This cut shows the

Famous Farms for Freedmans.

Visitors to Old Point Comfort (Fortress Monroe) can spend a few hours very pleasantly, in inspecting the gounds and buildings of the well-known Hamp ton School, where negroes and Indians are alike educated. Attached to it is a farm of three hundred and fifty acres, presented by Mrs. Hemenway, of Boston, and enlarged by additional purchase, to over five hundred acres. This farm lies four miles from the Home School Buildings, on Hampton Road, and like the Home Farm, adjacent to the bullding, is under the care of Mr. Albert Howe. On the home farm there is a daily detail of nine colored, and six Indian boys, except on Mondays, when half of the entire force for farm work is out, giving an average of a day and a half of labor to each one weekly. Eight milkers and drivers are employed all day, and study evenings from seven to nine P. M., for one year. One hundred and ten acres are under cultivation.

A leading feature is the milk dairy; twenty-six grade Ayrshire and Jersey cows, supply from fifty-five to sixty gallons of milk daily, of which about half is at home, and the rest is sold at Fortress Monroe, and the Hygela Hotel. For the third year one hundred and forty tons of ensilage have been put up with very good results; it is given to the cattle morning and night, at the rate of a bushel a feed, mixed with four quarts of bran; a feed of clover hay is given in the middle of the day. Last year forty tons of clover hay and of orchard grass were raised, chiefly for twenty-three horses and mules (of which four are boarders, and four are used for driving) on the place. A thoroughbred Morgan and a Percheron horse are kept doing farm work most of the time. The past winter, fiftcon tons of pork were slauchtered. There are on hand one hundred and twenty-five young bogs. Essex and Berkshire crossed with Chester are preferred.

The Hemenway Farm, four miles distant from the school, is under the immediate care of Mr. Charles Vanison, a graduate, and contains five hundred aeres of good land for stock and grain purposes, it is cultivated by ten students, who work during the day and study evenings. The ten boys go to the Normal School after a year at the Hemenway farm, where they learn valuable practical lessons, and if industrious save from their wages from sixty dollars to one hundred dollars a year. They are usually paid board, and ten dollars per month. Their savings here, and carnngs at school, usually carry them brough the Junior and Middle years of he regular course. Indian boys are fien sent to this place for a change of work. No treatment is so effective for wild, wayward Sloux boy, as to send itm to the Hemenwiv farm to work for fow weeks among the steary colored soys. There is no one to "cut up" with and he subsides almost immediately into he regular steady ways of the white ersons about him. These Indian boys who become famers, will be efficient

LIVER REGULATOR

For all Diseases of the

Liver, Kidneys, Stomash and Spleen.

This purely regetable pre-paration, now so ciclerated as a Family Medicine, originated in the South in 1628. It acta gently on the Bowels and Ridneys and corrects the action of the Laver, and is, there-fore, the best proparatory medicine, whisters the size-ness may prove to be. In all common diseases it will, un-masisted by any other medi-cine, effect a speedy cure.

the endors a speedy cure. The Regulator is safe to administer in any condition of the system, and under no electrom-stances can R do harm. It will invigorate like a diss of wise, but is no involtating bever, age to lasd to intemperance; will promote di-gention, dissipate hundache, and gener-ally tone up the aystem. The dose is small, not unpleasant, and is virtues underhed.

No loss of time, no inter-ruption or stopping of business while taking the Regulator. Children complaining of Colic, Hendache, or Bick Stomach, a teapsonful er more will give relief. If take occationally be no.

If taken occasionally by pa-tients exposed to MALARIA, will expet the poison and protect them from stack.

—The poisonous properties of stockings dyad with the brilliant anilline dyes, it is said, may be rendered harmless by dipping the articles in a bath of rubber dissolved in naphths or some other feagent. This having been done, subsequent evaporation has the effect to over each fibre with a thin film of rubber, and by this means the transfer of the coloring material from the goods to the skin is prevented.
