> Very soon now I shall be strong enough on my cyclonic leg to resume my lessons in waitzing. It is needless to say that I look forward with great pleasure to that moment. Nature in tended that I should glide in the mazy.

Tall, lithe, bald-headed, genlal, limber in the extreme, suave, soulful; frolicsome at times, yet dignified and reserved toward strangers, irresistable as a torando when insulted by a smaller man, I am peculiarly fitted to shine in society, Those who have observed my polished brow under a strong electric light, say they never saw a man shine so in society as I do. I had just learned how to reel around

a ball-room to a little waitz music when I was blown across the state of Misala-sippi in September last, by a high wind. and broke one of my legs which I use

in waltzing. When this accident occurred I had just got where I felt at iberty to choose a glorious being with starry eyes and fluffy hair and magnificently moulded form to steer me around the rink to the dreamy music of Strauss. One young lady with whom I had waltzed a good deal; when she heard

that my leg was broken began to attend every dancing party she could hear of, although she had declined a good many previous to that. I asked her how she could be so giddy and so gay while I was

drown her sorrow, but her little brother told me on the quiet that she was dancing while I was sick because she felt perfectly safe.

My wif trught me how to waltz. She er skirts during the following week. I old her once that I thought I was too brainy to dance. She said she hadn't noticed that, but she thought I seemed to run too much to legs. My wife is not timid in telling me anything that she thinks will be for my good. When J make a mistake she is perfectly frank with me and comes right too me and tells me about it so that I won't do so

A friend of mine says I have prononneed a distinctly original manner of waltzing, and that he never saw anybody with one exception, who waltzed as I did, and that was the recently deceased Jumbo. I could waltz more easily if the rules did not require such a constant change of position. I am sedentary in my nature, slow to move about, so that it takes a lady of great strength of purpo e to pull me around on time. I had a partner once who said I was very easy to waltz with. She noved about with wonderful ease and a poetic motion that made my legs stand aut at an angle of 450 when we turned the corner. She told me to trust herimplicitly, and that she would see that I

got around on time. My feet only touched the floor three times during the
