Which Kill Your Young Plants and Injure Your Crops.

Read the Terms to Tenant Farmers Given by North Carolina Land

The Immigration Bureau of North Carofun have in charge some improved farms for gant to Northern tenant farmers on the folswing sonditions, which are the usual terms

above mentioned tarm No. 1.

The tenant farmer furnishes all the manual labor; receiving One-half of all crops raised. The tenant farmer receives free of rent as in

the first mentioned farm No. 1. CO FARMS.—Rented exactly on rame terms an average amount of health and strength, as the above Tobacco, Grain and Grass Farm and who have or can get the use of a few No. 5; or if tenant farmer furnishes horses acres of land, I can recommend the poultry and Three-fourths of the cotton.

ADVANTAGES OF LOCATING IN

NORTH CAROLINA.

CLIMATE .- While the cold is not so so vere, the temperature of mid-summer is not excessive or trying as farther North. Our seasons are longer, and therefore our crops are not killed by late or early frosts,

THE SOIL is of a variety of compositi -clayey, gravelly lime stone, state, sandy leam, etc. This great variety of solis and the mildness and advantages of climate will account for the variety of products.

SOCIETY .- No section in the Union has better executed laws. The blessings of politleal, civil and religious liberty are no where more fully protected than in N. C.

IN GENERAL.-The great fertility of South and the extreme cold and freezes of who once masters the poultry business nee the North go to show that North Carolina surely the most favored agricultural section in America. Nature has not only given us the advantages of producing, but it has prowided us with water-power to work up what the soil produces for us.

ers in the Northern and New England States I will furnish persons low rate round-trip transportion from Boston, New York or Baltimore te North Carolina, so as to give them an opportunity of seeing the tarms that are offered for rent.

All farms advertised by us for rent hard dwelling-houses and out-buildings on them. Heing a regular employe of the Agricultural Department of North Carolina, I make no charge for information given or services rendered pers na seeking homes in the State. I will be pleased to furnish descriptive lists of lands offered for sale in North Carolina to all persons who will write me.

Agent for Lehighton and vicinity,

Poultry Ecoping for Weman

BY TANKY PIELD.

Before me is a letter from a woman who abors under a misapprehension regarding the amount and nature of work connected with poultry-keeping. The writer says: "I am out of health-unable to do bard work, but still feel that I must do some thing toward earning my living. I have read that poultry keeping is a light and rofitable employment for people who are not strong, and I feel disposed to try it. I live near a good market for poultry products, and can have the use of a few seres of land. It I could manage to earn, clear of the expense of keeping the fowls, \$200 or \$300 a year I should feel quite independ-

The above is a fair sample of many lot ters that I have received from half invalid women, who desire to engage in some light employment that will bring in ready money, and I think it is almost time to put in a protest, not against the letters, but againt the perpetual reiteration by some poultry writers of the "old, old story," to the effect tet. GRAIN AND GRASS FARM .- that poultry-keeping is a very suitable and The land owner furnishes land, houses and profitable occupation for women who are pays all taxes and expenses of improving not strong enough to engage in any money houses, stables and buildings. The tenant making employment that requires down-right bard work. Success in poulity-keepreceives TWO THIRDS OF CROPS. The ing can only be won by constant care, close tenant farmer is allowed free of rent garden and vegetable patches. He is also allowed sitention to minute details and plenty of to raise stock, hogs and chickens and receive hard work thrown in. A semi-invalid may undertake some of the lighter work can 2nd, TOBACCO, GRAIN AND GRASS nected with poultry-keeping-alss may FARMS.—The land owner furnishes land, even assume the entire care of a small flock houses and pays all taxes and expenses of of fewls, and doubtless her health will be improving houses, stables and buildings, benefitted by the out door air and exercise, The tenant farmer furnishes horses, tools but she must not expect to derive any great and laber, receiving Three-tourths of the to-bacco and Two-thirds of the grain crops. The tenant farmer is allowed free of cent as in the poultry yard; she certainly must not go into the business with the expectation of mak ard, TOBACCO, GRAIN AND GRASS ing a living by it. I do not write this to FARMS.-The land-owner furnishes land, discourage the half-invalids, but to warr houses, feed for horses, tools, repairing and them against indulging in hopes that can seeping in order of tools and pays all taxes. not be realized, and going beyond their strength in the vain effort to accomplish the work that would tax the energies of a well woman. Let your work be according to 4th, COTTON, GRAIN AND TOBAC. your strength. But for women who possess business as a means of livelyhood. I know several women who are supporting them selves and others despendet upon ther from the proceeds of their poultry; and other women may do equally well, provided they begin right and stick to the business. Poultry keeping has none of the drawbacks that many occupations present to the women who have themselves and children to support. Poultry raising has always, so far as my knowledge extends, been considered women's work, and a woman can encare in it without fear of being pointed at as a "dreadful eresture," out of her "proposphere." Next, it is work that can be done at home, and the children, instead of being

a hindrance can be taught to help in many ways. Thirdly, one can start with very intle capital, and the business coon yields an income; it is not like investing money where one must wait six months or a year for "dividends," and fast but not least, the profits-if the business is rightly managed -are sure; first class poultry products will eur lands, the mildness of our climate, free frem the scorching and withering heat of the always sell at paying prices, and the woman have no fears about the

this world is concerned. For farmers' wives and daughters who desire to do some extra work that will pay in cash, I know of nothing that will pay as I solleit correspondence from tenant farm- well in proportion to the time and cap tal invested as a small flock of fowls well-cared for .- Prairie Farmer.

Very Remarkable Recovery.

M. Geo. V. Willing of Manchester, Mich. write: "My wife has been almost helpler for five years, so helpless that she could n turn over in bed along. She used two bot tles of Electric Bitters, and is so much im proved, that she is able now to do her own

Electric Bitters will do all that is claimed or them. Hundreds of testimonials attes their great curative powers. Only fifty cent a bottle at Thomas' drug store.

Docking Horses' Tails. The New York Tribune says: Fashion s responsible for many follies, but for few sillier freaks than the prevalent "banging"

MAN A of the tails of horses. A horse's tail is not only highly ornamental when properly cared for, but indispensable to the animal. To cut the tail short, as is new done, is qually an offense against good taste and umanity. It is both idiotic and cruel, in fact. It spoils the appearance of the horse, and it deprives him of the means of prushing flies from his flanks. The stupid serviliwhich characterizes the followers of fashion was never more clearly illustrated than in the prevalence of this ugly and senseless practice. Hundreds of fine hones may now be seen in and around Central Park every day, made to look awkward, ungraceful and rediculous by this vile docking of their tails. In the case of riding horses there is some consolation in the fact that the absurd appearance of the poor animal is communicated to the rider, and that it is quite impossible for anyone to witch the world with nob's horsemanship" while bestrading a creature with a "banged" tail. But the wretch who invented this detestable fashion was no doubt CHICAGO, ROCK ISLAND & PACIFIC R equally capable of "shingling" a woman's head; and nothing worse than that can be

Herefords in America.

The Cleveland Leader says "The Hereords were almost unknown in America a decade ago, when the bare suggestion of their ever being formidable competitors in the beef classes was regarded by ninetynine persons in a hundred as most rediculous. They have shown themselves the paers of any, in stall or on butcher's block. In price they are held more firmly by their owners than cattle of any other breeds. They occupy this position not from merits assumed, but from desirable qualities horoughly demonstrated under conditions adverse as well as favorable, and their popularity, founded on a basis of morit, seems permanently assured."

Mr. Wis. H. Coyle, Chief of Fire Department, Houston, Texas, writes that while in discharge of his duties he was very saverely injured by a falling wall. He could scarcemove about when he was induced to try St. Jecobs Oil, the magical pain-reliever, and to his surprise he was cured of his
