THE SILVER LINING.

There's never a day so sunny; But a little cloud appears: There's never a life so happy But has its time of tears; Yet the sun shines out the brighter

There's never a garden growing With roses in every plot; There's never a heart so hardened But it has one tender spot; We have only to prune the border

There's never a sun that rises But we know 'twill set at night; The tints that gleam in the morning At evening are just as bright; And the hour that is the sweetest

But there's never a dream so happy But the waking makes us sad; There's never a dream of sorrow But the waking makes us glad;

TRIP LIGHTLY.

Trip lightly over trouble, Trip lightly over wrong, We only make grief double By dwelling on it long.

Why clasp woe's hand so tightly? Why nigh o'er blossoms dead? Why cling to forms unsightly? Why not seek joy matead? Trip lightly over sorrow.

The sun may shine to morrow And gayly sing the lark: Fair hope has not departed. Though roses may have fled; Then never be down hearted

Though all the days be dark.

But look for joy instead. Trip lightly over andness, ing to betray me?" Stand not to rail at doom; We've no pearls to string of gladness On this side of the tomb. Whilst stars are nightly shining,

Loewy, is now in opera-"No, sir, he couldn't. Think of such tion at the Paris Observatory. The peignorance in this enlightened age! When cultarity of the instrument is that, in

> out rising from his table. -A distinguished German pathologist, Prof. Schmale, advises all who wish to attain a long life to swallow daily the "I see you are, but when a man calls juice of six or eight lemons. He believes me a liar I want to prove that I ain't. that the citric acid will quickly dissolve and carry off the surplus of food and decaying matter, and almost indefinitely

> -In an experiment described to the and it was only after he was certain that French Academy by Mona Bergeron, a miniature imitation of the craters in the moon is produced by sending a current of hot air through a brass tube into a mass of melted but gradually cooling metallic alloy. Mons. Bergeron looks upon the experiment as a suggestion of the manner in which the lunar craters may have been formed.

> > -A disastrons fire in a Sicily sulphur

mine had a very curious origin. A rope

broke when drawing a heavy loaded

wagon up an incline, and the rapid mo-

tion of the wagon as it rushed back into the mine developed heat enough to inflame the highly combustible ore. The Banish all health, nervousness, vexation, fire spread so quickly through the mine retfulness, etc., by using Brown's Iron that thirteen workmen were unable to escape, and many others were injured. -Mr. W. H. Preece, the electrician of the British Post Office, bas tried the iu--A regiment with a military band in teresting experiment of telegraphing without the aid of wires across the chappel asparating the Isle of Wight from Eng-- namely, at Postsmouth and Ryde, separated by six miles of water, and at Hurst -When the poet wrote "the bravest Castle and Sconce Point, with one mile

and Hurst Castle plates were connected

passing through Newport, the circuit be-

ing completed by the sea Signals were

readily possed by the Morse system, but telephonic speech was impracticable. -Concerning of ctro-horticulture, Dr. C. W. Siemens, in his address as President of the British Association for the Advancement of Science, stated that he had only to add to his previously regorded obs reations that wheat, burley, oats -The shrewdold man told his emiable and other ocreals sown in the open air. had shown a marked acceleration of growth under the influence of the electric light. This was not very apparent until ones, you must indeed, "said she. "Randolph is in the drawing room, and asks
to see you. Don't be odd. Here, Lusibe do your young lade's hair."

Extravagance

is a crime; and isdies one soil afford to do
without Dr. Pierce's "Favorite Pre-cription"
which by preserving and restoring health,
preserves and restores that beauty which
lamp of 4 000 could preserv already. lamp of 4 000 candle power, placed about sisteen feet above the surface, developed -Some hotel clerk must have origin- with extreme rapidity, so that by the end the ears in full bloom, when those not -In trade what article is usually con- under the influence of the lump were less sidered as occupying the foremost rank? than two feet in height, and showed no sign of the ear.

-It is fun to see the weather bureau it with all the unconscious grace and dig-"We shall se , my love. At any rate dodging about in the vain hope of hitting nity of an ideal duchess. Herfather was a bricklayer, I am told, her mother was -An advertisement in a Western paper a washerwomm, and she herself ended ber her own living. And here she is-a bair, regular features, a tall, shapely, well-carried figure, and perfectly ladyacheof friend, who lived in one of the loveliest countries in Pennaylvania, that I had mot, the preceding June, Herbert Stutting my hand involuntarily over Stanley. For the first time in my life I had found in him a perfectly constant to the loveling June, Herbert Stutting my hand involuntarily over the first time in my life I had found in him a perfectly constant. The stanley is one who does her him which is one who does her with the precision which is one who does her who does her with the problem. Stanley is one who does her with the problem of the problem of the problem of the blood purifier and strengthener. It amongs the began is one who does her with the problem is one who does her with the problem. A Smart Man is one who does her with the problem is one who does her with the blow will fall heavily on her.

Stanley. For the first time in my life I had not be a second to the problem of the problem of the problem. The problem is one who does her with the blow will fall heavily on her.

Stanley. For the first time in my life I had not be a second to the problem of the problem of the problem of the problem of the problem. The problem is one who does her with the problem of the problem discase of the lungs.
