Lehighton won their second game of ball from Weatherly last Saturday, the score standing at the end of the ninth inning 11 to 9. The features of the game were Weatherly's wonderful pitching, striking out fourteen men, Weatherly's base running and slugging, and Weatherly's running catch of a fly.

Weatherly made their runs principally on errors. Lehighton went to Weatherly short of regular men, so Claus and Peters, two inexperienced players, were placed in the field.

AMONG THE WAGE WORKERS.

An Interesting Batch of Labor Notes Special for Ye Workmen.

A glass factory will probably be established at Dover, Col., by Isaac Long, of Pittsburg. He says Colorado has a good material of manufacture as any place in the country. He thinks the tank system will be the coming method of manufacture. He believes that Colorado mills would have a market for 1,500,000 boxes of window glass annually in Mexico, Texas, Wyoming, East Oregon and Washington Territory. Kline says that the reason 1,500,000 boxes are imported yearly is because the Jersey and New York manufacturers not having the good material their output soon fades.

The Journal of United Labor says: Representatives of both the great political parties totally ignore the means by which labor has bettered its condition in the United States during the last twenty-five years. The mechanics and laborers who are to-day reaping the highest wages, working the shortest hours and enjoying to the largest degree the privileges to which they are entitled, are those who have been wise enough to protect themselves by through organization.

The San Francisco Bulletin thinks that as that city's ability to build first-class iron ships, was shown in the manufacture of the Charleston for the Government, has been demonstrated, the city may heretofore build vessels for the Governments of China, Japan, Argentina, Republic, Chili, Brazil, Central America countries, Mexico and Peru, instead of England and other European countries, because that town is nearer home.

The Lehigh Valley people have ceased almost entirely the use of soft coal. The heavy mountain work is done with engines having the Mitchell grate box, in which lumpy coal is burned. The coal costs less than soft coal and gives just as good results in the generation of steam, and is easier for the firemen and more pleasant for the passengers.

Farmers around Wilkesbarre, Pa., want protection against Jersey and Delaware crops. They ripen earlier than the Wilkesbarre product, and a farmer said the other day that he had to sell potatoes for \$1.15 per bushel that would bring him \$2 if there were no competition.

The Lehigh Valley Railroad Company is rapidly discarding the belt coils from its passenger trains and substituting the automatic steam signal now in use on the Pennsylvania road.

Montreal has thirty boot and shoe manufacturers. Four thousand persons, all over 15 years of age, are employed. Wages average \$12 per week for men and \$7 for women.

About 100 men have been discharged by the Lehigh Valley R.R. Co. from belonging to the Knights of Labor. It is expected that 25,000 men will be in line in New York on Labor Parade day, September 3.

In 1881 England imported 150,000,000 pounds of wool and 150,000,000 pounds two years ago.

Just received from Boston, an immense stock of the genuine Knight of Labor Shoes, which we are selling at \$2.50 and \$3. Warranted solid calf leather. Claus & Bro., the Tailors, sole agents for Carbon county. Our stock of handmade shoes cannot be beat by any dealer in the county.

A Choice Investment. The Mexican Land and Development Company, of No. 27 Broadway, New York, have acquired a grant of public land in the state of Tamaulipas, Mexico, covering several million acres. It covers the most fertile section of land on the Continent, with a soil so rich and a climate so perfect that three crops of some cereals are produced in one year. Its forests are almost impassable with the growth of rare and valuable woods. The standing timber alone more than warrants the capitalization of the company controlling the grant, yet in value it represents but a fraction of the worth of the millions of acres inexhaustible fertility and productiveness. A limited amount of the Company's stock is offered for sale at \$5 per share. With each share is given a certificate which entitles the holder to five acres of land free. See advertisement elsewhere.

Death of an Old Resident. On last Saturday afternoon at about three o'clock, after an illness of about two weeks, Mrs. Lydia, widow of the late Samuel O'Brian, closed her eyes in that last long sleep that knows no waking this side of the tomb. Deceased was probably one of the oldest residents in town at the time of her death, having reached the ripe old age of seventy-three years. She was a kind and affectionate mother and a true believer in the power of God. Her husband was in a mysterious way His wonders to perform." Kind and gentle to all with whom she came in contact she had hosts of friends who mourn the loss of a true Christian disciple.

Mrs. Lydia O'Brian was one of the family of the late George and Elizabeth Handwerker; she was born in Heidelberg township, Lehigh county, on the sixteenth day of February, A. D. 1815; on March 29, 1833, she was united in marriage to Samuel O'Brian, of Lancaster county, this state, by whom she had seven children, three girls and four boys, two of whom survive—Mrs. Daniel Farren, of town, and Joseph O'Brian, of Wilkesbarre. She was a sister of Mrs. Reuben Peters, of Mahoning; Mrs. Rita, of Selkessville, and Mrs. Meyer, of Lizard Creek, all of whom have reached fourscore years and more. She leaves three grand-children and twelve great-grand-children. For over half century she has resided in this town—for the past thirteen years making her home with Daniel Farren, on Bank street. She was interred in the Lehigh cemetery on Tuesday afternoon, Rev. J. Alvin Reber and Abraham Bartholomew officiating.
