LEHIGHTON, PA.:

SATURDAY, AUGUST 22, 1885.

Entered at the Lehighton post-office as Sacond Class Mail Matter.

THE schedule of assets published by the assignces of Mr. John Roach foots up total liabilities of \$2,222.877 with acuni assets of \$4,481,478. If these assets are actually "actual," it is evident that any sympathy felt for Mr. Roach's inisfortunes has bee misplaced. His assignment is now in effect acknowledged to have been only a shrewd is growing incly. In some of the lower "dodge," intended to secure him from counties the cotton worm is getting in the possible consequences of the Navy its work to the detriment of the crop,but Department's action, in case Attorney- all appearances point towards a large General Garland's opinion should be yfeld. made the basis of logal proceedings against him.

-A WASHINGTON despatch says that The foliage is such a cool, rich green, erders will be sent from the Navy Department shortly directing that work shall be resumed at all the navy yards. Already work has been begun in the yards Mare Island and Brooklyn. At lowing it is a beautiful red, and then it the remainder it will be begun as soon drops, and the cotton bolls begin to form. as the reorganization of the forces has The first sight I obtained of a blooming heen completed. The appointment of cotton field led me to suppose that the foremen, is is expected, will be difference in the colors of the blossoms made in a short time at the yards where marked a difference in the species of the they have not yet been named. On

June 1 many men were discharged because of lack of funds to continue work. The new fiscal year gives a new continued, and offers an opportunity for furnishing employment.

sat his majesty, who was ludeed the Prince of Darkness. Suddenly, as if by an electric flash, the place became ablaze with the light of a thousand lamps, and a mighty procession of grotesque forms conderous casket filled with bright coin,

in a wild unearthly chant, as they whirled a star. It may be Harrison the boy thro' this phantom dance:

Dance ye all a merry measure As we count the hidden treasure Let the cavera palace ring As we dance before the king.

At a signal from the monarch the dancing ceased and the revelers were in the Nostrand Avenue Methodist seated. Then my very heart seemed turning to stone, for in the dreadful silence that followed the ghoulish eves of all were turned upon me. Presently one of his subjects advanced from his scat, and taking me by the arm, led me very car to the king, who addressed me as follows: 'Beggar of earth, the price of the hidden treasure is thy blood ! Thro' this sacrifice thou becomest the common ossessor of our wealth.' The deep ones of his voice echoed away through the sepulchral halls of the palace, and then from all tongues came this solemn chant:

Filgrim of the upper reatm. Pay the iribite thon dost owe; Thou art human here as there. Till thy human blood doth flow.

As the notes of this anthem died away malden of wondrous beauty advanced toward me, bearing in her hand a gleaming sword, and demanded of me that I bare my breast and receive the thrust that should drain the fountain of my human existence and leave me as one of their numbers.

What passed from that moment on my lips can never reveal, and in conclusion I have only this to say, that the entire treasury of a hundred nations would not induce me to again visit 'Chimney SIMON.

Broadbrim's New York Letter.

We have had a most singular experi-

mce in business. The week before General Grant's funeral there was almost an entire suspension of business, but this week the sales have been enormous. There has been unusual activity in every department of trade, and it is accounted for in this way; The funeral brought many thousands of merchants to the city, and those who were expecting to come postponed the orders that

HIGH GRADE BONE FERTILIZERS.

We take pleasure in again calling the attention of farmers to our Higb Grade Pertiliners. It being eight years ago this spring since they were first offered to consumers under their pres-ent form; and from that time until now there has been an increasing demand for them, which is a far better testimonial to us than any letters of praise could be, although we do not want for these latter we are in receipt of many.

### THEIR CHARACTER.

The main characteristic of our fertilizers is that they are prepared with particular reference to the ener, and not to a chemical analysis; the latter does very well in its place, and we be-lieve in chemistry thoroughly, but consumers are too often deceived with the idea that a chemical analysis is the main thing.

What they really Want is a Good, Big Crop. THEY ARE UNIFORM.

The goods we manufacture are uniform in composition, and are only varied in propartions, year after year, as we believe it to an advantage to the crop. We have such large supplies of Bone, Blood, etc. from the slanghtering establishments of New York, that our fertilizers are largely composed of these, and there is not that inducement for us to use cheaper material, that there might be, if we did not have this material.

### BONE FERTILIZERS.

Our products are of BONE BASE, because we believe that is the most satisfactory source of phosphoric soid, and the large smooth of animal matter our fertilizers contain makes them especially valuable in what may be called the off or poor seasons. Some years it is noticed that almost any fertilizer will give fairly good results, but we find the most favorable com-variance for one reducts are in the next Years. parisons for our products are in the poor years.
