Your "FAVORITE REMEDY"-I say it with a partiest result. while; at least, the pressure of the milk in the udder, which may cause inflammation, can thus be relieved. If the cow continues nervous, and will not be pacified, the thing to do is, to tie or strap her legs. This may be done with a light rope like a bed-cord. It is passed once around the left leg below the hock, tied by a "half-hitch" (half a knot), then twisted a few times, and another hitch

turned in it, and finally passed around the right leg, and tied in a bow-knot, so that it can be quickly united. A cow so tiel can not kick, but she is almost sure to take short steps backward, and when she gets to the end of her tie-strap, or back as far as she can go in the The POLICE GAZETTE will be mailed stanchions, her hind legs may be strained securely wrst ped, to any address in th-United States for three months on receipt of far back, and as her position is a very unsteady one, she may fall down. To prevent this, a rope may be passed twice Liberal discount allowed to postmasters around the tie-rope, carried forward, and agents and clubs Sample copies mailed free. Address all orders to fastened to the manger. This will prevent the backing, the cow will probably soon give up, and stand quietly .- Am FRANKLIN SQUARE, N. Y. Agriculturist.

### A Walking Fkeleton.

Mr. E. Springer, of Mechanicsburg Pa., writes: "I was afflicted with lung fever and abscess on lungs, and reduced to a walking skeleton. Got a free trial bottle of Dr. King's New Discovery for Consumption, which did me so much good that I bought a dollar bottle. After using three bottles, found myself once more a man, completely restored to health, with a hearty appetite, and a gain in fiesh of 48 lbs."

Call at T. D. Thomas' drug store and get a free trial bottle of this certain bottles \$1.

Winter Dairying. It is most profitable to be doing busi tess when most other people are idle. This applies especially to dairying. So few dairymen can make first class butter. and so few can, or will take the pains to pack it perfectly, that the demand for fine butter during the winter, is greater than can be supplied. The winter dairy AP This lecture will prove a boon to man is now about beginning business. His thousands and thousands. Sent under seal, in a plain envelope, it any address, on receipt of four cents, or tw-posinge scamps. Address cows have been resting during the hot weather, in the shade of a wood-lot, while he has been busy with his crops and now that he has these all secured. his late fodder and roots prepared, and his fall pastures in the finest order, he ready to begin butter making, with every advantage in his favor. The summer dairyman has been worrying through the heat, consuming ice at great cost, and has succeeded only in getting a second quality of butter, which will sell twenty-five to fifty per cent less than that fresh-made in winter. The necessities for winter dairying are few, and are easily provided. They are: fresh cows, coming in about September; plenty of good hay and fodder, with roots and supplementary food, which is cheaper now than at any other time because it is in season, and is abundant an airy dairy house, warmed to an even temperature by a stove, avoids every difficulty, and the dairyman is in full control of everything needed for the SILVERWARE, &c., &c. best management of his business, instead of fighting flies, torrid heats, dry weather, and every other difficulty, as in summer. E. H. SNYDER. -Am. Ayriculturist.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regu-iator, promptly and effectively mave the Liver to action, and as the same time aid (instead of weak-rolog, the degetive and assimilative powers of the system. L. M. Hisrow, M. D., Washington, Ask.

SEE THAT YOU GET THE GENUINE. J. H. Zeilin & Co., Philadelphia, Pa

Kissing can be indulged in at all oours of the day or night, but the best kisses, those that have the most style he gloaming, or before the candles are lit. We've been there, and will lay two o one on this. There is a great deal of

he kissess gently towards you and then -well, if not, as it were, so to speak-

Little women are the best ones to ciss. Not that their lips are any sweeter than the lips of the tall girl, but then you have to bend your face down and they have to turn their faces up, and there's a heap more style about that kind of a kiss than going at it level. some girls make a heap of fuss over i kiss-even over a very little one-and go and tell their mothers. Such girls lon't deserve to be kissed.

Half the fun in kissing, is doing it or the sly, and the girls know it. A girl who won't kiss on a sly, doesn't know what fun is. But most girls do know what fun is. We have been consider ing the science of kissing and have come to the conclusion that all kisses can be classed under one or other of the ix heads, viz: Fizz, fuzz, flazy-fuzz, smack, hundy-smack, and rattler. ## Interesting Facts About Fggs.

Five million dozen of eggs are annualy imported from the Dominion, the greater portion fromQuebee and Ontario. The egg import from Europe is also large, but the hens of the Canadas are by far the largest factors in this trade, and the trade increases every year. Eggs pay no duty, and when we reflect, that this product comes from millions of humble sources-the poultry yards of small farmers-and that it is only the surplus that goes to market, we may well wonder, where and how the billions of eggs consumed in the United States are produced. It is an interest that may be rated at many tens of million dollars. Yet it is not among the enumerations of the National Census. Let us hope, that the next census, the eleventh, will cover this important field. It is probable that the egg consumption of our fifty million inhabitants is not less than three billion a year, at a valuation of from twenty-five to thirty millions of dollars. There are "egh-

trains" on the railroads of the northern THE MEN ONLY frontier, and the cities and villages of New England draw most of their eggs New Lighthu draw most of their eggs from the border, to which they are brought by the railroads of Canada. The import of eggs at Ogdensburg alone, was valued at one hundred and fifty thousand dollars for the last facal year. ERVOUSDEBILITY As many are entered in several other collection districts : at Buffalo, and in two districts in Maine, nearly three times this traffic in imported eggs is done. These eggs are taken from the original packages, carefully examined by candle or lamp light, and then repacked, the defective eggs being laid aside. If trans-notation is not immediate the severe einreftene, Das derective eggs being and same. If trans-portation is not immediate, the eggs are placed in cold storage warchouses, where the temperature is a few degrees above freezing, and there kept until shipped.
