upon moisture and oxygen. It would appear, however, from Dr. Calvert's experiments that carbonic acid is the principal agent, and without this the other agencies have very little effect. Iron does not rust at all in dry oxygen, and but little in moist oxygen, while it rusts very rapidly in a mixture of moist carbonic acid and oxygen.

—When it is desired to make corks air-tight and water-tight the best method is to allow them to remain for about five minutes beneath the surface of melted paraffine in a suitable vessel, the corks being held down either by a perforated lid, wire screen or similar device. Corks thus prepared can be easily cut and bored, have a perfectly smooth exterior, may be introduced and removed from the neck of a flask with ease, and make a perfect seal.

—The bot, the inhabitant of the stomach of the horse, is produced from the eggs of the gad-fly, which are deposited in the hair of the horse; from these eggs are hatched a little grub, which is licked off by the horse and swallowed. Sometimes several hundreds are thus deposited in its stomach. Formerly they were considered very injurious, but now it is conceded that they cannot do as much injury as the nostrums used for destroying them.

—A New Yorker writes: "To rid land of stumps I dig around and under them with a spade, leaving a basin to catch the water of winter and spring, which, as it freezes, slowly raises the stumps from their beds. Some of the largest were so raised by spring that we could tip them over by hand; the solid ones I went around again to give Jack Frost another opportunity to get his icy fingers under them. I think a field can be cleared in one half the time that it could by the old way."

—Between sheep's hoofs a small aperture may be seen called the biflex canal, whose office it is to secrete an oily fluid for the purpose of lubricating the skin between the hoofs, it being called into action by every step the sheep takes in procuring its food. Therefore, when perpetually wet or constantly dirty, the parts swell, and this secretion already spoken of is stopped or retarded; hence not only is the skin deprived of the oily secretion, but the secreting itself becomes an irritant of the glands which secreted it. Inflammation of the parts is the consequent result, hence foot rot, which unless retarded and remedied very soon destroys not only the hoof, but the glands, and perhaps the coronary border which secrets the hoof.

DIRECTIONS.—For Catarrh, Hay Fever, Cold in the Head, &c., insert with little finger, a particle of the Balm into the nostrils; draw strong breaths through the nose. It will be absorbed, cleansing and healing the diseased membrane.

For Deafness,

Apply a particle into the ear.

ELY'S CREAM BALM

HAVING gained an enviable local reputation, displacing all other preparations in the vicinity of discovery, is, on its merits alone, recognized as a wonderful remedy wherever known. A fair trial will convince the most skeptical of its curative powers. It effectually cleanses the nasal passages of Catarrhal virus, causing healthy secretions, allays inflammation and irritation, protects the membranal linings of the head from additional colds, completely heals the sores and restores the sense of taste and smell. Beneficial results are realized by a few applications. A thorough treatment as directed will cure Catarrh. As a household remedy for cold in the head it is unequaled. The Balm is easy to use and agreeable. Sold by druggists at 50 cents. On receipt of 50 cents will mail a package. &c. Send for circular with full information.

THE LEADING SCIENTISTS OF TO-DAY agree that most diseases are caused by disordered Kidneys or Liver. If, therefore, the Kidneys and Liver are kept in perfect order, perfect health will be the result. This truth has only been known a short time, and for years people suffered great agony without being able to find relief. The discovery of Warner's Safe Kidney and Liver Cure marks a new era in the treatment of these troubles. Made from a simple tropical leaf of rare value, it contains just the elements necessary to nourish and invigorate both of these great organs, and safely restore and keep them in order. It is a POSITIVE REMEDY for all the diseases that cause pain in the lower parts of the body—for Torpid Liver, Headaches, Jaundice, Dizziness, Gravel, Fever, Ague, Malarial Fever, and all difficulties of the Kidneys, Liver and Urinary Organs.

It is an excellent and safe remedy for females during Pregnancy. It will control Menstruation and is invaluable for Leucorrhœa or Falling of the Womb.

As a Blood Purifier it is unequalled, for it cures the organs that make the blood.

RAPSHER & ZERN.

The most successful Remedy ever discovered, as it is certain in its effects and does not blister. Also excellent for the Human Flesh. READ PROOF BELOW.

From a prominent Physician.

Washingtonville, O., June 17, 1880.

Dr. B. J. KENDALL & Co.—Gents—Reading your advertisement in Turf, Field and Farm, of Kendall's Spavin Cure, and having a valuable and speedy horse which had been lame from spavin eighteen months, I sent to you for a bottle by express, which in six weeks removed all lameness and enlargement, and a large splint from one her horse, and both horses are to day as sound as colts. The one bottle was worth to me ten hundred dollars.

Respectfully yours,
H. A. BENTOLETT, M.D.

Kendall's Spavin Cure.

Harrisburg, Pa., Nov. 18th, 1880.

Dr. B. J. KENDALL & Co., Gents:—I have a very fine mare that has had a bone spavin for a long time. I tried everything man could devise to cure it, but all in vain, and was about to give it up when a friend of mine in this city came to me and recommended Kendall's Spavin Cure, which I tried with grand results, removing that bone clear and clean, and then I sent 25c. to you for one of your illustrated Horse Books, and I think there is no better book printed on the horse and his diseases. I have taken great interest in it and have since sold 15 copies for you to my neighbors, and will try and do what good I can by getting them for others.

Yours truly, G. W. MILLER.

Ashland, Schuyl. co., Pa., June 3, 1880.

Dr. B. J. Kendall & Co., Gent's.—A case of spavin that came under my observation was entirely cured by one bottle of your Kendall's Spavin Cure, and the horse sold afterwards for two hundred dollars.

Yours truly,
"The" Druggist. CHAS. H. BARNARD

KENDALL'S

Spavin Cure on Human Flesh.

Bakersfield, Vt., Dec. 23, 1879

B. J. Kendall & Co., Gents.—I wish to add my testimony in favor of your invaluable liniment, "Kendall's Spavin Cure." In the spring of 1862 I slipped on the ice and sprained my right limb at the knee joint. I was very lame and at times suffered the most excruciating pain. I wore a bandage on it for over a year, and tried most everything within my reach, but could find nothing that would give me permanent relief. When I overworked, it would pain me very much. In April, 1878, I began to think I should be a cripple for life; but having some of Kendall's Spavin Cure thought I would try it. I used one-third of a bottle, and experienced relief at once. The pain left me and has not troubled me since. I feel very grateful to you and would recommend Kendall's Spavin Cure to all who suffer with sprains or rheumatism.

Yours truly, Mrs. J. BOUTELL.

Kendall's Spavin Cure,

KENDALL'S SPAVIN CURE is sure in its effects and certain in its action as it does not blister, yet it is penetrating and powerful to reach every deep seated pain or to remove any bony growth or other enlargement, such as spavins, splints, Curbs, Callous, Sprains, Swellings, any Lameness, and all Enlargements of the Joints or Limbs, or Rheumatism in Man, and for any purpose for which a Liniment is used for Man or Beast. It is now known to be the best liniment for man ever used, acting mild yet certain in its effects.

Send address for Illustrated Circular which, we think, gives positive proof of its virtues.—No remedy has ever met with such unqualified success to our knowledge, for Beast as well as Man.

Price $1 per bottle, or six bottles for $5. All Druggists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors. DR B. J. KENDALL & Co., Enosburgh Falls, Vt.

—A woman wears her watch at her girdle because she is used to waste time.

—The man who fails in business, but continues to live in luxury, is a thief.

—A woman fell dead at Bloomington, Ill., when told that her daughter had eloped.

☞ We have tested the invaluable qualities of Robert's Horse and Cattle Powders upon our own stock, and in justice of our fellow citizens, deem it our duty to recommend the same to all owners of stock, not only in cases where stock is sick, but find it very beneficial to new milch cows, as well as to the general appearance of the horses and other stock; it cost only 25 Cents, and guarranteed to effect a cure, if given in time.

—Remember the poor, and if possible do something to make them remember you.

—There are some men so mean that they will not give others the benefit of a doubt.

—The legend "In God we trust," on the counterfeit dollar, shines out as bright as a black eye.

☞ We notice that a great many proprietory medicine men, are advertising in such a manner, as to lead the public, and particularly the retail druggists to believe that the sale of their goods is so great, that unless their order is sent in early, they will be unable to fill them. We however notice one exception to this rule in the case of the Sines' Mf'g Co., of Philadelphia, Pa., who are honest enough to state, that no matter how fast the orders come in for Sines' Syrup of Tar, Wild Cherry and Hoarhound they shall all be filled. Their sales on this preparation last year was 800,483 bottles; their facilities for making at present are 1,000,000 bottles per annum; but let no druggist or customer be alarmed, that their will ever be a corner in Sines' Tar, for should the trade demand 2,000,000 bottles they can be had, and from our experience with it as a cough and cold remedy, we have no doubt that its sales will soon reach the last named figures.—*San Francisco News and Dispatch.*

—Poor people eat mutton because it is sheep, and rich people eat vension because it is deer.

—Wood is so expensive now-days in Connecticut that the real nutmegs are cheaper than the Connecticut article.

☞ "A horse! a horse! my kingdom for a horse!" when King Richard spoke these words on Bosworth field, he undoubtedly meant a horse which had been using Robert's Celebrated Horse Powders, as no other animal would have conveyed him to a safe place in the quickest possible time. Price 25 Cents—sold everywhere.

"Is it true, Harry, that you have broken off with Markaway's daughter?" Alas, yes! I was forced to, although she is a charming woman." "Why?" "Incompatibility of complexion. She does not suit my furniture."

☞ Marriages have increased 40 per cent. since young men have learned of the soothing effect of Sines' Tar, Wild Cherry and Hoarhound, upon babies. Young man if you keep a bottle on hand for an emergency, you are safe in bringing things to a climax.

Immediate Relief from Asthma and Hay Fever.

THE SCOTTISH THISTLE

Medicinal Fumers!

PATENTED DEC. 25th, 1879.

The Electric Light was a great discovery, but I claim that the *Scottish Thistle Medicinal Fumers* is a greater one, owing to the great amount of suffering they have relieved, and the cures they have effected. I suffered from Asthma for fifteen years in Scotland and America and I am now completely cured. I have been studying the inhaling process for years, and as a result I now give the world the *Medicinal Fumers*, the most effective, and by far the most convenient preparation ever offered to the public, for Asthma and Hay Fever, also Sore Throats, Hoarseness from Coughs, Catarrh, Bronchitis, Neuralgia and Diphtheria. Cure your Sore Throat with these Fumers and you will hear no more of Diphtheria. They are invaluable for public speakers and singers.

They are put up in Cedar boxes, and can be carried in the pocket, and used at convenience. If you cannot get them from your Doctor, or Druggist, send direct to the manufacturer, who will send them to all parts of the world, postage free.

A child can use these Fumers, as they do not have to be smoked. *Price, One Dollar per Box.*
