"The Davis."

It stands at the head without a rival. It takes the lead as the best high-arm, smooth-running, easily-mastered, noiseless family machine. That "The Davis" has stood the test through the many years it has been before the public, needs no better proof than that its sales exceed the most sanguine expectations of its friends, and have astonished the manufacturers, who have twice within the last few years been obliged to enlarge their factory, more than doubling their capacity. This result is mainly due to the peculiarity and distinctive feature—the Vertical Feed, a modern idea, the right to which is owned and controlled by "The Davis Sewing Machine Co."
