

Original Cheap Cash Store.

Composition for Cheapness,

But Leather for Service.

If trade is carried on in anything it is in the boot and shoe business. Through competition the majority of manufacturers have adopted as low as to put composition (which is nothing more than paper) counters and soles in their boots and shoes and palm them off for leather. This should be made a criminal offense, and manufacturers and dealers compelled to sell goods for what they really are; paper for paper and leather for leather. We are determined not to take part in this dishonest business, and will sell good goods or none. We will make the purchase price of every pair of boots or shoes, returned to us that are not sold.

We call special attention to our SOLAR TIP SHOE for Males and Children, we doubt whether a solid SOLAR TIP SHOE can be found in any other store in town.

J. T. NUSBAUM,

Opposite Public Square, Bank Street, Lehighton.

June 7, 1884.

Why Is It?

We have, in our experience, met a number of men, in every imaginable line of business; but the happiest, most energetic and agreeable fellows are the agents of the well-known and popular "Davis Sewing Machine." They are as happy in the day as in the night. They make no body with whom they have feelings feel the same. Why is it? They are men from the ordinary paths of life, chosen more for their honesty and respectability than on account of mechanical knowledge. They are men who have the very sense of mechanical simplicity and require no skill in its manipulation. One hour's operation in a customer's house amply demonstrates this fact and its advantages. They are men who do not mind not take the lady long to decide in favor of this machine, finding, as she does, that she can do work on it that would be impossible on machines, of the under-mentioned. And lastly, they have a knowledge of the Davis and other machines, and can answer without hesitation that the Davis is incomparably the best. Not only will it perform more than double the work possible with any other machine, but the work is done with half the exertion and with an ease that is as pleasing as it is surprising.
