D. LANCELL'S ASTHMA AND CATARRH REMEDY.

Having struggled 20 years between life and death with ASTHMA or PHTHISIC, treated by eminent physicians, and receiving no benefit, I was compelled during the last 5 years of my illness to sit on my chair day and night gasping for breath. My sufferings were beyond description. In despair I experimented on myself by compounding roots and herbs and inhaling the medicine thus obtained. I fortunately discovered this WONDERFUL CURE FOR ASTHMA AND CATARRH, warranted to relieve the most stubborn case of ASTHMA in FIVE MINUTES, so that the patient can lie down to rest and sleep comfortably. Please read the following condensed extracts from unsolicited testimonials, all of recent date:

Oliver V. R. Holmes, San Jose, Cal., writes: "I find the remedy all and even more than represented. I receive instantaneous relief."

E. M. Carson, Ala., Mo., writes: "Was treated by eminent physicians of this country and Germany; tried the climate of different states—nothing afforded relief like your precious."

L. B. Phelps, P. M., Griggs, Ohio, writes: "Suffered with Asthma 40 years. Your medicine in 5 minutes does more for me than the most eminent physician did for me in three years."

H. C. Plimpton, Joliet, Ill., writes: "Send Catarrh Remedy at once. Cannot get along without it. I find it to be one of the most valuable medicines I have ever tried."

We have many other hearty testimonials of cure or relief, and in order that all sufferers from Asthma, Catarrh, Hay Fever, and kindred diseases may have an opportunity of testing the value of the Remedy we will send to any address TRIAL PACKAGE FREE OF CHARGE. If your druggist fails to keep it do not permit him to sell you some worthless imitation by his representing it to be just as good, but send directly to us. Write your name and address plainly.

OF INTEREST TO FARMERS.

A Good Western Grass.

There is scarcely a farmer, in the East, who does not know Quack grass (Agropyrum repens); and who, knowing it, does not look upon it as a vile weed. A very near relative of the Quack grass, growing upon the Western plains, and in the Rocky Mountains, seems to be doing its best to redeem and bring into credit the name of Agropyrum. This Western grass which has been called Colorado Blue Grass, Blue Stem, Gramma (erroneously), Wild wheat Grass, etc., etc., resembles the Quack grass in its structure, but can at once be distinguished from it by its light bluish color. Botanically, it has by some been regarded as a marked variety of the Eastern grass, but others consider it to be distinct, an opinion with which I am inclined to coincide. The name under which it is known in the books is Agropyrum glaucum—the specific name refering to the glaucous appearance of the plant, which is in marked contrast to the bright green color of its Eastern relative.

Cattle feeders in Montana, Wyoming, Colorado, and Western Nebraska unite in considering it one of their most valuable grasses. It appears to be highly nutritious, and it is greatly relished by cattle.

A Gift for All.

In order to give all a chance to test it, and thus be convinced of its wonderful curative powers, Dr. King's New Discovery for Consumption, Coughs and Colds, will be, for a limited time, given away. This offer is not only liberal, but shows unbounded faith in the merits of this great remedy. All who suffer from Coughs, Colds, Consumption, Asthma, Bronchitis, or any affection of Throat, Chest, or Lungs, are especially requested to call at T. D. Thomas' Drug Store and get a Trial Bottle Free. Large Bottles $1.

Plow Early for Wheat.

If stubble ground is to be put in fall wheat, the plow can not be started too early. If the shocks are taken off the ground as soon as the grain has cured enough to run the mow or stack, and the ground is broken at once, the most important step in successful wheat-growing has been taken. The condition, of the seed-bed is of more importance in the growing of small grains than of cultivated crops, because making the condition of the ground favorable to the yielding of plant food is impossible after the grain is sown. Of the small grains, fall wheat most demands a well-prepared seed-bed, for oats do not have to pass through our trying winters, while fall rye is more hardy. The seed-bed most favorable to fall wheat is broken moderately deep, but not deeper than the harrow and roller will have effect: thoroughly mixed, and as thoroughly compated. Early plowing makes it possible for us to make such a seed-bed, and with the least expenditure. The weather is dry and hot after harvest, and raphly dries and hardens the ground; if we delay plowing, the labor is severer, and the ground breaks into hard lumps, difficult to reduce. Though we use the harrow and roller persistently, we do not get the seed-bed in prime condition. The lumps are not crumbled or pulverized, but are divided only. At the end of our labor we have only small clods, but clods nevertheless. The air therefore penetrates the soil, and finishes the drying, hardening process. The light showers that fall are soon dissipated. The clods can not be compacted. Hence the wheat when sown is slow to germinate; the plants find only a scanty supply of food, and their roots have not solid supports to cling to during the winter.

Farm and Garden Notes.

—Insect powder is advocated as a protection against bugs on cucumber and melon vines.

For bark lice N. J. Shepherd recomends a thorough washing with soft soap made into suds.

—Ditches should not have a fall of more than one in 100, or there will be danger of washing.

—If you owe one, two or three dollars as subscription to the ADVOCATE, don't forget to call around and pay us. We need the money.

—As the warm weather advances so the tendency of fowls to breed vermin in their nests increases.

—Sprinkling the leaves with a mixture of fine tobacco, pulverized sulphur and plaster is recommended to drive away the cabbas fly.

—The Chicago *Times* says a larger quantity of potatoes, and of a better quality, can be raised with chemical fertilizers than with manure.

—To have the best success with small fruits, manure highly and give thorough cultivation. Better raise 500 bushels on one acre than on three.

—Some apirists assert that the linden tree produces honey not only in great abundance but of a better quality than that yielded by white clover.

—Considering the fact that a large part of even the best milk is water, the necessity of giving cows in milk only the best water will be fully understood.

—Insect powder loses its strength upon exposure to the air. Therefore get it fresh in small quantities when needed for use, or keep it in a tight glass jar.

—An observing writer says: Too often farmers fail to realize how hard their wives work, and how largely their own success is the result of that poorly requited toil.

—Professor Wallace, of England, says that a variety of live stock on the farm is as good a variety in chopping; greater numbers can be kept and the best use made of all food.

—It is certainly better, in trimming a tree, to thin out the smaller branches than to cut off the ends of all the limbs. All bearing fruit trees require the sun and good ventilation.

—Much time is lost on the farm by not doing all the cleaning that may be done before the busy seasons begin. There should be no wood nor manure hauled in corn-planting or harvest time.

—While horses are shedding their coats they should be well fed and not over worked. It is important to have the new coat on before the active farm work begins, as the changing process is debilitating.

—It is said that the milk, after the cream has been taken from it, retains the elements which most cows find deficient in their food, and it is therefore profitable to feed milk to the cow after it has been skimmed.

—Job work of all descriptions at this office. Low prices.

CHICAGO, ROCK ISLAND & PACIFIC R'Y

By reason of its central position, close relation to principal lines East of Chicago and connections at central points West, Northwest and Southwest—is the only true Middle link in that transcontinental system which invites and facilitates travel and traffic in either direction between the Atlantic and Pacific.

The Rock Island main line and branches include Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Winterset, Council Bluffs, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, St. Joseph, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns and villages.

THE GREAT ROCK ISLAND ROUTE

Guarantees Speed, Comfort and Safety to those who travel over it. Its roadbed is thoroughly ballasted; its track is of heavy steel. Its bridges are solid structures of stone and iron. Its rolling stock is perfect as human skill can make it. It has all the safety appliances that mechanical genius has invented and experience proved valuable. Its practical operation is conservative and methodical—its discipline strict and exacting. The luxury of its passenger accommodations is unequaled in the West—unsurpassed in the world.

ALL EXPRESS TRAINS between Chicago and the Missouri River consist of comfortable DAY COACHES, magnificent PULLMAN PALACE PARLOR and SLEEPING CARS, elegant DINING CARS providing excellent meals, and between Chicago, St. Joseph, Atchison and Kansas City—restful RECLINING CHAIR CARS.

THE FAMOUS ALBERT LEA ROUTE

Is the direct, favorite line between Chicago and Minneapolis and St. Paul. Over this route solid Fast Express Trains run daily to the summer resorts, picturesque localities and hunting and fishing grounds of Iowa and Minnesota, the rich wheat fields and grazing lands of Interior Dakota are reached via Watertown. A short, desirable route, via Kenosha and Kankakee, offers superior inducements to travelers between Cincinnati, Indianapolis, Lafayette and Council Bluffs, St. Joseph, Atchison, Leavenworth, Kansas City, Minneapolis, St. Paul and intermediate points.

All classes of patrons, especially families, ladies and children, receive from officials and employes of Rock Island trains protection, respectful courtesy and kindly attention.
