Ellious, Romittent, Intermittent and Malarial Fevers, are provincent throughout the United States, particularly in the valleys of our great rivers and their vast trinutaries during the Bammer and Autumn, especially during seasons of unusual heat and dryness.

Those Fevers are invariably accompanied by extessive derangements of the stomach liver and bowels. In their treatment, a purgative, exceting a powerful influence upon these organs, is absolutely necessary.

There is no catharatic for the purposs equal to Dr. J. Walken's Vinnuan Birvana, as it will speedily remove the dark-colored vised matter with which the bowels are loaded, at the same time still predicting the healthy functions of the directive organs.
