Dyspepsia.

GERTS:—I feel it my duty to say re-specting Burdock Blood Bitters, that it is the best medicine I ever took. I suffered two or three years from stomach troubles and dyspepsia as well as from liver an I kidney complaint. I was not able to at-tend to my business. My wife was afflicted in much the same way. We read of your Bitters in the papers and made up our minds that we would try them. The result is my wife and I began to improve at on and I am now able to do more hard work than before in lea years. It relieved my kidney troubles as well. We both wish you, the makers of it. Godspeed,

Filling the Ice House.

When you have filled the Ice house, out in another load. We use about two nundred pounds a week for forty weeks. inundred pounds a week for forty weeks, or eight thousand pounds, and at the end of the year have, say two thousand pounds of old lee left. To furnish this amount, we put in twenty-five tous of lee. In other words, to get live tons of lee. In other words, to get live tons of ce. In other words, to get five tons of ice for use, we put in twenty-five tons. According to this, in a small ice house, with no pains taken to preserve the ice, four pounds are melted to keep one. For PURE DRUGS and MEDICINES, FANCY and The ice melts from the top, and an extra TOILET ARTICLES, Choice Wines and Liquors for ton on top means an extra ton for use.

I said, no pains are taken at any time

emark is this: If you have an abundance of ice with no fear of running short, you are not constantly worrying about its being left uncovered. We take care, before warm weather sets in, to have plenty of sawdust or cut straw on top of the ice, and as it melts on the sides of the building, fill the space with the saw dust or cut straw. This, of course, is essential. But there will be many times during the busy summer months, on a farm, when Tom, Dick, cr REMOVAL! Harry will be called upon to get ice, and will be pretty certain to leave the door open, or the ice uncovered. Put in the extra load, and you need have no fears of running short of ice. We let the all they want in summer. Keep out rain, keep the air from getting to it underneath, keep the top and sides covered and if the ice is fifteen feet high, it will keep. The sun may shine and the winds blow on the covering, and do Pure Drugs & Medicines, good rather than harm. But do not forget to put in another load on top. Fill the ice house to the roof. The ice should melt into cone shape, so that the water or melted fee will run in among the small pieces of ice with which the pleces are "chinked," and as it descends, will freeze the whole into one solid mass, and after that all the wetting will be from the outside.-Joseph Harris In Am.
