FARMERS' COLUMN.

Bules For Cooking Vegetables.

A French cook gives the following gene at rules for cooking all kinds of vegetables vegetables should be thoroughly washed in cold water and then dropped it to water which has been salted and is he ginning to boil. There should be a table spoonful of salt for each two quarts of water. If the water bolls long before the vegetables are put in, it has lost all its games, and the mineral ingredients are deposited on the bottom and sides of the kettle, so that the water is flat and tasteless, and the vecetables will not look well or have a fine flavor-The time for beiling green vegetables depends upon the age and time the vegetables have been gathered and the more quickly they are cooked. Below is a very good time

table for cooking veretables. Potatoes boiled, thirty minutes. Petatoes baked, forty-five minutes. Sweet potatoes boiled, fifty minutes. Sweet potatoes baked, sixty minutes. Squash boiled, twenty-five minutes. Green peas boiled, twenty to forty mi-

Suelled beans boiled, one hour. Biring beans boiled, one to two hours. Green corn, thirty minutes to one hour Asparagus, fifteen to thirty minutes. Spinsch, one to two hours. Tomators, fresh, one hour. Tornatoes, canned, half an hour. Cabbage, forty-five minutes or

Cauliflower, one or two hours. Dandelions, two or three hours. Beets greens, one hour. Onious, one or two hours. Beets, one or two hours. Turnips, white, forty-five minutes to one

Parsnips, one or two hours. Carrots, one or two hours.

Experiments in Feeding. The superintendent of the medel form a Suelph, Canada, gives as below the results of some experiments made there in cattle breeding. 1. A steady frosty winter is better than an

pen one in feeding cattle. 2. An avorage 2 or 3 year old steer wi eat its own weight of different materials it two wacks. 3. Two or 3 year-old cattle will add one

third of a pound more per day to their weight upon prepared bay and roots than ipon the same materials unprepared. 4. It is 30 per cent, more profitable to premature, and dispose of fattening cattle at two years old than to keep them up to three

5. There is no loss in feeding a cattle beast well upon a variety of materials for the sake of manure alone. 6. Farm-yard manure from well-fed cattle 3 years-old is worth on an average of

\$2 30 per ton. 7. A 3-year-old cattle beast, well fed wil make at least one ton of manure every mon'h of winter. 8. No cattle beast whatever will pay for

the direct incresse to its weight from the consumption of any kind or quantity of 9. On an average it costs twe've cents

for every additional pound of flesh added to the weight of a 2 or 3 year-old fattening 10. In Canada the market value of store

cattle can be incressed thirty-seven pe cent. during six months of finishing by good feeding. 11. In order to secure a safe profit ne stere

cattle beast well done to, can be sold at les tnan 4j cents per pound (live weight). 12. In the fattening of wethers, to finish as sherlings, the Cotsweld and Leiceste grades can be made up to 200 pounds, the Oxford-down 180 pounds, and the South-13. A cow wintered upon two tens and

down (grade) 160 pounds each, live weight. a halt of hay will produce and far fron five tens of manure, provided she be well littered and none of the excrements shall be

Are You Aware

That a little water in butter will prevent t from burning when used for frying? That a little saltpetre worked into butte that has become sour or ranced will render

it sweet and palatable? That Pennyrayal distributed in places frequented by roaches will drive then away 7 That wild mint will keep rats and mice

out of your house? That Spanish brown, mixed with a little water, will make the hearths look pretty? A paund costs ten cents and will last three

months, use a little at a time. That leaves of parsley eaten with a little vinegar, will prevent the disagreeable consence of tainted breath by onions? That flowers and shrule should be ex cluded from a bed chamber?

That wil paintings hung over a mantle picco are liable to wrinkle with beat ? Marketing Poultry.

Poultry which it is not intended to win ter, are to be fattened before really severe weather comes on, otherwise money will be lost by them. They will barely hold their own in December on fred which caused them to increase rapidly in weight a month earlier. Those who have watched the market, know that autumn priors used by are highest a little before, and a lit le after Tranksgiving, say before the middle of November, and soon after the first of Decem bor. The reason is, that these who are fattening poultry keep them back for a short time before Thanksgiving day, and before Caristines time, in order to get them in prime order for sale at those times. The result is usually an over-stocked market. and plenty or cheap poultry. Soon after the first of January, prious go up again, and well they may, for one or two months' feed has been consumed, and very little weight

- Corne salt, in crystals, is the best to use for pickling.

-Honey should be kept where it is perfectly dry if desired to be in prime
