

and silken, preserves its color, prevents it from falling, and, if the hair has become weak or thin, promotes a new growth. "To restore the original color of my hair, which had turned prematurely gray, I used Ayer's Hair Vigor with en-tire success. I cheerfully testify to the of this preparation."-Mrs. P. H. David-son, Alexandria, La. son, Alexandris, Ls. "I was afflicted some three years with scalp disease. My hair was failing out and what remained turned gray. I was induced to try Ayer's Hair Vigor, and in a few weeks the disease in my scalp disappeared and my hair resumed its original color." - (Rev.) S. S. Sims, Pastor U. B. Church, St. Bernice, Ind. Pastor U. B. Church, St. Bernice, Ind. "A few years ago I suffered the entire loss of my hair from the effects of tetter. I hoped that after a time nature would repair the loss, but I waited in vain. Many remedies were suggested, none, however, with such proof of merit as Ayor's Hair Vigor, and I began to use it. The result was all I could have desired. A growth of hair soon came out all over my head, and grew to be as soft and heavy as I ever had, sud of a natural color, and firmly set."-J. H. Pratt, Spofford, Texas. Ayer's Hair Vigor, Dr. J. C. Ayer & Co., Lowell, Mass. 13 WEEKS. The POLICE GALETTE will be mailed, ecurely wrapped, to any address in the Uni-ed States for three months on receipt of One Dollar. Farmers ought not to expect to grow a crop of potatoes without giving source IFYOU Suffer Any Pain Have Any Soreneus Have a Lame Bock Poel Any Weakness attention to their cultivation. The potato requires something to feed upon and also some moisture. If potatoes are planted upon a soil naturally dry the depth of covering should be sufficient to insure protection from the effects of a possible dry DEATH season. The potato will do fully as well if PAINS the manure has been applied to the land ong enough before planting to become ACHES horoughly incorporated with the soil, although I have always had satisfactory results from the use of horse manure even when it comes in direct contact with the

OF INTEREST TO FARMERS

The Sher horn Cow There does not seem to be any goo

to be counted out of the milkers yet. Formerly this breed was the best dairy cow known, and in those days when Mr. Bat was busy improving them, the original Shorthorn cows were copious and rich milkers. Forty-two quarts of milk and two pounds of butter per day was the com yield of the first Duchess without the excows. There was no testing about the Ducheas, her weekly product of butter was made on the pasture and sold by her mistress every week. And the natural pro clivity to make milk and butter has not left the Shorthorn race, although breeders for many years have been doing all that might be possible to eliminate this valuable characteristic and make them only fat-pro ducing animals. At the recent English Dairy Show a Shorthorn cow proved the champion milker and buttermaker. After 224 days from calving, her milk

pounds per day. The total solids in this milk amounted to 14. 2 per cent., which shows the cow was not only an excellent buttermaker, but exceptionally good for
