# The Carbon Advocate.

H. V. MORTIMER, . . . EDITOR

LEHIGHTON, PA.

SATURDAY, DECEMBER 31, 1881.

—We greet our friends to-day with a wish for a HAPPY NEW YEAR and a continued enjoyment of health and prosperity through the year 1882.

—Ex-Secretary Blaine is very busy explaining his correspondence with our Ministers abroad. As an explainer, Mr. Blaine is, as he always has been, a decided success.

—Judge Hunt, the present Secretary of the Navy, is said to be very anxious to get back upon the bench of the Court of claims, a life-office which he resigned to accept his present position.

—Bishop McQuaid, of the Catholic Diocese of Rochester, N. Y., denounced the Land League in a sermon recently, and now the League retorts by declaring that the Bishop is not a native of Ireland and cannot speak intelligently upon the subject.

—President Arthur and his friends will watch the future movements of ex-Secretary Blaine with a great deal of interest. Mr. Blaine has the presidential fever just as bad as ever, and all his energies will be bent toward succeeding Arthur as the standard bearer of his party in 1884.

—Governor Cornell, of New York, ever since his elevation to office, has been industriously at work to secure a re-nomination when the time arrives. There is now a probability that he will be headed off in the race by John H. Starin, a very wealthy ex-member of Congress, who is not afraid to put his money where it will do the most good, when the stakes are political honors.

### BALLOONING.

Considerable interest is now felt in ballooning, and the lovers of aeronautics are evidently determined that something shall be done to increase the usefulness of this department of science. The Balloon Society, formed in England some months ago, is now followed by a similar association in Berlin, whose interests to hold an Aeronautical Exhibition some time during 1882. Among the plans proposed to the British Balloon Society, is that of a balloon to be kept under control by means of compressed gas. The gas would be stored in a soluble tank under pressure, and the balloon would be reduced in size or enlarged at pleasure by admitting or withdrawing gas—which might be effected by simply turning a crank. The balloon would, of course, fall when reduced in size, and rise as it became expanded, so that ballast and waste of gas would be rendered unnecessary. Improvement in another direction is still sought by aeronauts who are striving to travel considerable distances in pr determined courses. Little success has attended these efforts. The most important ballooning scheme now before the public is Commander Cuoyne's project for reaching the North Pole. He proposes to travel by sea as far as practicable, and to complete the distance to the Pole in immense balloons. He is very sanguine of success. It is to be sincerely hoped that the thought and money now being devoted to air navigation may lead to useful results. Progress, thus far, has been very slow, and, it must be confessed, that little material advance has been made in this branch of science since the time of Montgolfier.

## From the County Seat.

We greet you one and all with happy cheer
And wish you all a prosperous New Year.
May the year eighteen hundred and eighty two
Bring its choicest blessings to all of you.

The year eighteen hundred and eighty-one
With its checkered record is past and gone,
It was compelled to leave with all its faults
To slumber beneath cold oblivion's vaults.

With its blasted hopes and sore bereavements,
And its daring deeds and bold achievements,
With its apprehensions and trembling fears
And its painful sufferings and melting tears.

With the loss of our loved Chief Magistrate
By a cursed fiend, and hellish ingrate,
Who with deliberate and fiendish intent
Cruelly shot down our noble President.

Thus unexpected and without warning
All civilized nations were draped in mourning.
To honor all they reasonably can
The dust of one of earth's best noblemen.

With its shrouded dead and passing coffins
Its lonely widows and homeless orphans,
With its devasting conflagrations
And its bewildering consternations.

With its singular and strange convictions
And fearful Astrological predictions;
With its earthquakes and frightful shocks
And the rising and falling of stocks.

Of the ice bound Jeanette and her crew
The Mt. Wellington and Vigilent too,
Of the anxious and mingled hopes and doubts
On account of their uncertain whereabouts.

Of the dishonest Star route overseers
And many defaulting Bank cashiers
Of proceedings in court strange and new
By the shameful conduct of Frank Guiteau

Of its many happy weddings and births
And its joyful festivities and mirth,
Of its moral and religious people
And their fine churches and lofty steeples.

Of its prospects glorious and bright
And the wonderful electric light
Of the telephone's growing space
By its bringing distance face to face.

All things taken in consideration
We are indeed a wonderful nation
Moving constantly on with rapid strides
Making important improvements on all sides.

Let us therefore constantly bear in mind
In order to prosper we must be kind
As a nation grows wiser and better
And looses every inhuman fetter.

For all are out on life's tempestous sea
Swiftly gliding towards eternity
For all, yes all must share the common lot
And slumber with things that are forgot

May all when life's short work is past
Enjoy eternal peace at last
When the cycles of rolling years shall be
Lost in the Ocean of eternity

—The Lehighton Evangelical Sunday school held its Christmas entertainment last Monday evening. Notwithstanding the inclemency of the weather the church was crowded with an interested and appreciative audience. The little ones had the "floor" and held it all evening to the great satisfaction and merriment of all. Two beautiful Christmas trees were smiling upon the children all evening, and finally they broke out in a broad laugh and everybody received a present—and everybody was pleased—especially the pastor and his wife who were *snitted* and *dressed* to the tune of $50. Mr. W. W Bowman, the hard-working Superintendent, merits the praise of all for the interesting programme presented.

☞ Dr. Pierce's "Golden Medical Discovery" has become so thoroughly established in public favor that were it not for the forgetfulness of people it would not be necessary to call attention to its power to cure consumption, which is scrofula of the lungs, and other blood diseases, as eruptions, blotches, pimples, ulcers, and "liver complaint."

### RESCUED FROM DEATH.

The following statement of Wm. J. Coughlin, of Somerville, Mass., is remarkable that we beg to ask for it the attention of our readers. He says: "In the fall of 1876 I was taken with a VIOLENT BLEEDING OF THE LUNGS, followed by a severe cough. I soon began to lose my appetite and flesh. I was so weak at one time that I could not leave my bed. In the summer of '77 I was admitted to the City Hospital, while there the doctors said I had a hole in my left lung as big as a half dollar. I expended over a hundred dollars in doctors and medicine. I was so far gone at one time a report went around that I was dead. I gave up home, but a friend told me of R. W. M. HALL'S BALSAM FOR THE LUNGS. I laughed at my friends, thinking that my case was incurable, but I got a bottle to satisfy them, when, to my surprise and gratification, I commenced to feel better. My hope, once dead, began to revive and to-day I feel in better spirits than I have the past three years.

"I write this hoping you will publish it, so that every one afflicted with Diseased Lungs will be induced to take DR. WM. HALL'S BALSAM FOR THE LUNGS, and be convinced that CONSUMPTION can be Cured. I have taken two bottles and can positively say that it has done more good than all the other medicines I have taken since my sickness. My cough has almost entirely disappeared and I shall soon be able to go to work." Sold by A. J. DURLING, Lehighton, and all druggists. Dec. 18, 1880-ylow
