in Western and Northern farmers by scores, and these men are apt to see the wealth hidden under the rough and unattractive surface of the country. They see the rich soil, they enjoy the fine climate; they don't see the venomous snakes, the bitterness of spirit, and the preponderance of the negroes, which foolish and untruthful persons have said so much about falsely;but if it were not for a few physicial features of the country, the absence of good farming, the poor houses, the scarcity of stock, and the want of barns, they would not know they were traveling so far from home, and would find no difference between the people here and their neighbors North or West. Scores of farmers in North Carolina have said to me, we want your people to come here and show us how to work; we want to learn; we have plenty of room; there is nothing to hinder; all the old differences are gone; slavery is got rid of, and we are glad of it; it is the greatest relief in the world to have gotten rid of the care of it, and we are far better off as it is, than with the old system of labor. As a rule, the negroes are good laborers and with a good employer, who will show them how to work, and will pay them regularly, they can be made far better than they are. - HENRY STEWART
