MAUCH CHUNK, Aug. 1, '85. To the Christian Workers in Lehigh Valley:

The third Sabbath of August (to-mor-

row 16th inst.) will be observed as a day of special prayer for the railroad men of the Lehigh Valley. The day has already become noteworthy. Our prayers have been answered. The returns of this work have been large, and as the outcome of united supplications, many of these men are now earnest and de voted servants of the Master. Give hearty thanks to God for this result. The thousands who are moving up and down the valley as employees, the perils of body and soul to which they are exdote I ought to close it with one-about posed, the femptations which beset make a more than ordinary claim or your personal efforts and your prayers Let us make this seventh annual day memorable. Arrange for meetings at every available point. Enlist the interest and co-operation of railroad officials Kentucky, the home and hunting ground | Extend a cordial invitation to employes of Daniel Boone, is a state noted for and to attend your meetings, and welcome wide for her gallant men and handsome them for the sake of the Master. HIGH GRADE BONE FERTILIZERS.

We take pleasure in again calling the attention of farmers to our High Grade Fertilizers. It being eight years ago this spring since they were first effected to consumers under their present form; and from that time until now there has been an increasing demand for them, which is a far better testimonial is us than any letters of praise could be, although we do not want or these latter we are in recent of many.

THEIR CHARACTER.

The main characteristic of our fertilizers is that they are prepared with particular reference to the cuer, and not to a chemical analysis; the latter does very well in its place, and we believe in chemistry thoroughly, but consumers are too often deceived with the idea that a hemical gnalvsis is the main thing What they really Want is a Good, Big Crop.

THEY ARE UNIFORM.

The goods we manufacture are uniform in composition, and are only varied in proportions, year after year, as we believe it to an advantage to the crop. We have such large sapplies of Bone, Blond, etc., from the slong itering establishments of New York, that our fertilizers are largely composed of these, and there is not that inducement for us to use cheaper material, that there might be, if we did not have this material. BONE FERTILIZERS.

Our products are of mass mass, because we believe that is the most satisfactory source of phosphoric acid, and the large amount of animal matter our fertilizers contain makes them specially valuable in what may be called the off or poor seasons. Some years it is noticed that almost any fertilizer will give fairly good results, but we find the most favorable comparisons for our products are in the poor years.
