Carbon Advocate

JOB ROOMS,

Bank St., Lehighton.

At the Carbon Advocate Office.

Office of Rochester Brewing Co.,

ROCHESTER, N. Y., May 12, 1884.

It having been for some time urged as an argument against the use of malt liquors, that they were unfit for use by reason of adulterations, we beg to state that the Lager Beer manufactured by us is a Pure, Healthful, Unadulterated article.

For the Invalid and the Nursing Mother as well as for those who simply use it as a beverage, it is a light and nourishing stimulant. Lager Beer has accomplished much for the canse of temperance, in weaning many from the use of the stronger drinks, and thousands all over the land cheerfully testify to its wonderful effects in building up the Enfeebled Constitution.

An analysis of our Beer has been made by Professor Lattimore of the Rochester University, a gentleman whose name is sufficient guarantee of the accuracy of any statement he may make, We can also produce the affidavit of Mr. Frederick Hodecker, our head brewer, which must certainly set at rest all doubts that might exist in the mind of any person.

Furthermore, we will pay $1000 to any one proving that our statements and claims are not entirely true.

Very Respectfully,

The Rochester Brewing Co.

THOS. J. BECK, PROP'R,

D. LANGELL'S ASTHMA AND CATARRH REMEDY.

Having struggled 20 years between life and death with Asthma or Phthisic, treated by eminent physicians, and receiving no benefit, I was compelled during the last 5 years of my illness to sit on my chair day and night, gasping for breath. My sufferings were beyond description. In despair I experimented on myself by compounding roots and herbs and inhaling the medicine thus obtained. I fortunately discovered this WONDERFUL CURE FOR ASTHMA AND CATARRH, warranted to relieve the most stubborn case of ASTHMA in FIVE MINUTES, so that the patient can lie down to rest and sleep comfortably. Please read the following condensed extracts from unsolicited testimonials, all of recent date:

Oliver V. R. Holmes, San Jose, Cal., writes: "I find the remedy all and even more than represented. I receive instantaneous relief."

E. M. Carson, A. M., Warren, Kan., writes: "Was treated by eminent physicians of this country and Germany; tried the climate of different states—nothing afforded relief like your preparation."

L. B. Phelps, P. M., Griggs, Ohio, writes: "Suffered with Asthma 40 years. Your medicine in 5 minutes does more for me than the most eminent physician did for me in three years."

H. C. Plimpton, Joliet, Ill., writes: "Send Catarrh Remedy at once. Cannot get along without it. I find it to be one of the most valuable medicines I have ever tried."

We have many other hearty testimonials of cure or relief, and in order that all sufferers from Asthma, Catarrh, Hay Fever, and kindred diseases may have an opportunity of testing the value of the Remedy we will send to any address TRIAL PACKAGE FREE OF CHARGE. If your druggist fails to keep it do not permit him to sell you some worthless imitation by his representing it to be just as good, but send directly to us. Write your name and address plainly.

OF INTEREST TO FARMERS.

Bees in November

If any hives have not yet been prepared for winter, they should be attended to the first warm day. If hives are to be wintered in-doors they should never be taken in until cold weather begins in earnest, or it may be necessary to set them on their summer stands again. The later bees are housed the better provided the weather remains warm enough for them to fly and void their faces. The room in which the bees are to be wintered should be dark, dry, quiet, and well ventilated. If it is in a cellar under a dwelling, a good way to ventilate it is to run a piece of common stove pipe into the flue which is used by stoves throughout the house, this creates a good draft and forms perfect ventilation. Before placing the hives inside, remove the caps and nail wire cloth over frames as well as at the entrance; this will keep out mice. Now place the absorbing material on the top and set the hives inside, laying sticks over them (to allow a perfect ventilation), and set the others on top of sticks. After bees have been prepared in this manner, and all made snug inside, it cannot be recommended too strongly that they be left severely alone. Have a thermometer in the room, and keep it as near fifty degrees as possible; but better have it forty degrees if it can be held at that all the time than allow much variation. Do not disturb them until ready to take them out in spring; there is no gain in setting them out for cleansing flight, but very often loss. All colonies on summer stands should be packed with absorbing material and given upward ventilation through it.

Poultry Suggestions for Autumn.

It is a great mistake to crowd too many fowls together in one appartment. A house six by eight feet, with a yard thirty feet square additional, will not accommodate over one dozen fowls. Board floors are better than earth. Board floors are always dry, and can be kept much cleaner and sweeter. An application of slaked lime on the boards is worth a dozen on the ground. If more board floors were used, less disinfectants and remedies would be needed.

What breeds of fowls are the best winter layers? All the hens that moult early, and all the early pullets well fed in the fall. Instead of trying to learn the variety or breed that makes the best winter layers, learn to feed and manage properly, and you will succeed with what you have.

A good morning meal in winter for poultry is chopped corn and oats, or wheat, mixed with boiling water. Don't make it sloppy, but dry and crumbly. Feed it warm. A pinch of salt and pepper may be added. Feed about sunrise; they will relish it then better than earlier. Feed at noon a sprinkling of parched corn, oats, or wheat, and at night all they will eat of entire grain of any of the above. Never give more at any time than they will eat up clean. Oyster shells are good shell material.

How Sheep Pay.

If a farmer has plenty of patience, and is willing to give close attention to details in the care of stock, he can make more money for food consumed from sheep than from any other stock. But not one farmer in ten will care to give the attention they requir at certain seasons of the year; so the few who do take good care of a flock will find a good market for mutton, and a demand for wool at some price, usually enough to pay for wintering the flock. A farm which is rolling in its surfaceseems perfectly adapted to sheep raising. Such land needs grass on the hill-tops to keep it from washing, and sheep need hill-tops and sweet, short grass. They like to lie down on a hill-side in the spring, where the sun makes the ground dry and warm, and where they are protected from the raw breezes of the winter.

The greatest profit from sheep is not in mutton or wool, but in the enhanced fertility of the farm on which the are kept. No other stock can compare with sheep in this direction. This increased value comes from two causes: the large quantity of solid and liquid manure deposited on all the land, and particularly on the highest and poorest points in the pasture. The manure, being fine and well scattered, is pressed about the roots of the grass, where it gives the greatest possible benefit. Another source whereby the grasses are encouraged is the destruction of bushel and many kinds of weeds which grow where cattle and horses only are pasture. Hazel-brush fares very badly in the sheep pastured, and wild roses, rag-weed, burdocks, and other weeds are selected first, and then the sheep look for grass. In this way a sheep pasture becomes like a beautiful lawn, and every year grows better; but if the farmer sees "millions in sheep," and over-stocks his fields, then the grass goes with the bushes and weed. Then the sheep get poor, tumble down one after another, their ambition lessens as their flesh goes, and the unfortunate owner, or imprudent manager votes sheep a perfect nuisance.

A Gift for All.

In order to give all a chance test it, and thus be convinced of its wonderful curative powers, Dr. King's New Discovery for Consumption, coughs and colds, will be, for a limited time, given away. This offer is not only lideral but shows unbounded faith in the merits of this great remedy. All who suffer from coughs, colds, consumption, asthma, bronchitis, or any affection of the throat, chest, or lungs, are especially requested to call.

Trial bottles of this Wonderful Discovery for Consumption free at T. D. Thomas' Drug Store.

Things Farmers Tell One Another.

—Mr. E. Williams, of Montclair, N. J., says that the Triumph gooseberry, as grown by him, he exceeded any other variety in size, productiveness and freedom from disease.

—An old farmer tells how he circumvents crows. As soon as crows appear he shoots as many as he can, and when his corn is up hangs their dead bodies around the field, the live crows, seeing their dead companions, seek elsewhere their food and leave the corn so uniquely guarded severely alone.

—The value of hen manure from a single bird for one year is estimated at fifteen cents by a well known poultry grower.

—He—Did you enjoy the sermon? She—Of course I did. I had a new hat and dress and the sexton seated me directly in front of that dreadful Miss Briggs.
