SCIENTIFIC NOTES. -By causing finely givided alkaline earths to percolate through a gas-flame, Mr. W. L. Scott has succeeded in gaining a considerable increase of light.

-Messrs E. and H. B cquerel for a 780 15 that, contrary to the general belief, thick covering of snow does not protec the soil, as effectually as turi from the 10250 07 severest cold and frost, -The treg, tead, salamander, news

etc., are found to exercte special poisons From the glands on the neck of a fro J. P. SMITH, Collector, in account with the M Paul Bert has obtained a I quid which caused the death of a sparrow to which i was administered. -A peculiar and newly observed prop erty of tin is being investigated by a Mos-

cow scientist. Sometin canakept in onof the G vernment buildings during the cold weather showed blisters, then holes, and finally fell to powder. -Insects, caterpillars and larem are not destroyed as is often believed by

6 3001 22 intense cold or heavy frosts. After an exposure to a temperature of eleven dehe undersigned duly elected Auditors grees below zero the common caterpillar has revived on the return of sufficien going accounts are correct to the best -It has been observed that when liquid

mapures are too much diluted trees are injured thereby on account of being com pelled, in seeking nourishment, to take ent of Receipts & Expenditures up more water than is needed; but, on the other hand, too strong solutions cause a decay of the roots,

-Dr. Wollaston's observation that cer tain sounds are insudible to many ears Year ending April 1, 1882. was recently illustrated by Prof. Tyndall. During a lecture he blew a small whistle the low, shrill note of which instantly agitated the sensitive flame, while full half of the audience failed to hear the sound.

-The theoretic work obtained from the consumption of an onnce of various 220 75 substances is thus stated by Prof. Sylvanus Thompson: One ource of hydrogen gives 2 925 000 foot pounds; of coal, 695 000 foot pounds; zinc, 113.009 foot pounds; gurpowder, 100 000 foot pounds; and copper, 69,000 foot pounds.

-The general belief that the loints of animals have always a synovial fluid serving as a lubricant is, according to Dr. Lombert, an error. The elephant, with his relatively moderate motious and great weight, has admirable cartilages but absolutely no lubrication therefor.

-A prejudice has existed for some time in European markets against American ments, due to a belief that such sup-7 50 plies are largely infected with trichne M. Coolin recently assured the Paris a co Academy of Sciences that American salt 2 · 00 meet, as now imported into France, may transmit trichinesis only in very rare cases of imperfect salting.

-In concluding a course of lectures upon the "Ancient World and the Appearance of Man," Prof. Boyd Dawkins cure. All other pretended cures only re-lieve for a time and then make you many said that a study of the past had shown hat continued struggles with nature had developed man's powers until he had his belief that in coming ages man would | himself.

the state of savagery of the primeval map, enemy. -A French journal recommends a fire 6 176 38 test for determining the quality of seeds. Samples are placed one at a time upon live coals. If the combustion is slow and perfume for the toilet. 8 786 65 Samples are placed one at a time upon 941 30 quiet, it may be safely decided that the seed contained a diseased germ; but if \$ 17.9 98 the seed turns and leaps about, producing a dry sound, it may be inferred to to make friends. have good germinative qualities. The good quality of larger seeds, such as acorns and chestouts, will be indicated draw a straight one. by a detonation of the seed soon after being thrown into the fire.

Prof. Foote, of Philadelphia, has a group of quartz crystals measuring about four feet by three in superficial area. A group in the University of Nanles with a found them to be good medicines, and would be groun in the University of Nanles with a found them to be good medicines, and would be ground them. group in the University of Naples weighs recommend them to all sufferers from Liver s 692 Th three and a quarter feet long and five and three and a quarter feet long and five and s 2070 M a half feet in circumference, and weighs Elsah, Iii. 1070 es 870 ponnds; another crystal, at Paris, is three feet in diameter and the same in tens of crystals were discovered in one this mind itself. - Anon. HENRY TRAPP, Overseer of the Poor and ago, and were sold for \$300,000.

-Dr. Koch, of Berlin, claims to have fature days, -[John Brown, discovered the nature of the parasite 55:0 Balance in Treasury and uncollected of consemptive individuals are pound to less Commir on a experience 14:55 be swarming with the highly infective perched on Alps; and pyramide are pyr-We the undersigned Auditors of the Bor- organisms. man of mark or pre-eminence in sole or literature which was not assymptric To be asymmetric is simply to lack syp

aving seen shalls of children at Capfork altered into quite conical shape by constantly applied manual compression f their in thers; but this was believed se impossible by the celebrated anatomi K. E. Von Par, who fancied that there must be some mistake in the informatio even by the Scotch naturalist. In 1880 lowever, Dr Mickluche-Mickay bad an operation, at Mabiak in the islands of Torres Straits, where he saw it performed daily on many el-ildren, and fully convinced himself that the deformity seen i the adults is the result of this manual day, during the first weeks of the child's life, in compressing the heads of their infants to give them the conical shape, At Mariak the deformation is designed, but Dr. Maclay observed on the east side of New Chipen numerous cases of ponintentional distrion of the skulls of adult females, arising from their practice of carrying heavy burdens suspended by bands resting across the head-causing a permanent depression, often goite marked. Dr. Muclay's testimony seems to prove conclusively that the human skull play be greatly altered in shape by artis ficial means.

BED-RIDDEN AND CURED.

W. E. Hussins, of Emporia, Kansas, says that his wife had been sick nearly seven years, and for the last four months bed-ridden. She has been treated by a number idden. She has been treated by a number f physicians and only grew worse. Her trention was called to Dr. Pierce's "Golden Medical Discovery" and "Favorie Prescrip-tion," which she commenced using in one week she could sit up, and in three weeks could walk alone.
