MALARIA

Malaria is an abnost indescribable malady which not even the most talented physicians are able to fathom. Its cause is most frequently ascribed to local surroundings, and there is very little question, but this opinion is substantiated by facts. Malaria does not necessarily mean chills and fever while these troubles usually accompany it. It often affects the sufferer with general lassitude, accompanied by loss of appetite, sleeplessness, a tired feeling and a high fever, the person afflicted growing weaker and weaker, loses flesh tlay after day, until he becomes à mere skeleton, a shadow of his former self.
