The World's Epileptic Institute.

While passing through St. Joseph Mo., and having heard a great deal about the World's Epileptic Institute located here, I concluded to pay the celebrated institution a short visit. We were met by Dr. Richmond, the proprietor, who has gained a reputation as broad as the land. He is rather small yet prepossessing man, of very affable and gentle manly manners. He gave us a hearty welcome, and took great pains in showing us though his palatial and mammoth institution. It is a five story building, 200x180 feet, with basement, and contains over three hundred rooms, and can accommodate five hundred patients and each and every room is furnished in the most elegant and lavish manner. But we will begin at the office, which is a large room furnished with rosewood furniture throughout. In the office are thousands of photographs of those who have been benefited by the Nervine. The walls are elegantly papered, and profusely decorated with rich and costly pictures, received here and there by busts in stone and bronze of eminent men of this and other countries. In connection with the Institute is a mammoth printing house and bindery, occupying six or seven large rooms, and a score of presses are kept running night and day turning out work for the doctor. The office is one of the finest and most complete in the west, and he has the rooms decorated, carpeted and trimmed up with as much care and luxury as in his own private office. On the first floor of this mammoth building is the doctor's private office, the printing department, bindery, packing, shipping, selling and consultation rooms, barber shops, drug store, etc., all of which are fitted up regardless of expense. The second floor has the hotel office, dining room, billiard and smoking rooms, many guests chambers and several parlors. The third and fourth floors are all rooms, all of which are furnished with Brussels carpets and the finest furniture. The billiard room has six tables, all of which are free to the guests of the house and the doctor's friends. The bath room is large and neat, and is also free to guests. The entire building is surrounded on the east and south by an elegant five acre park, in which are lovely trees, beds of rich and rare plants, gravel walks and drives, fountains, arbors, and a most beautiful summer house. There are also a number of fountains that add wonderfully to the beauty of the park, which is truly one of the most lovely and attractive in the western country and the Institute has no equal for luxury and comfort in the world. Everything is complete, and the visitor is at once charmed with the entire place and its surroundings. An idea of the immensity of the doctor's business may be given when we say that on the day we visited the Institute he showed us into seventy rooms, and we saw the expressmen take over a hundred to the following points to ship something of hundreds of orders from all quarters of America: Lyons, France; Geneva, Switzerland, Madrid, Spain; Brussels, Belgium; Cape Town, Africa; Shanghai, China; Yokohama Japan; Bombay, India; Melborne, Australia. The doctor employs hundreds of men and women in his Institute in the several branches, aside from the immense force required to conduct the hotel. It is worth a visit, and Dr. Richmond extends to all a cordial invitation to come and see him. He and his wonderful medical discovery have given to St. Joseph a good name all over the habitable globe.

MISCELLANEOUS.

A Good Foundation.

In American households the prevailing complaints are weakness of the stomach and its consequence, indigestion, nervousness and rheumatism. Such sufferers can lay a good foundation for health by using Parker's Ginger Tonic as it tones up the stomach and nerves, and keeps the kidneys active to carry off the foul matter.—*N. O. Pycaune.*

FARMERS' COLUMN.

The Turnip Crop.—Profitable.

No crop makes better returns for labor bestowed than turnips. The seed may be sowed any time from the first of June throughout August, in many localities below the isothermal of say the north line of Connecticut. It may be sowed broadcast, in drills or rows, or as a "cattle crop," among corn; or turnips may be used to seed to grass with, sowing both the turnip and grass seed about August 1st. For turnips alone the preparation of the ground is simple. It needs good plowing and harrowing if in fair heart, but a dressing of 400 pounds of bone dust or 250 pounds of superphosphate to the acre will almost insure a good crop. We rarely have such dry weather that turnips will not start in July, and soon as they make leaf, heavy dews seem to be enough to keep them growing, but last year was an exception in this part of the country. In many fields turnip seed on dry ground did not germinate, or at least did not make any show above ground.

In sowing turnips broadcast the greatest care must be taken to have them thin enough. A pound of seed to the acre is all that should be sowed, and this be divided, the whole piece being sowed twice at right angles. In Europe the seedsmen use old seed baked, or baked rape seed, to mix with turnip seed as an adulteration. If we could buy here such old baked seed to mix it ourselves—say five pounds of baked with one of live seed, and thus be able to make a fair cast, instead of throwing little pinches of seed as we now do, it would save a good deal of trouble. Sowed in drills, turnips must be thinned. Much rank manure gives a strong bad flavor. Turnips ought never to have the first chance at a dressing of yard or stable manure, but to come in as a second crop. As to varieties, there are two widely different classes, and intermediate varieties without number which is hard to classify. Swedish or Russian turnips, generally known as "Ruta bages" are a very distinct, hard fleshed, glossy leaved kind, occurring in many varieties, that need better soil, earlier sowing and better culture than the soft fleshed or English turnip which is rough-leaved, grows most rapidly, is a voracious feeder, doing well and making a bulky watery crop where Swedes would do very little, and yet it is a question whether the small crop of Swedes would not contain nearly as much nutriment as the soft turnips. Between these two extremes of hard fleshed and soft-flesh ed kinds are many varieties partaking in a measure of the hard-fleshed character of the Swedes, but generally regarded and treated as belonging to the common English species. Such are the "Yellow globe," "Yellow-stone," "Dutch," etc. As a rule it is best to sow Swedes as early in July as possible, the "Globe" and "Stone" turnips as early as the 25th, and the soft turnips, "Strap leafed flat," "Cow horn," etc., by the 10th of August. The last named is the best to seed down to grass with, and on good soil not clayey, turnips and clover seed may be mixed together, using 15 pounds of clover as some will winter kill.—*American Agriculturist.*

FARM NOTES.

—More potatoes have been planted this season than usual.

—The willow, cottonwood and Lombarby poplar can be grown from cuttings.

—New flour from the present wheat crop is being offered in the Georgia markets.

—The army worm has appeared in Ohio, and has already done considerable damage.

—Ashes from corncobs contain three times as much potash as the average wood ashes.

—The ensilage advocates say that their opponents are those who have not tested the process.

—It is said that permanganate of potash is an effectual antidote for the venom of snakes and insects.

—The fly attacks short wooled sheep more injuriously than the long-wooled, says a Western breeder.

—Large farms in England are slow in being occupied by tenants, while small holdings are quickly taken.

—In 1850 there were only 872 farms in California, and according to the last census (1880) there were 35,934.

—The average quantity of milk required for one pound of butter at the creameries is about twenty-two pounds.

—Mr. Erastus Bailey, Little Compton R. I., has kept 1600 to 1700 hens during the past year, and has realized from each an annual profit of $1.75.

—The Legislature of Missouri has passed a bill forbidding the sale or manufacture in the State of any imitation of butter, whether represented to be genuine or not.

—Squealing hogs do not fatten as readily as those that are quiet. Sometimes the fault is in the breed, but regular feeding three times a day, and enough of it, will keep them contented and in good growing and fattening condition.

—To make cisterns and tanks water-tight paint thickly on the inside with a mixture of two parts of melted glue and one of linseed oil, boiled with litharge. In forty eight hours the coating will be so hard that the tank can be filled with water.

—Less grain and more grazing tends to a better development of frame and muscle than when corn is fed to hogs exclusively. It is best to push hogs for growth by giving a variety of feed rather than attempting to keep them fat. Build the frame first and lay on the fat afterward.

—Turnips can be sown at any time from now to the middle of August. The richer the soil the better. Fineness of filth is everything for turnips and in order to guard against the fly use an excess of seed. They are the cheapest crop produced on the farm and one of the most valuable for feeding in late fall and early winter.

—The quantity of saliva secreted by animals is surprising. Experiments by Lassaigne show that 100 pounds of dry hay fed to a horse required a secretion of 400 pounds of saliva; 100 pounds of oats required a secretion of 115 pounds of saliva, while 100 pounds of green food required but 40 pounds of saliva to prepare it for swallowing.

—Mangels have far deeper roots than turnips and also a larger period of growth. They have a great capacity for drawing food from the soil, including both nitrogen, potash and phosphoric acid. When removed from the land, mangels are one of the most exhaustive crops a farmer can grow.

—Pony, weak, and sickly children, need rown's Iron Bitters. It will strengthen and invigorate them.

SAMARITAN

NERVINE!!

Samaritan Nervine

Cures epileptic fits, spasms, convulsions, St. Vitus dance, vertigo, hysterics, insanity, apoplexy, paralysis, rheumatism, neuralgia and all nervous diseases. This infallible remedy will positively eradicate every species of nervous derangement, and drive them away from whence they came, never to return again. It utterly destroys the germs of disease by neutralizing the hereditary taint or poison in the system, and thoroughly eradicates the disease, and utterly destroys the cause.

Samaritan Nervine

Cures female weakness, general debility, leucorrhœa or whites, painful menstruation, ulceration of the uterus, internal heat, gravel, inflammation of the bladder, irritability of the bladder. For wakefulness at night there is no better remedy. During the change of life no female should be without it. It quiets the nervous system and gives rest, comfort and nature's sweet sleep.

Samaritan Nervine

Cures alcoholism, drunkenness and the habit of opium eating. These degrading habits are by far the worst evils that have ever befallen suffering humanity. Thousands die annually from these noxious drugs. The drunkard drinks liquor not because he likes it, but for the pleasure of drinking and of treating his friends, little thinking that he is on his road to ruin. Like the opium eater, he first uses the drug in small quantities as a harmless antidote. The soothing influence of the drug takes strong hold upon its victim, leading him on to his own destruction. The habits of opium eating and liquor drinking are precisely what eating is to alimentiveness, as over-eating first inflames the stomach, which redoubles its cravings until it paralyzes both the stomach and appetite. So every drink of liquor or dose of opium, instead of satisfying, only adds to its fierce fires, until it consumes the vital force and then itself. Like the glutonous tape worm, it cries "Give, give, give!" but never enough until its own rapacity devours itself. Samaritan Nervine gives instant relief in all such cases. It produces sleep, quiets the nerves, builds up the nervous system, and restores body and mind to a healthy condition.

Samaritan Nervine

Cures nervous dyspepsia, palpitation of the heart, asthma, bronchitis, scrofula, syphilis, diseases of the kidneys and all diseases of the urinary organs. Nervous debility, caused by the indiscretions of youth, permanently cured by the use of this invaluable remedy. To you, young, middle-aged and old men, who are covering your sufferings as with a mantle by silence, look up, you can be saved by timely efforts, and make ornaments to society, and jewels in the crown of your Maker, if you will. Do not keep this a secret longer, until it saps your vitals, and destroys both body and soul. If you are thus afflicted, take Dr. RICHMOND'S Samaritan Nervine. It will restore your shattered nerves, arrest premature decay, impart tone and energy to the whole System.

WHY

Every Dairy Farmer, Producer and Dealer in Dairy Products should Subscribe for

The AMERICAN DAIRYMAN.

BECAUSE it is the only paper which in any way attempts to cover this special field of commercial enterprise.
BECAUSE it is the only publication in which are to be found regularly, and with certainty, reports of the proceeding of all Dairymen's Associations.
BECAUSE it is the only medium through which producers and dealers in butter, cheese and dairy products are enabled to communicate with each other on topics connected with their mutual interests.
BECAUSE it is the only means by which new inventions for the dairy can be brought directly to the attention of the specific class for whom they are designed.
BECAUSE it fights frauds and monopolies of every kind, and contends for fair play and fair dealing in the market of the world.
BECAUSE the most prosperous and successful dairymen in all parts of the country take it, sustains and like it.
BECAUSE no dairymen can afford to be without it. Ignorance purchased by the saving of $1.50 per year will, in the end cost many times that amount.

"The American Dairyman" is Published every Thursday, for $1.50 per year, postpaid. Single copies, Five Cents.

All communications should be addressed to

TOLU ROCK and RYE.

For COUGHS, COLDS, SORE THROAT, BRONCHITIS, ASTHMA, PNEUMONIA, CONSUMPTION, Diseases of THROAT, CHEST AND LUNGS.

BALSAM OF TOLU Has always been one of the most important weapons wielded by the MEDICAL FACULTY against the encroachments of COUGHS, COLDS, BRONCHITIS, ASTHMA, SORE THROAT, CONSUMPTION in its incipient and advanced stages, and all diseases of the THROAT, CHEST and LUNGS, but it has never been so advantageously compounded as in the TOLU, ROCK and RYE. Its soothing Balsamic properties afford a diffusive stimulant and tonic to build up the system after the cough has been relieved. Quart size bottles, Price $1.00.

CAUTION! Do not be deceived by dealers who try to palm off Rock and Rye in place of our TOLU, ROCK AND RYE, which is the ONLY MEDICATED article—the genuine has a Private Die Proprietary Stamp on each bottle, which permits it to be Sold by Druggists, Grocers and Dealers Everywhere, WITHOUT SPECIAL TAX OR LICENSE.

obtained for Inventors in the United States Canada and Europe, at reduced rates. With our principal office located in Washington, directly opposite the United States Patent Office, we are able to attend to all patent business with greater promptness and despatch and at less cost than other patent attorneys who are at a distance from Washington, and who have, therefore, to employ "associate attorneys." We make preliminary examinations and furnish opinions as to patentability, free of charge, and all who are interested in new inventions and patents are invited to send for a copy of our "Guide for obtaining Patents," which is sent free to any address, and contains complete instructions how to obtain patents and other valuable matter. We refer to the German-American National Bank Washington, D. C.; the Royal Swedish, Norwegian and Danish Legations, at Washington; Hon. Jos. Casey, late Chief Justice U. S. Court of Claims; to the Officials of the U. S Patent Office, and to Senators and Members of Congress from every State.
