> A HOME DRUGGIST TESTIFIES. Poyularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, ate, and country, and among all people, as

Ayer's Sarsaparilla. The following letter from one of our best-known Massachusetts Druggists should be of interest to every sufferer:—

HEUMATISM, had an attack of Rheumatism, so severe that I could not move from the bed, or dress, without help. I tried several remodies without much if any relief, until I took AYER'S ARBAPARHILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public.

E. F. HARMIS."

SAIT RHEUM. GEORGE ANDREWS. Overseer in the Lowell was for over twenty years before his reinoval to Lowell affileted with Sait Rheum in its worst form. Its ulcerations actually covered more than half the surface of his bedy and limbs. He was entirely cured by AYEK'S Almanae for 1883.

## MADE ON PURPOSE. FARMERS' COLUMN.

A New Ecquirement in Medern Farming A good tarmer always needed skill, bu the changed conditions of modern farmng a different kind of skill is needed from hat required by our fathers and grandfathers. This is more largely the case West than East, but true in both. Formerly it was mostly menual skill in the use o simple implements, such as the rickle, the sythe, and the common walking plaw. Now the farmer needs to know how to ad just, run, and care for machinery. Macl ines properly handled call for little manual experinces to run them. But to manage the present implements requires a degree o mechanical skill that a large proportion our farmers do not possess. To comprehend the full extent of this change, compare the modern threshing-machine with the old fashioned flail, or its successor the grain eradie. Every careful observer must recognize the fact that the lack of skill in using and caring for his machinery, is one of the most potent sources of loss to the far-We have known one man to use a mower

er ten years, without expending over thirty dollars in repairs or three dollars annually - while his neighbor, in cutting a a smaller quantity of grass used up three equally good machines in the same time, Compare the expense of this one item: First far cor expended one hundred and thirty dollars, plus, say seventy dollars for interest-or two hundred dollars in all-for ten year. This is just twenty dollars per annum; quite an item, you will say, for mow ing-t ols alone, but still much cheaper than mowing with the scythe. The other were out three muchines, three hundred dollars, to which add repairs, say same as the other, thirty dollars, and interest or on ton Ired dollars for ten years, seventy dollars; on one hundred dollars (the secon muchine, for six years), forty two dollars; and on another one hundred dollars (the third machine, for three years), twenty one lollars, and you have a grand total of four handred and sixty three dollars-or fortyix dollars and thirty cents per annuman annual expense of more than twice as much as the other. The same calculations concerning the harvester, the sulky plow, the hay rake, and other farm implements nake an enormous difference in the cost to the man who is untkillful in using and caring for them. An important inquiry is, how the present difficulty can be remedied. -Am. Agriculturist.

## The Cherokee Rose-

A pleasing feature of Florida is the beau tiful and tragrant Cherokee rose that abound in the whole peninsuls. The Cherokee tribe of Indians dwelt from 500 to 1,000 miles further north, in what is now North Jeorgia, and in adjacent regions, now comprised in Tennessee and North Carolina. How came the Florida rose to bear the name of Cherokee? The legend is that the Sentinoles, living in the low country, nor Fiorida, went on the war path against the therekees, entered their country and f. ught battle. A young Seminole brave was ken prisoner and carried to the w gwam of a Cherokee chief. He was doorned to be out to death. But the custom of the trite was not to execute captayes when sick. To young warrior, being sick, was spaced till be should recover, when death would be affleted on him. The chief had a daugh who attended him in his illness, as he two fell in lave. When convalescen and able to travel, the young brave dete nined, with her convenance, to make h scape, and return to his own people. Sa mented to clope with him. One dark agut they started from her father's abode After they had gone some distance the roung woman stopped and expressed as arnest desire to go back to her home and b ar away some mements of the place. Ret seing their steps, she plucked a small osebus's that she brought away. The carried it to the Seminole country, where being planted, it grew and flourished From this root the variety was propugate and, in course of time, it spread through the peninsula, where it thrives and blood is the present day. It is universally style

Lessons From the Animals.

ie Cherokee rose.

Man may learn some useful leasons from he lower animals, which instinctively un erstand how to treat themselves in illness Animals get rid of their parasites by using nud, dust, clay, etc. Those suffering from tover restrict their diet, keep quie, seel turkness and airy places, drink water and metimes even plunge into it. When dog has lost his appetite he eats that species of g ans known as dog's grass (chicadent,) which acts as an emetic and purgative Can also cut grass. Sheep and cows, when il , a ek out certain herbs. When dogs ar continued they eat fatty substances. e. ch as oil and butter, with avidity, until they are purged. The same thing is one ryed in or es. An animal suffering from carons theumatism plways keeps in the sun if pos tile. The warrior auts have regularly erganized ambulances. Lat. sille cut the tennie of an ant and other ante came and vered the wounded part with a transparat fluid secreted in their mouths. If a impanzee be wounded it stops the bleedng by placing its hand on the wound or resaing it with leaves and grana. When an animal has a wounded leg or arm hanging on, it completes the amoutation b n mus of its treth. Cats, when hurt, treat themselves by a simple method of contin mus irrigation; while animals suffering from traumautio fever en-leavor to curbenneelves by the continual application a
