-"No sir," she said, "I'll not be found in company with one of those Harvard students. I don't want everybody staring at me, and thinking I'm a ballet-dancer.

-The sifeguard of freedom abides in maintaining the equal rights of all the people whether high or low rich news up to the time of going or po.r.

AYER'S Sarsaparilla

Is a highly concentrated extract of Sarasparilla and other blood-purifying roots, combined with Indide of Potussturn and Iron, and is the safest, most reliable, and most economical blood-purifier that can be used. It invariably capels all blood Poisous from the system, curiches and renews the blood, and restores its vitalizing power. It is the best known remedy for Scrofela and all Scrofulous Complaints, Erysipelas, Lizema, Ringworm, Blutches, Sores, Boils, Tumors, and Eruptions of the Skin, as also for all disorders caused by a thin and impoverished, or corrupted, milition of the blood, such as Ithenmatism, Neuralgia, Rheumatic Gout, General Debtilty, and Scrofnlous Catarri.

Inflammatory Rheumatism Cured. "AVER'S SARSAFARILLA has cured me of the Inflammatory Rheumatism, with which I have suffored for many years. W. H. Moone." Durham, Ia., March 2, 1882.

PREPARED BY Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggiste; Si, six bottles for So.

Like the well-wooded awarne and isgoons of the South; while to th porthward, forest slopes, bordering lake and ponds, or traversed by brooks and rive lets, are selected. The purely evergrees forests of the North rarely shelter it, since note, account, and other most are an imporaddress we will make an offer by which tant factor in the problem of life at certain easons in the year. Hence its present ome. Men, Women, Boys or Girls can do therein must be held as accidental. Bir it. H. C. WILKINSON & CO., 196 and wherever the coon is established, it wanders over wide stretches of territory in summer often miles away from its frome; absenting itself for days and even weeks, especialtiduring the wooling season, It is during such excursions that it is met with in the usen prairie, being led thereto, presumable search of grouse, plover, and other feetle red creatures and their nests, along with

nice, hares, and gopbers. North of Ohio and Indiana, the raccoo ibernates in Winter, but rarely, if ever, is lower latitudes. But even in his most ex reme northern habitant, the habit is by a neans general or constant, as with the besout appears rather as assumed, to correspond with diminished find supply. In Norther Michigan I have found them racing over the snow on bright and winter days, wid with the advent of extreme cold or storn weather, it retired again to its position store in the recess not its lair. At the same period, a 'pair held in confinement, who abundantly supplied with food, at no tinexhibited any tendency towards hiberth im, though constantly retoring alluface to their kennel of all articles backing to reasel warmth, preferring to make the eds upon the naged boards. Even during he collest days, when the thermome was down in the twenties below goro. I advent of a tub of water was heralded wi manufest delight, in the cold water of which they would paddle and play, and josh the ice about until they were welted to th

Shall We Prune in Autumn !

We clip the following from the Agrica To the above question which comes several authorities, we may docidedly, ye provided the question applies to new planted trees, those set last spring or with few years. The somer such trees has removing all dyspensia symptons. It does not hart the teeth,"

This should have been done, when the were planted, but have been done, when the oring work and the timidity of the ine; perienced, who are afraid to cut, trees a ton often set out just as they come from the nursery. Buch frees must somether lasse put into their final shape for bearing and the morner this is done, the better. Son books on fruit custore, the French especially give diagrams to show how the tree show. be stuped. These are well enough as ruits original dark color; stimulates the gestions, but as no two treesgrow poecial alcke, the only goldes in such matters or a general idea of the laws which regulatree growth, and common sense in their an plication. Working to pattern can not I tollowed. It one has a young orenard, th first point to be considered is the beight which he will make the bendant his track In localities where the summer is long on hot, it is clamed that low heads shade the tennik, and thus are a benefit. Others wish to have the heads high enough to allow it's passage of teams beneath their, if need be While there is no objection to cultivating crops in a young orchard, and indeed it a better to do this than to neglect the soil ex irely, the practice is becoming more gener al of seeding the bearing orchard to clover, end using it as a pasture for swine, to the untual benefit of pigs and trees. To neight of the heads being decided upon at branches that start below this should be renoved. The next point should de, to se cure an open and well-balanced head, with the main branches evenly disposed. Recond this, all branches that crowd, or croone another, all "water shoots," vigorougrowths that sometimes start up in the growing season, should be cut away. The season's growth being completed, the removal of branches at this time will rause no check, and as the branches to be go away are all small, no large wounds will be expected. Hence we say, by all means de uch pruning in autumn, while the weather s mild, and other farm work is not very
