EMPRESSION, PA. EATURDAY, PERDUARY II, 1865.

Entered at the Lebighton post-office as Second Class Mail Matter,

DEATH AND DISEASE.

V ry interesting computations of both the death rate and the sick rate in differ ent parts of this continent are made in the Pop har Schoole Monthly by Dr. C. T. Campbell, who lesses his calculations on the experience of the Old Fellows.

North America, the order leaving been Northern States. We can spare him. in operation for sluty-four years, and the present membership being about half a South America, Ana relia, Germany and resuming work. clsewhere, but Dr. Campbell confined himself to the statistics of the Odd Fellaws in Canada and the United States -"two constries whose circumstances of race, climste, and social customs are Special to the Carson Advicate.

The members of the society are healthy white males of the age of twenty-one and pre-requisite for admission, and in some cases a medical certificate of good health is required. Besides, they must be men of good moral character, and consuquently are representatives of the healthy and well-ordered male adults of the two

in order to compare the mortality in different portions of the continent, Dr. Campbell makes five groups of States and provinces-the porthern, the southern, the eastern, the western, and the central. The Lighest death rate is in the southern group, and the lowest in high as that in the temperate zone That is, the average death rate of the better class of the adult white male peyulation of this continent is for the tem perate regions 1 5 in every 100, and for the trophical regions 3 in every 100.

the members show that, as with the members that it is not a book scheme. death rate, the sick rate is lowest in the
