#### Breaking Up.

Breaking up. On every hand we are evidences that winter is breaking up, and will area bave a yield to the advancing spring. It is a most important question aroundst scientific the ergedted grains cease to form surface most important question aroungst scientific men what causes the general leeling of de-bility and lessitude so prevalent in this region. While some regard it as the result of confinement and inaction, others sup-pose it to be caused by the decay of veget-bile and animal debris which has norman lated during the winter.
