## THE N. Y. SUN.

Reasonable Prices

**NEW YORK, 1883.** 

More people have read THE SUN during the year just now passing than ever before since it was first printed. No other newspaper published on this side of the earth has been bought and read in any year by so many men and women.

We are creditably informed that people buy, read, and like THE SUN for the following reasons, among others:

buy, read, and like TRESUN for the follow-ing reasons, among others:

Because its news columns present in at-tractive form and with the greatest possible accuracy whatever has interest for human-kind; the events, the deeds, and missleeds, the wisdom, the philosophy, the notable folly, the solid sense, the improving nonsense—all the news of the busiest world at present re-volving in space.

the news of the busiest world at present revolving in space.

Because people have learned that in its remarks concerning persons and affairs The Son makes a practice of telling them the exact truth to the best of ability three hundred and sixt-rive days in the year, before election as well as after, about the whales as well as the small ish, in the face of dissent as plaintly and fearlessly as when supported by general approval. The Sus has absolutely no purposes to serve, saw the information of its readers and the furtherance of the common good.

no purposes to serve, save the information of its readers and the furtherance of the common good. Is everybody's newspaper. No man is so humble that The Sun is indifferent to his welfare and his rights. No man, no association of men, is powerful enough to be exempt from the strict application of its principles of right and wrong.

Hec. use in politics it has fought for a dozen years, without intermission and sometimes almost alone among newspapers, the fight that has resulted in the recent overwholming popular verdict against Robesonism and for honest government. No matter what party is in power, This Sun stands and will continue to stand like a rock for the interests of the people against the ambition of bosses, the encroachments of monopolists, and the dishoust schemes of public robbers.

All this is what we are told almost daily by our friends. One man holds that The Sun is the best religious newspaper ever published, because its Christianity is undilated with cant. Another holds that it is the best Republican newspaper printed, because it has already whippes, half of the raseals out of that party, and the proceedings against the other half with undeminished vigor. A litrid believes it to be the test magazine of general ilterature in existence, because its realors miss nothing worthy of notice that is current in the world of thought. So every friend of The Sun discovers one of its many sides that appeals with particular force to his individual liking.

If you already know The Sun, you will observe that in 1883 it is a little better than ever before.
