The American Agriculturist has just is sued a magnificent stipple style line por trait of General Grant, executed by one o the very best snists in the country. The great warrior is sitting in his easy chair in his new famous library; the expression his countenance is exceedingly life like and the whole picture is grand and striking in appearance, far surpassing any previous likeness of General Grant. Its great merit is due to the fact that it is from General Grant's last ritting, prior to the final pros tration; that is, it presents him as a picture of health just before the fatal disease compelled him to withdraw from the world Other pertraits, while they present him in health, do not show his features and general appearance at a late period.
