COMPARATIVE WORTH OF BAKING POWDERS.

REPORTS OF GOVERNMENT CHEMISTS

As to Purity and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a crossin of tartar powder of a high degree of merit, and does not contain either alum en phosphates, or other injurious substances. E. G. Lova, Ph.D."

"It is a scientific fact that the Royal Baking Powder is absolutely pure. "H. A. Morr. Ph.D."

"I have examined a package of Royal Baking Fowder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious sub-stance. HENRY MORTON, Ph.D., President of Stevens Institute of Technology." "I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome. S. DANA HAYES, State Assayer, Mass."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1878; at the Centennial, Philadelphia, 1576; at the American Institute, New York, and at State Fairs throughout the country. No other article of human food has ever received such high, emphatic, and uni-versal endorsement from eminent chemists, physicians, scientiste, and Boards of Health all over the world.

Norm-The above Diagnam illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler, A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the sdrapp-age of better work. A single trial of the Royal Baking Powder will convince any fair minded person of these facts.

* While the diagram shows some of the alum powders to be of a higher degree strength than other powders ranked below them, it is not to be taken as indicat-g that they have any value. All alum powders, no matter how high their strength, e to be avoided as dangerous.

 15c. and 30c. Per Piece.
 Stylish and a store s

 STYLISH SATEENS.—Our sales of French Sateens have been marvelons. We can
only account for our great success from the fact that the goods were the very best to
be had, styles the choicest, and prices lower than you could buy the same goods is
Eastern cities. A few choice patterns left.
 MARSEILLES QUILTS.—We cannot help metioning Quilts. For we know many stores
in large cities do not show you the assortment, nor do they give you the close prices
we do. Our sales in this department have been something elegant, and if good hose
est goods and low prices will increase our now large sales, we will doour best to maet
this end. We are showing eight different qualities of Marweilles Quilts, also a sas
line of Crechet Goods. line of Crochet Goods
