LEHIGHTON , PA.

SATURDAY, DECEMBER 26, 1884. Entered at the Lehighton post-office as

Second Class Mail Matter.

To each and every one of our readers and friends we extend our best wishes for a Merry Chrismas. The season of festivity dawns upon our beloved land most auspiciously; while other nations have been visited by universal plagues of cholera and other sicknesses, we have been most mercifully spared. For this we uttered thanksgiving only a few weeks since, yet in the bappy season now at hand, let us not forget amidst our many pleasures, the circumstances which enable us to enjoy them the more fully and with lighter heart. Let us also bear in mind that while the coming holidays will find many blessed with prosperity and happiness, they will also dawn on others for whom they will bring sad and reflective thoughts, and increased misery. Let those to whom prosperity has come, who, with happy hearts, will welcome the coming of the festive days, share a portion of their happiness and temporal blessing with the poor when, with grateful hearts, they shared the blessings bestowed upon them with those of their fellow creatures, who, but for their thoughtful attention and benevolence, might not have tasted a morsel of food on the happiest day of all the year. Again we wish all our patrons a MERRY CHRI-TMAS.

What shell we do with the tramps This question has been asked frequently the past few days. In our opinion the best thing for our borough authorities to do would be to put a good strong feres used upon our streets and in a shore time the tramp pest would skip lightly around the outskirts of our Loroughwork they don't like and won't do if possible. Try it!

On this all new things are carefully test-

Boldness of conception, breadth of plan, energy of execution, tenacity and counge characterize her annals. These traits are illustrative not only of her landable achievements, and of these who advance her civilization—her commerce, schools, churches—her material, moral and intellectual prosperity, but they characterize as well those whose effects have been to pull down and destroy. That the latter constitute a material portion of that history, one of necessary instruction and interest to avery thoughtful reader and student who would be informed in his country's annals, is a fact which all will recognize.
