Soil for hot beds. - If a supply has not been secured, take advantage of the first thaw, and place an ample stock of rie aght soil in the cellar, or under some sheler where it will not freeze. Hot beds .- For the majority of plants

hese should be ready and the seeds sow ix weeks before the plants can be set out n the garden. In the warmer States they will be wanted this month. Seeds - Watch advertisements, and send

or catalogues, and as soon as they are a hand, decide what seeds must be purchased, and order at once. There is an advantage Care of stored crops -B sides preparing for next season's work, it is necessary t

care for the stored crops. These are chiefly reots and celery. If roots are, unfortunately, stored in the house cellar, keep its temparature down to thirty four degrees. Use a the mometer, and when it shows that t a emperature is too high, open the win-

Roots and celery in trenches. -Storing coots, etc., in trenctes, divided by earth partitions into pits of a few bushels each, is preferable to storing in the cellar. When cold weather a ts in, these need a final e v ering of eighteen in thes or two feet of # 1 rounded up so as to shed water. In many ocalities this is not needed before the pres ent month. Celery, if covered too soon, will hest and decay. Leaves, straw, or nural, hay, are used for the covering, which should be slight at first, and finally a fort or more thick. We usually lay heards roofwise over this covering, to facilitate getting out the celery, when the trenches are cover ed with snow .- Am. Agriculturial for Jan

Orchard and Nursery. The first duty here is to take care of what we have. See that fences and gates are secure. In these unfortunate localities where animals are "free commoners"-allowed to run is the road, these half starved four legged trimps will take advantage of deep snows and go over an ordinary fence to browse upon the twigs of an orchard. Rabbits and mice will continue to d nischief. When the snow is deep and has

slight crust, rabbits can reach the lower branches of trees and prune then after a 'system" not given in the books. Traps and shot guns will convert a nuisance into a savory dinner. Rubbing the trunks of young trees with fresh ment or smearing hem with blood will keep off rabbits. Pack the snow while light around the base of the rees, to repel mice. Fruit in the cellar of the dwelling -Open

the windows whenever there is no danger of freezing. The ventilation is important to the lumater, and low temperature pr ogs the keeping of the fruit. Planting next steing .- If fruit trees are t

be set out next spring, much of the work plet of the orchard, select the varieties and indicate the place for each. In choosing fruit for market, have but few kinds. Root-gesiting in nurseries is surried on now, the stocks and amons being placed un-
